

CONTENTS

Introduction	1
1. Grades of Recommendations for Antithrombotic Drugs	2
2. Heparin and Low-Molecular-Weight Heparin	3
3. Oral Anticoagulants (Vitamin K Antagonists)	7
4. Platelet-Active Drugs	14
5. New Anticoagulants	23
6. Heparin-Induced Thrombocytopenia	27
7. Prevention of Venous Thromboembolism	32
8. Treatment of Venous Thromboembolic Disease	40
9. Atrial Fibrillation	50
10. Valvular Heart Disease	54
11. Antithrombotic and Thrombolytic Therapy for Ischemic Stroke	61
12. Antithrombotic Therapy for Coronary Artery Disease	67
13. Intravenous Thrombolysis in Acute Myocardial Infarction	74
14. Antithrombotic Therapy in Patients Undergoing Percutaneous Coronary Intervention	79 83
15. Coronary Artery Bypass Grafts	
16. Antithrombotic Therapy in Peripheral Artery Occlusive Disease	85
17. Antithrombotic Therapy during Pregnancy	90
18. Antithrombotic Therapy in Children	94
<i>Seventh ACCP Conference on Antithrombotic and Thromboembolytic Therapy:</i>	104
<i>Evidence-Based Guidelines</i> chapter listing
