
Table of Contents

Chapter 1

Introduction to Neurons	1
Introduction.....	1
1.1 Types of Neurons.....	1
1.1.1 Motoneurons.....	2
1.1.2 Vertebrate Peripheral Sensory Neurons.....	4
1.1.3 Neuroendocrine Cells.....	5
1.1.4 Interneurons.....	6
1.1.5 Discussion.....	8
1.2 Electrical Properties of Nerve Membrane.....	8
1.2.1 The Source of UM Electrical Parameters.....	11
1.2.2 Decremental Conduction on Dendrites: The Space Constant.....	12
1.2.3 Active Membrane: The Nerve Spike.....	15
1.2.4 Saltatory Conduction on Myelinated Axons.....	17
1.2.5 Discussion.....	21
1.3 Synapses: epsps and ipsp.....	22
1.3.1 Chemical Synapses.....	24
1.3.2 Electrical Synapses.....	28
1.3.3 epsps and ipsp.....	29
1.3.4 Quantal Release of Neurotransmitter.....	33
1.3.5 Discussion.....	34
1.4 Models for the Nerve Action Potential.....	35
1.4.1 The 1952 Hodgkin–Huxley Model for Action Potential Generation.....	36
1.4.2 Properties of the Hodgkin–Huxley Model.....	41
1.4.3 Extended Hodgkin–Huxley Models.....	45
1.4.4 Discussion.....	53
1.5 Chapter Summary.....	53
Problems.....	54

Chapter 2

Selected Examples of Sensory Receptors and Small Receptor Arrays	63
Introduction.....	63
2.1 The Generalized Receptor.....	64
2.1.1 Dynamic Response.....	65
2.1.2 Receptor Nonlinearity.....	66
2.1.3 Receptor Sensitivity.....	66
2.1.4 A Model for Optimum Firing Threshold.....	68
2.1.5 Simulation of a Model Receptor with a Continuously Variable Firing Threshold.....	69

2.1.6	Discussion	74
2.2	Chemoreceptors	74
2.2.1	The Vertebrate Olfactory Chemoreceptor	76
2.2.2	Olfaction in Arthropods	79
2.2.3	Discussion	83
2.3	Mechanoreceptors	83
2.3.1	Insect Trichoid Hairs	84
2.3.2	Insect Campaniform Sensilla	87
2.3.3	Muscle Length Receptors	88
2.3.4	Muscle Force Receptors	98
2.3.5	Statocysts	102
2.3.6	Pacinian Corpuscles	107
2.3.7	Discussion	108
2.4	Magnetoreceptors	110
2.4.1	Behavioral Evidence for Magnetic Sensing	111
2.4.2	The Putative Magnetoreceptor Neurons of <i>Tritonia</i>	113
2.4.3	Models for Magnetoreceptors	113
2.4.4	Discussion	118
2.5	Electroreceptors	119
2.5.1	Ampullary Receptors	119
2.5.2	Weakly Electric Fish and Knollenorgans	122
2.5.3	Discussion	124
2.6	Gravity Sensors of the Cockroach, <i>Arenivaga</i> sp	125
2.6.1	Hartman's Methods	127
2.6.2	Hartman's Results	128
2.6.3	CNS Unit Activity Induced in <i>Arenivaga</i> by Roll and Pitch	132
2.6.4	Willey's Methods	132
2.6.5	Willey's Results	133
2.6.6	A Tentative Model for PCP Unit Narrow Sensitivity	136
2.6.7	Discussion	141
2.7	The Dipteran Haltere	141
2.7.1	The Torsional Vibrating Mass Gyro	142
2.7.2	Discussion	147
2.8	The Simple "Eye" of <i>Mytilus</i>	147
2.8.1	Eye Morphology	148
2.8.2	Physiology of the Eye	150
2.8.3	Discussion	151
2.9	Chapter Summary	152
	Problems	153

Chapter 3

Electronic Models of Neurons: A Historical Perspective	161
Introduction	161
3.1 Necessary Attributes of Small- and Medium-Scale Neural Models	161
3.2 Electronic Neural Models (Neuromimes)	163

3.3 Discussion.....	165
---------------------	-----

Chapter 4

Simulation of the Behavior of Small Assemblies of Neurons	167
Introduction.....	167
4.1 Simulation of Synaptic Loci.....	168
4.1.1 A Linear Model for psp Generation	169
4.1.2 A Model for epsp Production Based on Chemical Kinetics	171
4.1.3 A Model for a Facilitating Synapse.....	173
4.1.4 A Model for an Antifacilitating Synapse	174
4.1.5 Inhibitory Synapses	176
4.1.6 Discussion.....	179
4.2 Dendrites and Local Response Loci	181
4.2.1 The Core-Conductor Transmission Line.....	182
4.2.2 Discussion.....	188
4.3 Integral and Relaxation Pulse Frequency Modulation Models for the Spike Generator Locus (SGL).....	188
4.3.1 IPFM.....	188
4.3.2 RPFM.....	190
4.3.3 Modeling Adaptation	194
4.3.4 Modeling Neural Fatigue.....	195
4.3.5 Discussion	195
4.4 Theoretical Models for Neural Signal Conditioning	196
4.4.1 The T-Neuron.....	197
4.4.2 A Theoretical Band-Pass Structure: The Band Detector	199
4.4.3 Discussion.....	203
4.5 Recurrent Inhibition and Spike Train Pattern Generation	204
4.5.1 The Basic RI System.....	204
4.5.2 Szentagothai's RI Circuit	210
4.5.3 A Simple Burst Generator.....	211
4.5.4 A Ring CPG Model with Negative Feedback	213
4.5.5 Discussion.....	221
4.6 Chapter Summary	221
Problems	222

