LIST OF FIGURES	xiii
LIST OF TABLES	xv
PREFACE	xvii
ACKNOWLEDGMENTS	xxi
INTRODUCTION	1
1. GnRH NEURONS: BACKGROUND	1
2. EVIDENCE THAT GnRH IS THE PRIMARY REGULATOR OF THE HPG AXIS	3
2.1 What is GnRH?	3
2.2 GnRH is the primary regulator of reproductive function	3
3. GnRH NEURONS: A HISTORICAL PERSPECTIVE	4
3.1 The discovery of the hypothalamus as the “master gland”	4
3.2 The isolation of the hypothalamic releasing hormones	6
1. NEUROANATOMY OF THE GnRH-1 SYSTEM	9
1. INTRODUCTION	9
2. HYPOPHYSIOTROPIC GnRH-1 NEURONS: NEUROANATOMY	11
2.1 General features	11
2.2 Synaptic inputs to GnRH-1 perikarya	14
2.3 Morphology and ultrastructural characterization of GnRH-1 perikarya	15
2.4 Projections from GnRH neurons to the median eminence	16
2.5 Regulation of GnRH neuroterminals in the median eminence	18
2.6 Neuroendocrine vs. non-neuroendocrine GnRH neurons	19
3. GnRH IN MAST CELLS IN THE BRAIN	21
4. GnRH CELLS IN THE PERIPHERAL NERVOUS SYSTEM	23
5. GnRH CELLS OUTSIDE THE NERVOUS SYSTEM	24
5.1 Gonads	24
5.2 Placenta	25
5.3 Mammary tissues and milk	25
5.4 Immune tissues	26
5.5 Other tissues	26

2. GnRH PULSATILITY	29
1. INTRODUCTION	29
2. <i>IN VIVO</i> MEASUREMENTS OF PULSATILE GnRH RELEASE	30
2.1 Pulsatile release of GnRH in rats	31
2.2 Pulsatile release of GnRH in sheep	32
2.3 Pulsatile release of GnRH in rhesus monkeys	34
2.4 Pulsatile release of GnRH in rabbits	36
2.5 Pulsatile release of GnRH in horses	37
2.6 Pulsatile release of GnRH in cows	37
2.7 Relationship of pulses of GnRH to those of LH	37
3. ELECTROPHYSIOLOGY OF GnRH NEURONS <i>IN VIVO</i>	38
3.1 Multiple unit activity (MUA) studies	38
4. <i>IN VITRO</i> MEASUREMENTS OF GnRH PULSATILITY	42
4.1 Hypothalamic explants and cultures	42
4.2 Olfactory placode cultures	45
4.3 GT1 cells	47
5. HOW ARE GnRH PULSES COORDINATED?	49
3. GnRH NEURONS: CHANGES ACROSS THE LIFE CYCLE	53
1. INTRODUCTION	53
2. EMBRYONIC DEVELOPMENT OF GnRH NEURONS	54
2.1 Migratory pattern of GnRH neurons	55
2.2 Factors controlling guidance of GnRH	56
3. THE ROLE OF GnRH NEURONS IN PUBERTAL DEVELOPMENT	61
3.1 Changes in pulsatile GnRH are the primary event regulating puberty	61
3.2 Mechanisms for the onset of puberty	63
3.3 Neurotransmitters and neurotrophic factors regulating GnRH neurons during puberty	67
4. THE ROLE OF GnRH NEURONS IN ADULTHOOD	80
4.1 Role of GnRH in ovulation and the preovulatory GnRH/LH surge in females	80
4.2 GnRH neurons and male reproductive function	84
5. REPRODUCTIVE AGING	85
5.1 The role of neuroendocrine cells in reproductive aging in females	85
5.2 Changes intrinsic to GnRH neurons during reproductive senescence	87
5.3 Reproductive aging in males	90
5.4 Factors regulating GnRH neurons during aging	91

