

TABLE OF CONTENTS

KEY NOTE LECTURES

An outlook on molecular pathology <i>David Botstein</i>	1
Telepathology: Prospective or disaster for the future of pathology <i>Bruce H. Williams</i>	2
Biochip technologies for integrating high-throughout genomics with morphology <i>Olli-P. Kallioniemi, G. Sauter</i>	5
Stem cell repertoire and plasticity: Implications for pathology and the future of transplantation <i>Nicholas Wright</i>	7

RESPIRATORY TRACT PATHOLOGY

Scientific News on Pulmonary Pathology

Preinvasive bronchial lesions – Molecular pathology <i>Elisabeth Brambilla</i>	10
Role of some immunohistochemical markers in the prognostic evaluation of non-small cell pulmonary carcinoma <i>Emilio Alvarez-Fernandez, M.L. Herranz-Aladro, L. Carretero-Albiñana, F. Gonzalez-Aragoneses, N. Moreno, M. Cebollero Presmanes</i>	14
Mechanisms of fibrogenesis in asbestos induced disease <i>Philip Hasleton</i>	18

Pediatric Pulmonary Pathology

Congenital cystic lung disease <i>Mary N. Sheppard</i>	21
Respiratory infections and respiratory distress syndrome <i>Helmut H. Popper</i>	27

PATHOLOGY OF THE FEMALE GENITAL TRACT

Simple Clefts – Complex Problems

Benign glandular lesions of the uterine cervix <i>Esther Oliva</i>	31
---	----

Adenocarcinoma of the cervix
Robert H. Young 35

New techniques applied to glandular proliferations
Michael Wells 38

Controversies in Ovarian Surface Epithelial-Stromal Tumors

Mucinous Tumors: The many faces of a common tumor
Robert H. Young 45

Diverse pathways of tumorigenesis in ovarian serous carcinoma
Robert J. Kurman 50

Ovarian borderline tumors or tumors of low malignant potential –
Is it still an appropriate diagnosis?
Manfred Dietel 51

Endometrial Pathology: A New Look at Some Old Problems

Molecular pathology of endometrial hyperplasia and carcinoma
Jaime Prat 55

A dualistic model for endometrial carcinogenesis based
on immunohistochemical and molecular genetic analysis
Robert J. Kurman 62

Gynecopathology of the German Society of Pathology

Endometrial stromal tumors: An update
Esther Oliva 64

Sex cord tumors – The legacy of Meyer
Robert H. Young 70

The pathology of intermediate trophoblastic tumors and tumor-like lesions
Robert J. Kurman 73

New concepts in the operative treatment of cervical carcinoma:
Total mesometrial resection (TMMR)
Michael Höckel 74

**Hot Topics in Breast Cancer:
Markers Related to Survival and Treatment**

The clinical significance of bcl-2 overexpression in breast cancer patients –
A retrospective study with long term follow up data
*Maria Bai, N.J. Agnantis, P. Zagorianakou, S. Kamina, A. Nonni,
N. Pavlidis, E. Briasoulis* 78

Micrometastases – A new prognostic factor?
Jahn Marthin Nesland, E. Borgen, G. Kvalheim, B. Naume 81

Is angiogenesis a prognostic factor reliable enough to be targeted for therapy?
Fernando C. Schmitt 82

Molecular genetic analysis of basaloid/myoepithelial tumours of the breast
Sunil R. Lakhani 86

Non Serous Ovarian Carcinomas

Mucinous tumors of the ovary: From adenoma to carcinoma
Jaime Prat 88

Transitional cell tumors of the ovary
Steffen Hauptmann 98

Clear cell carcinoma and its mimics
Esther Oliva 100

Precancerous Breast Lesions

Molecular genetics of apocrine hyperplasia and normal breast tissues
Sunil R. Lakhani 105

UROPATHOLOGY

Bladder Cancer: Is the New Classification Controversial?