Chapter 5

Large Arrays of Interacting Receptors: The Compound Eye.....	233
Introduction.....	233
5.1 Anatomy of the Arthropod Compound Eye Visual System	234
5.1.1 Retinula Cells and Rhodopsins	237
5.1.2 The Optic Lobes	240
5.1.3 The Optics of the Compound Eye	244
5.1.4 Discussion.....	249
5.2 Spatial Resolution of the Compound Eye.....	250
5.2.1 The Compound Eye as a Two-Dimensional, Spatial	

Sampling Array.....	252
5.2.2 Calculation of Intensity Contrast	257
5.2.3 "Anomalous Resolution"	263
5.2.4 A Model for Contrast Enhancement in the Insect Visual System	265
5.2.5 A Hypothetical Model for Spatial Resolution Improvement in the Compound Eye by Synthetic Aperture	268
5.2.6 Discussion	279
5.3 Lateral Inhibition in the Eye of <i>Limulus</i>	279
5.3.1 Evidence for Lateral Inhibition	282
5.3.2 Modeling Lateral Inhibition as a Spatial Filter for Objects	283
5.3.3 Discussion	289
5.4 Feature Extraction by the Compound Eye System.....	289
5.4.1 Feature Extraction by Optic Lobe Units of <i>Romalea</i>	291
5.4.2 Feature Extraction by Optic Lobe Units in Flies	295
5.4.3 Eye Movements and Visual Tracking in Flies	298
5.4.4 Feature Extraction by Optic Lobe Units of Crustaceans.....	306
5.4.5 Discussion	310
5.5 Chapter Summary	311
Problems	312

Chapter 6

Large Arrays of Interacting Receptors: The Vertebrate Retina	323
Introduction.....	323
6.1 Review of the Anatomy and Physiology of the Vertebrate Retina.....	323
6.2 Feature Extraction by the Frog's Retina.....	327
6.2.1 Early Work.....	327
6.2.2 Directionally Sensitive Neurons in the Frog's Brain.....	330
6.3 Feature Extraction by Other Vertebrate Retinas	332
6.3.1 The Pigeon Retina	332
6.3.2 The Rabbit Retina.....	335
6.4 Chapter Summary	338

Chapter 7

Theoretical Models of Information Processing and Feature Extraction in Visual Sensory Arrays	339
Introduction.....	339
7.1 Models for Neural Spatial Filters and Feature Extraction in Retinas.....	340
7.1.1 The Logic-Based, Spatiotemporal Filter Approach of Zorkoczy	340
7.1.2 Analog Models for Motion Detection in Insects	345
7.1.3 Continuous, Layered Visual Feature Extraction Filters.....	353
7.1.4 Discussion.....	359
7.2 Models for Neural Matched Filters in Vision.....	360
7.2.1 The Continuous, One-Dimensional, Spatial Matched Filter	360
7.2.2 The Continuous, Two-Dimensional Spatial Matched Filter.....	365

7.2.3	Discussion.....	366
7.3	Models for Parallel Processing: Artificial Neural Networks	367
7.3.1	Rosenblatt's Perceptron	368
7.3.2	Widrow's ADALINE and MADALINE.....	370
7.3.3	Fukushima's Neocognitron.....	372
7.3.4	Discussion.....	376
7.4	Chapter Summary	376
	Problems	377

Chapter 8

Characterization of Neuro-Sensory Systems.....381

Review of Characterization and Identification Means for Linear Systems..... 381

8.1	Parsimonious Models for Neural Connectivity Based on Time	
	Series Analysis of Spike Sequences.....	387
8.1.1	The JPST Diagram	388
8.1.2	Discussion.....	395
8.2	Triggered Correlation Applied to the Auditory System	396
8.2.1	Development for an Expression for the Conditional Expectation, $x_+(\tau)$	398
8.2.2	Optimum Conditions for the Application of the TC Algorithm.....	401
8.2.3	Electronic Model Studies of TC	404
8.2.4	Neurophysiological Studies of Auditory Systems Using TC	406
8.2.5	Summary.....	409
8.3	The White Noise Method of Characterizing Nonlinear Systems.....	410
8.3.1	The Lee-Schetzen Approach to White Noise Analysis.....	412
8.3.2	Practical Aspects of Implementing the Lee-Schetzen White Noise Analysis	414
8.3.3	Applications of the White Noise Method to Neurobiological Systems	415
8.3.4	Discussion.....	422
8.4	Chapter Summary	422

Chapter 9

Software for Simulation of Neural Systems

	Introduction.....	427
9.1	XNBC v8	430
9.2	Neural Network Simulation Language, or NSL	431
9.3	Neuron	432
9.4	GENESIS	434
9.5	Other Neural Simulation Programs.....	434
9.5.1	EONS.....	434
9.5.2	SNNAP.....	435
9.5.3	SONN.....	435
9.5.4	Nodus 3.2.....	435

9.6 Neural Modeling with General, Nonlinear System
Simulation Software436
9.6.1 Simnon437
9.6.2 Simulink437
9.7 Conclusion438
Bibliography and References441
Appendix 1453
Appendix 2459
Appendix 3463
Index467