	ix
4. FACTORS REGULATING GnRH NEURONS	93
1. INTRODUCTION	93
2. NEUROTRANSMITTERS AND NEUROMODULATORS REGULATING GnRH NEURONS	94
2.1 Factors stimulating GnRH neurons	94
2.2 Factors inhibiting GnRH neurons	111
2.3 Factors with biphasic effects on GnRH	115
3. NEUROTROPHIC FACTORS AND CYTOKINES REGULATING GnRH NEURONS	118
3.1 Neurotrophic factors stimulating GnRH	119
3.2 Cytokines affecting GnRH neurons	120
4. ARE STEROID HORMONE RECEPTORS ON GnRH NEURONS?	121
4.1 Steroid receptors	122
 5. THE GnRH GENE	 125
1. INTRODUCTION	125
2. STRUCTURE & PROCESSING OF THE GnRH-1 GENE	125
2.1 GnRH RNA splice variants	127
3. GnRH 5' FLANKING REGION AND GENE TRANSCRIPTION	127
3.1 General structure of the GnRH 5' flanking region	127
3.2 GnRH gene transcription	128
4. REGULATION OF GnRH GENE EXPRESSION <i>IN VIVO</i>	131
4.1 Changes in GnRH gene expression during development	132
4.2 Changes in GnRH gene expression during reproductive senescence	135
4.3 Steroid hormone regulation of GnRH gene expression	137
4.4 Factors regulating GnRH gene expression	144
4.5 Photoperiodic regulation of GnRH gene expression	149
5. POST-TRANSCRIPTIONAL REGULATION OF GnRH mRNA LEVELS	150
6. FOS EXPRESSION IN GnRH NEURONS	151
6.1 Steroid regulation of Fos expression in GnRH neurons	151
6.2 Mating induction of Fos expression in GnRH neurons	153
6.3 Neurotransmitters involved in Fos expression in GnRH neurons	155

6. MULTIPLE GnRH MOLECULES, PHYLOGENY AND EVOLUTION	157
1. INTRODUCTION	157
1.1 Nomenclature	158
2. AMINO ACID AND GENE SEQUENCES AND STRUCTURES OF GnRH	159
3. CO-EXISTENCE OF MULTIPLE GnRHS IN VERTEBRATE BRAINS	161
3.1 GnRH molecules in the vertebrate phyla	163
4. GnRH IN INVERTEBRATES	168
4.1 Invertebrate GnRH-like molecules	168
5. EVOLUTION OF GnRH	170
6. HOW ANCIENT IS GnRH?	173
7. GnRH NEURONS AND REPRODUCTIVE BEHAVIOR	175
1. INTRODUCTION	175
2. EFFECTS OF GnRH ON SEXUAL BEHAVIOR IN FEMALES	175
3. EFFECTS OF GnRH ON SEXUAL BEHAVIOR IN MALES	177
4. SPECIES COMPARISONS	178
5. NEUROTRANSMITTERS INVOLVED IN EFFECTS OF GnRH ON REPRODUCTIVE BEHAVIORS	178
6. EFFECTS OF BEHAVIOR ON GnRH EXPRESSION	179
8. GnRH NEURONAL CELL LINES	183
1. INTRODUCTION	183
2. THE CREATION AND PROPERTIES OF THE IMMORTALIZED GnRH CELL LINES	183
2.1 The GT1 cells	183
2.2 NLT and Gn cells	188
3. NEUROTRANSMITTERS REGULATING GnRH CELL LINES	189
3.1 Acetylcholine	189
3.2 Catecholamines	189
3.3 Corticotropin-releasing factor	191
3.4 Endothelin	191
3.5 Galanin	192
3.6 GABA	192
3.7 Glutamate	193
3.8 Histamine	193
3.9 Leptin	193