Molecular cytogenetics of urinary bladder cancer
Guido Sauter, J. Richter, R. Simon 108

New WHO-classification of urothelial carcinoma: A criticism
Ferdinand Hofstädter 113

The reliability and reproducibility of the different classifications
of bladder cancer
Gregor Mikuz 114

Nephropathology

Molecular mechanism of proteinuria:
Novel insights from gene expression studies, hope or hype?
Matthias Kretzler 116

Spectrum of kidney diseases associated
with monoclonal immunoglobulin deposits
Alenka Vizjak 118

End-stage renal failure three years after urolithiasis: Importance of adenine
phosphoribosyltransferase (APRT) deficiency screening
Solange Moll, P. Schraml, V. Nickeleit, P. Sandoz, M.J. Mihatsch 122

PATHOLOGY OF THE MALE GENITAL TRACT

Precancerous Prostate

Nuclear chromatin texture features of non-malignant tissue can detect adjacent prostatic adenocarcinoma <i>Thomas Mairinger, G. Mikuz, A. Gschwendtner</i>	127
Molecular markers in chemoprevention <i>James R. Marshall</i>	129
Molecular cytogenetic aspects of precancerous lesions and cancer of the prostate <i>Lukas Bubendorf</i>	131
Steroid receptors in prostate cancer and its precursors <i>Helmut Bonkhoff, T. Fixemer, K. Remberger</i>	133
Angiogenesis in precancerous prostatic lesions <i>Rodolfo Montironi</i>	137
The spectrum of cribriform epithelial prostatic lesions <i>Ferran Algaba</i>	138
Therapy-induced changes in high grade prostatic intra-epithelial neoplasia and prostatic carcinoma <i>Theo H. van der Kwast</i>	140

Pathology of the Testes

Morphology of testicular germ cell tumors – problematic aspects <i>Grete Krag Jacobsen</i>	144
Genetics and pathobiology of testicular germ cell tumors <i>Jan Wolter Oosterhuis, L.H.J. Looijenga</i>	147
Non-germ cell tumors of the testis and adnexa: Selected topics <i>Robert H. Young</i>	151

Prostate Cancer Diagnosis on Needle Biopsies

Atypical small acinar proliferation <i>David G. Bostwick</i>	155
Mimickers of prostate cancer <i>Antonio López Beltran</i>	156
Minimal criteria for the diagnosis of prostatic adenocarcinoma and Gleason grading in prostate needle biopsy <i>F. Algaba</i>	157
Morphologic prognostic factors and correlation with radical prostatectomy <i>Emiel Ruijter, G. van Leenders, G. Miller</i>	159

Immunohistochemical/molecular markers useful in prostate cancer diagnosis
Christofer S. Foster 159

PEDIATRIC PATHOLOGY

Placenta

Control of normal trophoblast invasion in the human
Peter Kaufmann 161

Trophoblast invasion in tubal as compared to normal intra-uterine pregnancy
Sonja Kertschanska 165

Morphological characteristics of placental disorders in early pregnancy
Hermann Neudeck, M. Vogel 168

Multifaceted diagnostic of abortion – Clinical relevance
H. Müntefering 170

Inflammatory Diseases

Significance of bronchus-associated lymphoid tissue (BALT)
in fetal pulmonary infection
Thomas Stallmach, J. Ersch, T. Tschernig 174

Inflammatory bowel disease (IBD) in children
Liliane Boccon-Gibod 177

Inflammation and childhood tumours
Jem Berry 180

Tumors of Childhood and Adolescence

Peripheral neuroblastic tumours – Morphology requested?!
Gabriele Amann 185

CYTOPATHOLOGY

New Technologies in Cytopathology

New challenges for cytopathology in XXI Century
Fernando C. Schmitt 189

Thin layers preparations on cervical cytological material
Christine Bergeron 192

Immunohistochemical applications in the differential diagnosis
of follicular lesions of the thyroid on FNA material
Mauro Papotti, S. Landolfi, M. Volante 195

Telomerase as a molecular marker in FNA of breast lesions
Christopher Poremba, W. Boecker 197

MOLECULAR PATHOLOGY

Receptors and Adhesion Molecules

Carbohydrates – Adhesion molecules relevant to host-environment
and tumor-host interactions
Leonor David, C. Reis, F. Carneiro, M. Sobrinho-Simões 200

Metastatic Process

Micrometastatic disease in solid tumors
Richard James Cote, D. Hawes, A.M. Neville 201

Genetic Prognostic Factors

Comparative genomic hybridization for the identification
of putative prognostic parameters
Holger Moch, G. Sauter 204

Expression profiling for the assessment of genetic prognostic factors
Iver Petersen 207

Tissue microarrays for rapid evaluation of prognostic markers
Guido Sauter, H. Moch, O.-P. Kallioniemi 210

