| ACKNOWLEDGEMENTS  | III      |
| TABLE OF CONTENTS   | IV       |
| ABBREVIATIONS   | VII      |
| ABSTRACT  | VIII     |
| KURZFASSUNG   | X        |
| <b>1 INTRODUCTION</b>   | <b>1</b> |
| 1.1 Kinematics of rear-end impacts . . . . .                            | 3        |
| 1.2 Recent developments in whiplash-related fields of interest. . . . . | 4        |
| 1.3 Aim of this study . . . . .   | 7        |
| <b>2 SOFT TISSUE NECK INJURIES</b>                                      | <b>9</b> |
| 2.1 Functional anatomy of the cervical spine . . . . .                  | 9        |
| 2.2 Potential injury mechanisms . . . . .                               | 13       |
| 2.2.1 Pressure hypothesis . . . . .                                     | 14       |
| 2.2.1.1 Animal experiments. . . . .                                     | 15       |
| 2.2.1.2 PMHS experiments . . . . .                                      | 18       |

|          |   |           |
|----------|---|-----------|
| 2.2.1.3  | Experiments using a fluid filled tube .....       | 19        |
| 2.2.1.4  | Cellular injury models .....                      | 21        |
| <b>3</b> | <b>INJURY SCALES AND INJURY CRITERIA</b>          | <b>23</b> |
| 3.1      | Injury scales .....                               | 24        |
| 3.2      | Neck injury criteria .....                        | 25        |
| 3.2.1    | NIC .....   | 26        |
| 3.2.2    | $N_{ij}$ .....                                    | 26        |
| 3.2.3    | IV-NIC .....                                      | 28        |
| 3.2.4    | $N_{km}$ .....                                    | 29        |
| <b>4</b> | <b>MATHEMATICAL NECK MODELLING</b>                | <b>34</b> |
| 4.1      | Multi body systems .....                          | 34        |
| 4.1.1    | Neck modelling using multi body models .....      | 36        |
| 4.2      | Finite element models .....                       | 37        |
| 4.2.1    | Finite element models of the cervical spine ..... | 42        |
| 4.2.2    | FE versus MBS models .....                        | 44        |
| <b>5</b> | <b>DEVELOPMENT OF A FINITE ELEMENT MODEL</b>      | <b>46</b> |
| 5.1      | Geometry and Materials .....                      | 46        |
| 5.1.1    | Muscle model .....                                | 49        |
| 5.1.2    | Venous vessel .....                               | 54        |
| 5.2      | Validation .....                                  | 56        |
| 5.3      | Calculation Scheme .....                          | 58        |
| <b>6</b> | <b>RESULTS AND DISCUSSION</b>                     | <b>62</b> |
| 6.1      | Results .....                                     | 62        |
| 6.2      | Discussion .....                                  | 68        |

|                                  |           |
|----------------------------------|-----------|
| <b>7 CONCLUSIONS AND OUTLOOK</b> | <b>72</b> |
| APPENDIX                         | 74        |
| REFERENCE                        | 75        |