3.10 α -melanocyte-stimulating hormone	194
3.11 Neuropeptide Y	194
3.12 Opioids	194
3.13 Serotonin	194
3.14 Substance P	194
3.15 Vasoactive intestinal peptide	195
4. SECOND MESSENGERS AND SIGNAL TRANSDUCTION IN GnRH CELL LINES	195
4.1 Protein kinase C system	195
4.2 Protein kinase A system	196
4.3 Calcium systems	197
4.4 Protein kinase G system	198
5. NEUROTROPHIC FACTORS AND CYTOKINES REGULATING GnRH CELL LINES	198
5.1 Basic fibroblast growth factor	198
5.2 Insulin-like growth factor-I	199
5.3 Insulin-like growth factor-II	199
5.4 Interleukin-1 β	200
5.5 Transforming growth factor- α	200
5.6 Transforming growth factor- β	201
6. PERIPHERAL PROTEINS REGULATING GnRH CELL LINES	201
6.1 Activin-A and inhibin	201
7. DO GnRH CELL LINES EXPRESS STEROID HORMONE RECEPTORS?	201
7.1 Androgen receptor	202
7.2 Estrogen receptor	202
7.3 Glucocorticoid receptor	203
7.4 Progesterone receptor	203
7.5 Thyroid hormone receptor	203
8. CAVEATS OF IMMORTALIZED GnRH CELL LINES	203
9. GnRH MUTANTS AND TRANSGENIC MICE	205
1. INTRODUCTION	205
2. GnRH TRANSGENIC ANIMALS	205
2.1 GnRH-GFP mice	205
2.2 GnRH-LacZ mice	207
2.3 GnRH-luciferase mice	209
2.4 GnRH-SV40 T-antigen transgenic mice	210
2.5 Transgenic fish	210
3. THE HYPOGONADAL (HPG) MOUSE	211
3.1 The phenotype of hpg mice	211
3.2 Reproductive physiology of hpg-POA mice	212
3.3 Targeting of GnRH neurons in hpg-POA mice	214

10. GnRH IN HUMANS	217
1. INTRODUCTION	217
2. LOCALIZATION AND MORPHOLOGY OF HUMAN GnRH-1 NEURONS	217
3. PULSATILE GnRH/LH RELEASE IN HUMANS	218
3.1 Pulsatile LH release in adult women	218
3.2 Pulsatile LH release in adult men	219
3.3 Pulsatile LH release during development and puberty	219
3.4 Pulsatile LH release during reproductive aging	220
3.5 <i>In vitro</i> studies	221
4. MOLECULAR BIOLOGY OF GnRH IN HUMANS	222
4.1 Structure of the GnRH gene	222
4.2 GnRH gene expression in humans	223
4.3 GnRH-2 in humans	223
5. GnRH THERAPY	223
5.1 Idiopathic hypogonadotropic hypogonadism	224
5.2 Kallmann's Syndrome	224
5.3 Infertility in women	225
5.4 Polycystic ovarian syndrome	225
5.5 Precocious puberty	226
6. GnRH AGONISTS AND ANTAGONISTS	226
 BIBLIOGRAPHY	 229
 INDEX	 317

LIST OF FIGURES

Page

- Figure 1.** The hypothalamic-pituitary-gonadal axis. 2
- Figure 2.** Localization of GnRH perikarya and their projections to the median eminence in cows. 12
- Figure 3.** Distribution of GnRH neurons from rostral to caudal through the brain of a male Djungarian hamster. 13
- Figure 4.** Examples of unipolar and bipolar GnRH neurons in the female rhesus monkey. 16
- Figure 5.** Distribution of GnRH fibers projecting to the median eminence. 17
- Figure 6.** Electron microscopy of GnRH and NMDA-R1 double immunolabeling in the median eminence of the ovariectomized rat. 19
- Figure 7.** Distribution of expression of GnRH-immunoreactivity in the mast cells of the brain of courting ring doves. 22
- Figure 8.** Effects of pulsatile vs. continuous GnRH on LH release. 29
- Figure 9.** Pulsatile GnRH release during the GnRH/LH surge. 33
- Figure 10.** Concordance of GnRH and LH pulses in the ewe. 38
- Figure 11.** Relationship of MUA and LH release in the monkey. 39
- Figure 12.** Pulsatile GnRH release from olfactory placode cultures. 46
- Figure 13.** Pulsatile release of GnRH from perfused GT1 cells. 47
- Figure 14.** Embryonic migration of GnRH neurons from the olfactory placode to the forebrain. 56
- Figure 15.** Time courses of circulating LH concentrations in developing ovariectomized female rhesus monkeys. 62
- Figure 16.** Schematic representation of the diurnal rhythm of GnRH release during the progression of puberty. 65