Molecular Pathology of Infectious Diseases

Mycobacterial infections
Stephan Schulz, A. Cabras 214

Human papillomavirus infections and cervical cancer: Conceptual
and clinical aspects
Peter J.F. Snijders, A.J.C. van den Brule, C.J.L.M. Meijer 217

Viral infections in renal allografts: What is new?
Volker Nickenleit 220

Molecular Tumor Pathology

Analysis of gene expression in lymphoma derived cell lines and malignant
lymphoma using cDNA microarrays. Effects of CD30 stimulation
Heinz Höfler 225

Differential Diagnosis of Metastases

Clinically relevant animal models of metastasis using SCID mice and lectin defined human tumour cell lines
Udo Schumacher 226

Value of cytokeratin immunohistochemistry in the differential diagnosis of carcinoma metastases
Roland Moll 229

Precancers – Identifying the High Risk Patients

Quantitative sputum cytology based on high resolution, automated image cytometry
Bojana Turic, D. Garner, J. Beveridge, B. Palcic 232

Pathobiology of Preneoplasia

The pathobiology of hepatic preneoplasia
Peter Banasch 233

The pathobiology of cervical preneoplasia
Simon Herrington 236

The origins of colorectal neoplasia
Nicholas Wright 240

PATHOLOGY OF BONE, JOINTS, AND SOFT TISSUE

Osteopathology

New genetic aspects in the pathology of chordoma
Stefanie Scheil 241

Novel Aspects of Cartilage Neoplasia

Genetic basis of cartilage differentiation
Benoit de Crombrughe, V. Lefebvre, W. Bi, W. Huang, S. Murakami, H. Akiyama, R. Behringer 245

Molecular pathogenesis of cartilage neoplasia
Bogdan Czerniak 246

Role of interdisciplinary correlations in diagnosis of cartilage neoplasia
Howard D. Dorfman 248

Soft Tissue Tumors

Controversies in soft tissue tumor pathology – Introduction
Angelo P. Dei Tos, J.M. Coindre 251

Pleomorphic sarcomas: Is there a need for subclassification?
Antonio G. Nascimento 252

Grading of soft tissue sarcomas: Why and how?
Louis Guillou 257

The atypical lipoma controversy
Thomas Mentzel 262

Diagnostic pitfalls in molecular diagnosis of bone and soft tissue tumors
Enrique de Alava 266

Hemangiopericytoma – Fact or fiction?
Cyril Fisher 270

Inflammatory and Degenerative Joint Diseases

Histological classification of synovial membranes of patients
with rheumatoid arthritis
Peter Stiehl 281

Grading of chronic synovitis – Proposal for a histopathological grading system
Veit Krenn 283

Cartilage alterations in osteoarthritis and its diagnostic implications
Thomas Aigner 286

Morphology of acute and chronic changes of the meniscus – new aspects?
Annette Fisseler-Eckhoff, K.-M. Müller 287

ELECTRONIC PATHOLOGY

New Techniques

Telepathology – Experiences and the next steps
Peter Schwarzmann, B. Binder 290

Application of artificial intelligence systems (AI) in telepathology
Klaus Kayser, G. Kayser, P. Hufnagl 293

Systems of telepathological services with image database interface
Janusz Szymas, J. Stefanowski, G. Wolf, W. Papierz, B. Jarosz, M. Nowak 294

The new platform of the UICC Telepathology Consultation Center (TPCC)
*P. Hufnagl, M. Dietel, T.N. Nguyen-Dobinsky, S. Gardziella, T. Feig,
I. Mortara, W. Striebel* 297

Virtual cases: A new tool in pathology
*Francesca Demichelis, M. Barbareschi, L. Gatti, G. Landberg,
P. Dalla Palma, S. Forti* 301

Multimedia Education

Continuing anatomical pathology education – A program using CD rom format rather than circulating glass microscope slides <i>Robin A. Cooke</i>	304
Multimedia interactive teach- and courseware for diagnostic effusion cytology – A knowledge-based diagnostic system on CD <i>Alfred Böcking, P. Kinzel, H. Motherby, N. Pomianski</i>	305
The use of the World Wide Web in the teaching of pathology <i>Edward Duvall</i>	307
Intranet-based education and training in pathology <i>Mike Otto</i>	308
High resolution digital imaging (HRDI) improving cytopathology and e-publishing <i>Björn Risberg, B. Davidson, J. Sudbø, A. Reith</i>	309

