

# Contents

Preface (Charlotte Roberts)	iii
<b>Miscellanea</b>	
<i>Jo Robertson</i> The International leprosy Association (ILA) global project on the history of leprosy	3
<i>Anwei Skinses Law</i> The last leprosy communities and the people who call them home	7
<b>Clinical leprosy</b>	
<i>A. Colin McDougall</i> Leprosy worldwide: current status	17
<i>Jal Mehta</i> Social reactions in the past and present of leprosy and the socio-economic rehabilitation of leprosy-cured persons	21
<i>John Lawson Stanford and Cynthia Ann Stanford</i> Leprosy: a correctable model of immunological perturbation	25
<i>Ruth Butlin and M. Shah</i> Differential diagnosis at a leprosy referral clinic in Nepal	39
<i>Ximena Illaramendi, José Augusta Costa Nery, M.M. Vieira and Euzenir Nunes Sarno</i> Acral bone resorption in multibacillary patients. A retrospective study	43
<i>Márcia Jardim, M. Skacel, S. Balassiano, Ana Maria Sales, M. Ferreira and Euzenir Nunes Sarno</i> Progression of nerve damage after leprosy	51
<i>Pedro Torres, J.R. Gomez, V. Gimeno, J.J. Camarena, J.M. Nogueira and J.C. Navarro</i> Hepatitis B and C infections among leprosy patients attending the sanatorium of Fontilles (Spain)	57
<i>Pedro Torres, John Holton, John L. Stanford and Helen D. Donoghue</i> Comparison of PCR primers for detection of <i>M. leprae</i> in skin slit samples	63
<b>Skeletal diagnosis of leprosy</b>	
<i>Keith Manchester</i> Infective bone changes in leprosy	69
<i>Donald J. Ortner</i> Observations on the pathogenesis of skeletal disease in leprosy	73
<i>Della Collins Cook</i> Rhinomaxillary syndrome in the absence of leprosy: an exercise in differential diagnosis	81
<i>Michael Schultz and Charlotte A. Roberts</i> Diagnosis of leprosy in skeletons from an English later Medieval hospital using histological analysis	89
<i>Joël Blondiaux, Jean Dürr, Lahcen Khouchaf and Leslie E. Eisenberg</i> Microscopic study and X-ray analysis of two 5 <sup>th</sup> century cases of leprosy: palaeoepidemiological inferences	105

*Gillian M.M. Crane-Kramer*  
Was there Medieval diagnostic confusion between leprosy and syphilis? An examination of the skeletal evidence

111

## **History and palaeopathology of leprosy worldwide**

*Alexandra Buzhilova*

The geography of leprosy in the Russian Empire: historical evidence for the dissemination of the disease

123

*Pia Bennike*

Vilhelm Møller-Christensen: his work and legacy

135

*Thomas Brander and Niels Lynnerup*

A possible leprosy hospital in Stubbekøbing, Denmark

145

*John Cule*

The stigma of leprosy: its historical origins and consequences with particular reference to the laws of Wales

149

*Milan Dokládál*

The history of leprosy in the territory of the Czech Republic

155

*Michel F. Lechat*

The palaeoepidemiology of leprosy: an overview

157

*Mary E. Lewis*

Infant and childhood leprosy: present and past

163

*Piers D. Mitchell*

The myth of the spread of leprosy with the crusades

171

*Joseph E. Molto*

Leprosy in Roman period skeletons from Kellis 2, Dakhleh, Egypt

179

*Eileen Murphy and Keith Manchester*

Evidence for leprosy in Medieval Ireland

193

*Shanthakumar Thomas Oommen*

The history of the treatment of leprosy and the use of hydnocarpus oil

201

*György Pálfi, Albert Zink, Christian Haas, Antónia Marcsik, Olivier Dutour and Andreas G. Nerlich*

Historical and palaeopathological evidence of leprosy in Hungary

205

*Charlotte A. Roberts*

The antiquity of leprosy in Britain: the skeletal evidence

213

*Eugen Strouhal, Ladislava Horáčková, Jakub Likovsky, Lenka Vargová and Jan Daneš*

Traces of leprosy from the Czech kingdom

223

*Diane L. Trembly*

Perspectives on the history of leprosy in the Pacific

233

*Heikki S. Vuorinen*

History of leprosy in Finland

239

<i>Alicia K. Wilbur, Jane E. Buikstra and Christopher Stojanowski</i> Mycobacterial disease in North America: an epidemiological test of Chaussinand's cross-immunity hypothesis	247
<i>Joe Zias</i> New evidence for the history of leprosy in the Ancient Near East: an overview	259
<b>Molecular diagnosis of leprosy in skeletal material</b>	
<i>Helen D. Donoghue, Judyta Gladykowska-Rzeczycka, Antónia Marcsik, John Holton and Mark Spigelman</i> <i>Mycobacterium leprae</i> in archaeological samples	271
<i>Christian J. Haas, Albert Zink, U. Szeimies and Andreas G. Nerlich</i> Molecular evidence of <i>Mycobacterium leprae</i> in historic bone samples from South Germany	287
<i>Mark Spigelman and Helen D. Donoghue</i> The study of ancient DNA answers a palaeopathological question	293
<b>Index</b>	297
