Contributors	ix
Preface	xi

## 1

---

### **Evolution and Development of Distinct Cell Lineages Derived from Somites**

*Beate Brand-Saberi and Bodo Christ*

I. Introduction	2
II. Metamerism	2
III. Somite Research Past and Present	6
IV. Resegmentation	14
V. The Muscle Lineage	26
VI. Further Somitic Derivatives: Dermis, Smooth Muscle, and Angioblasts	32
VII. Evolution of Metamerism in Vertebrates	34
References	40

## 2

---

### **Duality of Molecular Signaling Involved in Vertebral Chondrogenesis**

*Anne-Hélène Monsoro-Burq and Nicole Le Douarin*

I. Origin of the Vertebrae and Intervertebral Disks	43
II. Gene Expression in the Developing Somitic Cells	44
III. The Dorsal Neural Tube Grafted Ectopically Promotes Dorsal Cartilage Formation in a Subectodermal Position	51
IV. Ventral Axial Structures Prevent Subectodermal Cartilage Formation	54
V. Molecular Pathways Leading to Chondrogenesis in the Vertebra	57
VI. Conclusions: A Novel Model for Vertebra Development	65
References	70

**3****Sclerotome Induction and Differentiation***Jennifer L. Dockter*

I. Introduction	77
II. Induction: Definitions	78
III. Anatomical and Morphological Description of Sclerotome Development	79
IV. Genetics	83
V. Nonmolecular Approaches	85
VI. The Molecular Approach	98
VII. <i>Shh</i> , cAMP, and Sclerotome	106
VIII. Issues Concerning <i>Shh</i> as the Sclerotome Inducer	106
IX. Initiation of the Sclerotome	108
X. <i>Shh</i> , <i>Noggin</i> , and Somite Chondrogenesis	109
XI. Bone Morphogenetic Proteins and Sclerotome Development	110
XII. Determination of the Sclerotome	110
XIII. Epithelial–Mesenchymal Transitions and Sclerotome Formation	113
XIV. Dorsal–Ventral Patterning of the Somite	113
XV. Interactions between the Somitic Components	114
XVI. Discussion	115
XVII. Summary	117
References	118

**4****Genetics of Muscle Determination and Development***Hans-Henning Arnold and Thomas Braun*

I. Introduction	129
II. The Origin of Skeletal Muscles in Vertebrate Organisms	130
III. The MyoD Family of Muscle-Specific Transcription Factors	131
IV. Development of the Limb Musculature	151
V. Structures Surrounding the Somites and Signals Emanating from Them Affect Myogenesis	153
VI. The Myogenic Potential of Mesoderm: Induction or Derepression?	155
References	157

**5****Multiple Tissue Interactions and Signal Transduction Pathways Control Somite Myogenesis***Anne-Gaëlle Borycki and Charles P. Emerson, Jr.*

I. Introduction	166
II. Mesodermal Origins of Skeletal Muscle in Vertebrate Embryos	167
III. Regulatory Genes That Control Somite Myogenesis	170

IV. Tissue Interactions That Control Somite Myogenesis	174
V. Signaling Molecules and Transduction Pathways Controlling Myogenesis in Somites	185
VI. Overview and Future Perspectives	207
References	212

## 6

---

### **The Birth of Muscle Progenitor Cells in the Mouse: Spatiotemporal Considerations**

*Shahragim Tajbakhsh and Margaret Buckingham*

I. Introduction	225
II. Origins of Skeletal Muscle in Vertebrates	226
III. Domains of the Dermomyotome	227
IV. Differences between Somites at Different Axial Levels	235
V. Myogenic Regulatory Factor Expression Patterns in the Somite and Myotome Heterogeneity	237
VI. Extrinsic Factors Govern Somite Differentiation and the Activation of Myf5 and MyoD	242
VII. Do Myf5 and MyoD Define Different Subpopulations of Muscle Cells?	246
VIII. The Roles of Myf5 and MyoD in Muscle Progenitor Cell Determination	250
IX. Conclusions	260
References	261

## 7

---

### **Mouse–Chick Chimera: An Experimental System for Study of Somite Development**

*Josiane Fontaine-Péru*

I. Introduction	269
II. Technical Aspects	271
III. Somitic Lineage into Somite Chimera	274
IV. Epaxial Myogenic Lineage into Neural Tube Chimera	289
V. What Is the Benefit of the Somite–Neural Tube Chimera?	292
VI. Concluding Remarks	294
References	296

## 8

---

### **Transcriptional Regulation during Somitogenesis**

*Dennis Summerbell and Peter W. J. Rigby*

I. Introduction	301
I. Regulation of <i>Hox</i> Gene Expression	302
III. Control of Myogenic Regulatory Factor Gene Expression	306

IV. Roles of Non-MRF Transcription Factors in Muscle Development	311
V. The Identification of Novel Somite-Specific Transcripts	312
References	315

## 9

---

### **Determination and Morphogenesis in Myogenic Progenitor Cells: An Experimental Embryological Approach**

*Charles P. Ordahl, Brian A. Williams, and Wilfred Denetclaw*

I. Introduction	320
II. The Diversity and Location of Muscle Precursor Cells in the Vertebrate Embryo	325
III. When Do Myotome Precursor Cells Become Determined?	344
IV. Gene Expression and Determination in Migratory Limb Muscle Precursor Cells	350
V. A Cellular and Molecular Framework for Understanding Myogenic Tissue Development	353
VI. Appendix: Key Word Guide	360
References	361