ENDOCRINE PATHOLOGY**Diagnosis of Malignancy in Selected Endocrine Tumors**

Biological implication of blood vessel invasion (V.I.) in thyroid nodules and goiters <i>Gianni Bussolati</i>	310
Hurthle cell carcinomas and adenomas <i>Maria Luisa Carcangiu</i>	311
Assessment of malignancy in neuroendocrine tumors of the gastrointestinal tract <i>Cesare Bordi</i>	314

Clonality of Endocrine Lesions

Methods for assessing clonality in neoplastic and pseudoneoplastic lesions. Clonality in pancreatic endocrine tumors <i>Paul Komminoth, A.A. Perren</i>	317
Mitochondrial DNA abnormalities in thyroid Hurthle cell tumours <i>Valdemar Máximo, M. Sobrinho-Simões</i>	321
Clonality assays in adrenal medullary and thyroid C-cell proliferation <i>Salvador Diaz-Cano</i>	324
Clonality in endocrine lesions. Clinico-pathologic implications and concluding remarks <i>Juan Rosai</i>	339

DERMATOPATHOLOGY

Pigmented Tumors

Childhood melanoma
Alain Spatz 340

Melanoma: Variants
Phillip H. McKee 342

Histological features of thin metastasising melanoma
Martin G. Cook 345

The role of the pathologist in the management of sentinel nodes
Alistair J. Cochran 348

Molecular pathology of melanoma
Martin C. Mihm, I. Sanchez-Carpintero, K. Frangia, J.S. Ross 353

Inflammations

Histopathology of cutaneous vasculitis
Bernhard Zelger 356

Non-Pigmented Tumors

Epithelial tumors of the skin and cutaneous T-cell lymphomas
Günter Burg 359

Primary cutaneous B-cell lymphomas, adnexal skin tumors,
 and Merkel cell carcinoma
Werner Kempf 360

Histiocytic and fibrohistiocytic skin lesions including Langerhans histiocytosis
Pierre Rudolph 362

PATHOLOGY OF THE DIGESTIVE TRACT

Hormonal and Hormon-Like Effects in Cell Growth and Carcinogenesis

Hormonal and carcinogenic effects of dehydroepiandrosterone on liver
Doris Mayer 363

Effect of thyroid hormone (T3) on normal and preneoplastic liver growth
*Giovanna M. Ledda-Columbano, M. Pibiri, C. Cossu, G. Simbula,
 D. Concas, A. Columbano* 367

Experimental hormonal hepatocarcinogenesis
Frank Dombrowski 369

Carcinogenesis in the Liver

Human hepatocarcinogenesis – concepts, criteria and differential diagnosis of premalignant and early malignant lesions <i>Peter Schirmacher</i>	375
Viral hepatitis and liver cancer <i>Hans-Peter Dienes</i>	376
Hepatocellular carcinoma in cirrhosis – When does cancer start? <i>Valérie Paradis</i>	377
Molecular characterization of hepatocellular carcinoma <i>Kurt Zatloukal, C. Stumptner, A. Fuchsichler, H. Heid, L. Kenner, H. Denk</i>	379

Diseases of the Liver & Gastrointestinal Tract

Drug-induced injury of the gastrointestinal tract <i>Cecilia M. Fenoglio-Preiser</i>	380
Gastrointestinal precancerous lesions and their imitators <i>Leslie H. Sobin</i>	384
Steatohepatitis <i>Alastair D. Burt</i>	386
Pathology of chronic cholestasis <i>Tania Roskams</i>	387
Drug-induced hepatotoxicity: An update <i>Kamal G. Ishak</i>	390

Pathobiology of the Myofibroblast

Colon cancer cells request invasion stimulators from myofibroblasts <i>Olivier De Wever, L. Van Hoorde, C. Gespach, M. Mareel</i>	394
--	-----

Patterns and Mimicries in Gastrointestinal Pathology

The patterning of invasion in GI-tumors <i>Thomas Kirchner, T. Brabletz, A. Jung</i>	395
Diagnostic patterns and deceptive mimicries in inflammatory bowel diseases <i>Karel Geboes</i>	397

Autoimmunity in Liver, Biliary Tract, and Pancreas

The overlap syndrome in autoimmune liver disease <i>Luigi Maria Terracciano</i>	401
Chronic autoimmune pancreatitis <i>G. Klöppel, J. Lüttges, M. Tiemann</i>	404

HEMATOPATHOLOGY

Differential Diagnosis in Lymph Node Biopsy

Viral lesions in lymph nodes <i>Masahiro Kikuchi</i>	406
Tumor metastases in lymph nodes <i>Harry L. Ioachim</i>	410

