

Contents

1 Introduction, 1

Defining Health, Population, and Population Health, 1

Objectives and Uses of Population Health Studies, 6

The Arts and Sciences in Population Health, 7

Historical Antecedents and Future Prospects, 10

Summary, 12

Case Study 1.1. James Lind and Scurvy among Sailors, 14

Case Study 1.2. John Snow, Cholera, and the Broad Street Pump, 15

Case Study 1.3. Ignaz Semmelweis and Puerperal Fever, 17

Case Study 1.4. Joseph Goldberger on Diet and Pellagra, 18

Guide to Resources, 19

Notes, 21

2 Measuring Health and Disease in Populations (I), 25

Measures of Disease Occurrence, 25

Population Structure and Dynamics, 31

Comparing Health Events in Populations, 44

Demographic and Health Transition, 49

Summary, 54

Case Study 2.1. Cancer Incidence in Five Continents, 54

Case Study 2.2. Contribution of Population Aging to Changes in
Cancer Mortality, 56

Notes, 59

Exercises, 62

3 Measuring Health and Disease in Populations (II), 67

Health Indicators and Indices, 67

Sources and Quality of Health Data, 71

Summary Measures of Population Health, 81

Diagnosis and Classification of Diseases, 82

Accuracy of Screening and Diagnostic Tests, 90
Surveillance and Epidemic Investigations, 96
Cultural Concepts of Health and Disease, 99
Summary, 102
Case Study 3.1. Are Death Certificates Accurate? 103
Case Study 3.2. Diphtheria in Russia—Return of a
Vanquished Foe? 104
Case Study 3.3. Is Schizophrenia Universal? 106
Notes, 107
Exercises, 111

4 Modeling Determinants of Population Health, 115

Models and Pathways of Health, 115
Genetic Susceptibility, 117
Physical Environment, 126
Personal Lifestyles and Behaviors, 135
Social, Cultural, and Economic Factors, 148
A Life Course Approach to Health, 156
A Biopsychosocial Model of Health, 157
Contributions to Global Disease Burden, 158
Summary, 161
Case Study 4.1. The Sickle Cell Trait and Protection from
Malaria, 162
Case Study 4.2. Chernobyl: Aftermath of an Environmental
Catastrophe, 163
Case Study 4.3. Social Medicine in Pre–World War I Germany, 166
Notes, 168
Exercises, 173

5 Assessing Health Risks in Populations, 177

Risks in Population Health, 177
Concepts of Causation, 181
Measures of Association and Effect, 188
Competing Risks, 194
Risk Perception and Communication, 196
Summary, 200
Case Study 5.1. Is British Beef Safe? 201
Case Study 5.2. Do Heart Attacks Prevent Cancer Deaths? 204
Case Study 5.3. Communicating SARS Risk with Numbers, 205
Notes, 207
Exercises, 210

- 6** Designing Population Health Studies, 215
- A Matter of Measurement, 215
 - Types of Research Design, 219
 - Validity and Reliability, 230
 - Error and Bias, 232
 - Confounding and Confounders, 233
 - Interaction or Effect Modification, 236
 - Qualitative Methods, 238
 - Ethical Concerns, 241
 - Summary, 245
 - Case Study 6.1. Age-Period-Cohort Analysis of Traffic Accident Mortality, 247
 - Case Study 6.2. Durkheim's Studies on Suicide, 250
 - Case Study 6.3. The Causal Trail: Cigarette Smoking and Lung Cancer, 252
 - Case Study 6.4. Tracking Heart Disease among World War II Airmen, 256
 - Notes, 257
 - Exercises, 261
- 7** Planning Population Health Interventions, 264
- Promoting Health, Preventing Disease, 264
 - Population Health and the Health Care System, 266
 - Types and Levels of Interventions, 267
 - Criteria for Screening, 272
 - Behavioral Models for Health Promotion, 277
 - Cross-Cultural Considerations, 280
 - A Broader View of Prevention, 281
 - Summary, 284
 - Case Study 7.1. The Global Eradication of Smallpox, 284
 - Case Study 7.2. Is Mammography Good for Women? 288
 - Case Study 7.3. Community-Based Heart Disease Prevention in North Karelia, 290
 - Notes, 293
 - Exercise, 295
- 8** Evaluating Health Programs for Populations, 296
- A Framework for Evaluation, 296
 - Technology Assessment, Diffusion, and Transfer, 299
 - Evaluation Methods, 302

Economic Appraisal, 306

Decision-Making in Health Care, 310

Summary, 312

Case Study 8.1. Nurse-Practitioners in Primary Care, 312

Case Study 8.2. Fluoridation of Community Water Supply
to Prevent Dental Caries, 314

Case Study 8.3. Economic Evaluation of Neonatal
Intensive Care, 317

Case Study 8.4. A Meta-Analysis of Adolescent Smoking
Programs, 319

Notes, 320

Exercise, 321

9 Improving the Health of Populations, 324

Guide to Resources, 327

Bibliography, 331

Answers to Exercises, 365

Index, 381