Figure 17. Stimulatory effects of neuropeptide Y on pulsatile GnRH release in a midpubertal female rhesus monkey.	76
Figure 18. The GnRH/LH surge in the ewe.	83
Figure 19. Schematic representation of neurotransmitters stimulating or inhibiting GnRH neurons.	95
Figure 20. Effects of opioid agonists and antagonists on pulsatile LH release in the guinea pig.	113
Figure 21. Structure of the proGnRH gene.	126
Figure 22. Changes in GnRH mRNA and primary transcript during development in mice.	132
Figure 23. Co-expression of Fos in a GnRH neuron.	152
Figure 24. Amino acid alignment of GnRH precursors.	160
Figure 25. Structure of representative proGnRH genes in the cichlid fish, <i>H. burtoni</i> .	161
Figure 26. Distribution of three populations of GnRH cells in the brain of a single organism.	162
Figure 27. Proposed scheme for the evolution of GnRH genes.	173
Figure 28. Behavioral regulation of the size of GnRH-1 neurons in the POA of a cichlid fish, <i>H. burtoni</i> .	181
Figure 29. Morphology of GT1-7 cells in culture.	184
Figure 30. Pulsatile GnRH release in GT1-7 cells.	186
Figure 31. Spontaneous action potentials in GnRH-GFP neurons.	207
Figure 32. Example of a GnRH-LacZ neuron in a transgenic mouse.	208
Figure 33. Photomicrograph of a POA graft in the third ventricle of an hpg mouse.	213

LIST OF TABLES

	Page
Table 1. Electrophysiological properties of GnRH neurons from adult animals, embryonic olfactory placode cultures, and GT1 cells.	44
Table 2. Summary of species in which GnRH-1 migration from an olfactory origin has been reported.	54
Table 3. Summary of factors implicated in GnRH neuronal migration from the olfactory placode to the POA.	57
Table 4. Neurotransmitters, peptides and neurotrophic factors affecting GnRH release and gene expression and the timing of puberty.	68
Table 5. Age-related changes in the GnRH neurosecretory system.	88
Table 6. Neurotransmitters acting on GnRH neurons.	96
Table 7. Neurotrophic factors and cytokines acting on GnRH neurons.	119
Table 8. Hormone receptors on GnRH neurons.	121
Table 9. GnRH gene expression in ovarian-intact female rats.	138
Table 10. Steroid hormone effects on GnRH mRNA levels in OVX female rats.	139
Table 11. Effects of OVX on GnRH gene expression.	140
Table 12. Effects of castration and testosterone replacement on GnRH gene expression in male rats.	142
Table 13. Neurotransmitters and neurotrophic factors regulating GnRH gene expression.	146
Table 14. Amino acid sequences of GnRH molecules in vertebrates.	159
Table 15. Presence of specific GnRHs in brains of multiple species.	164
Table 16. Amino acid sequences of GnRH homologs in invertebrates.	170
Table 17. Neurotransmitters shown to regulate GnRH neuronal cell lines.	190

Table 18. Neurotrophic factors shown to regulate GnRH neuronal cell lines.	200
Table 19. Steroid hormone receptors on GT1 cells.	202