Bone Marrow

Evidence of clonality in chronic neutrophilic leukaemia (CNL) using the HUMARA assay <i>Joachim Böhm, S. Kock, H.E. Schaefer, P. Fisch</i>	414
Lymphoid nodules in the bone marrow – Incidence and occurrence in different entities <i>Alexander Marx</i>	417

MALT Lymphomas

Association between <i>Helicobacter pylori</i> infection and gastric MALT lymphoma <i>Andreas Neubauer</i>	421
The histopathology and immunohistology of gastric MALT lymphoma <i>Peter G. Isaacson</i>	422
Molecular biology of gastric MALT lymphoma <i>Ming-Qing Du</i>	423

BASIC AND SURGICAL PATHOLOGY

New Systems for Tumor Classification and Terminology

<i>Paul Kleihues, C.M. Fenoglio-Preiser, H. Stein, L.H. Sobin</i>	424
---	-----

Differential Diagnosis of Small, Blue, Round Cell Tumors

Es/PNET tumors: Concept, varieties and biological parameters <i>Antonio Llombart-Bosch</i>	427
Small-, round-cell tumors of childhood and adolescents, with special reference to rhabdomyosarcomas, neuroblastomas and blastemic nephroblastoma <i>Dieter Harms</i>	428
Importance of response to chemotherapy in Ewing's (EW) tumors <i>Piero Picci</i>	430

Trail-induced apoptosis is a unique feature of the Ewing's sarcoma family of tumours (ESFT) within SRCT of childhood and adolescence <i>Frans van Valen</i>	431
Cytogenetic and molecular genetic techniques applied to differential diagnosis of small round cell tumors <i>Sakari Knuutila</i>	435

Pitfalls in Immunohistochemistry

Artifacts of tissue fixation and processing <i>Martin Werner, J. Nährig</i>	438
Metastatic tumours of unknown origin: Immunohistochemical approach and pitfalls <i>Mogens Vyberg</i>	441
Immunophenotype of ovarian tumors and related peritoneal lesions: Diagnostic value and pitfalls <i>Bernard Czernobilsky</i>	446
Immunohistological analysis of malignant lymphomas: Diagnostic applications and pitfalls <i>Ioannis Anagnostopoulos</i>	450
Unexpected marker expression in diagnostic immunohistochemistry <i>Peter J. Barth, R. Moll</i>	452

Certification in Pathology

External quality assessment in diagnostic histopathology: The UK experience <i>Peter N. Furness</i>	456
The European board examination in pathology: A threat or a promise <i>Jan G. van den Tweel</i>	458
Accreditation by the College of American Pathologists (CAP) <i>Volker Loy</i>	461
Certification programmes in Spain <i>F.J. Martínez-Tello</i>	463

Pathologists in Clinical Trials

Pathology review in clinical trials <i>Alain Spatz</i>	466
Pathologists, translational by nature <i>J. Wolter Oosterhuis</i>	467
Participation of the pathologist in scientific committees and protocol design <i>Christian Wittekind</i>	469

Metabolic Disorders: Amyloidosis

Pathogenesis and nomenclature of amyloid <i>Per Westermark</i>	473
Molecular diagnosis of amyloidosis <i>Klaus Altland</i>	475
Histopathological diagnosis and classification of amyloid <i>Christoph Röcken</i>	477
Current therapy of systemic amyloidoses <i>Giampaolo Merlini</i>	478

Environmental Pathology

Carcinogenicity of dimethylarsinic acid, an inorganic arsenic metabolite, in rodents <i>Shoji Fukushima, H. Wanibuchi, M. Wei, E.I. Salim, K. Morimura</i>	480
Renal cell carcinoma (RCC) and low-dose radiation environment: Comparative analysis between Ukrainian cases registered after the Chernobyl accident and a control group from Valencia (Spain) <i>Luisa Morell-Quadreny</i>	483
“Chernobyl cystitis” induced by persistent chronic low-dose ionizing radiation through oxidative stress <i>Alina Romanenko</i>	486
Placental immunohistochemistry in women with incorporated radionuclides <i>Tamara D. Zadorozhnaya, T. Hata, H. Osava, I.S. Lukianova, N.A. Mendel</i>	488

Standardization of Immunohistochemistry

Standardisation of Her-2/neu immunohistochemistry in breast carcinoma <i>Eugenio Maiorano</i>	492
Automation in immunohistochemistry <i>Martin Werner, J. Nährig</i>	495
Immunohistochemical protocol optimization and quality assessment <i>Mogens Vyberg</i>	497

Recent Advances in Surgical Pathology

Neuroendocrine tumours of the skin: Up to immunohistochemistry <i>Vincenzo Eusebi</i>	503
Genetics of astrocytoma progression <i>Paul Kleihues, H. Ohgaki</i>	504
Recent advances in surgical pathology: Cytogenetics and molecular alterations in soft tissue tumors <i>Giovanni Tallini</i>	506

Quantitative Pathology

The morphometric D-score is a more accurate predictor of progression of endometrial hyperplasias to cancer than the WHO classification <i>Anne Ørbo, J.P.A. Baak, FIAC (Hon) (Antwerp)</i>	512
Possibilities of CGH as a quantitative method in prognostication of breast cancer <i>Katrin Friedrich, T. Weber, J. Scheithauer, G. Haroske, W. Meyer, V. Dimmer, G. Baretton, K.D. Kunze</i>	515
Prognostication and diagnostics of neoplastic lesions from the oral cavity by standardized DNA image cytometry <i>Gunter Haroske, D. Dworak, F. Theissig</i>	519

TROPICAL PATHOLOGY**Infectious Diseases**

Changes of lymph node architecture following HAART in acute HIV infection <i>Paul Racz, S. Harder, K. Tenner-Racz</i>	523
Protozoa (and new Protozoa?) in HIV patients <i>Paul Hofman</i>	525
Severe tungiasis in a community in Northeast Brazil: A clinico-pathological study <i>M. Eisele, J. Heukelbach, E. van Marck, H. Feldmeier</i>	527

CARDIOVASCULAR PATHOLOGY**Selected Topics**

Acquired myocardial disease as a cause of death in neonates and infants <i>Elizabeth S. Gray</i>	529
Multifocal myocardial necrosis – A distinctive lesion seen in cystic fibrosis, lipomatous pancreatic atrophy and Keshan disease <i>Christian Nezelof, R. Bouvier, F. Dijoud</i>	533
New trends in morphology of chronic myocarditis in children. ICAM-1 molecules expression as a prognostic factor <i>Bogdan M. Wozniwicz</i>	535
Early atherosclerotic changes <i>Anna Kadar, G. Illyes, E. Hortovanyi</i>	539
Intimal infection by chlamydia pneumoniae; incidence and relation to intimal injury and atherosclerosis <i>Sören Björkerud, B. Björkerud</i>	542

Co-expression of endothelin converting enzyme-1 (ECE) and endothelin-1 during different stages of atherosclerotic plaque evolution: Implications for the regulation of cell growth and impaired vasoreactivity <i>Christian Ihling, B. Löffler, H.E. Schaefer</i>	545
Pathomorphological and morphometric findings in unstable angina pectoris – Updated critical review <i>Hans Guski, J.E. Fernández-Britto</i>	548
Morphological determinants of plaque destabilization in carotids of patients with stroke <i>Luigi Giusto Spagnoli, A. Mauriello, G. Sangiorgi, E. Bonanno, D.G. Piepgras, R.S. Schwartz, W.D. Edwards, R. Pistolese, D.R. Holmes</i>	552

HEAD AND NECK PATHOLOGY

Salivary Gland Pathology

Introduction <i>Roderick H.W. Simpson</i>	555
Differences and similarities between salivary gland and breast tumours <i>Maria Pia Foschini</i>	555
Acinic cell carcinoma: Theme and variation <i>Alena Skálová</i>	559
Cystic salivary gland lesions <i>Madeleine Pfaltz</i>	563
Myoepithelial tumours <i>Roderick H.W. Simpson</i>	566

Molecular Pathology of Head and Neck Tumor

Molecular pathology of laryngeal squamous cell carcinoma <i>Alfons Nadal</i>	570
Expression of human epidermal fatty acid binding protein in head and neck carcinomas <i>Timothy Richard Helliwell, J. Hughes, A.S. Jones, H. Fujii, Y. Ke</i>	573
Molecular pathology of salivary gland tumours <i>Marianne Hamilton Therkildsen</i>	575
Background of aberrant HLA expression in head and neck squamous cell carcinoma <i>Pieter J. Slootweg, M.G.J. Tilanus</i>	578
Index of Authors	582
