<b>Introduction</b>	<b>ix</b>
<b>1 Epidemiology and histology</b>	<b>1</b>
<b>2 Prognosis</b>	<b>5</b>
<b>3 Genetics</b>	<b>7</b>
Family studies	7
Census studies	7
Twin studies	7
Human leukocyte antigens	7
Chromosome loci and possible genes	9
<b>4 Etiology</b>	<b>11</b>
Environmental triggers	11
Physical trauma	11
Infections	11
Stress	12
Drugs	12
Hypocalcemia	12
Alcohol	13
Climate	13
<b>5 Pathogenesis</b>	<b>15</b>
Immunopathology	15
Antigen-presenting cells	16
Cytokines	16
Nature of the antigen	18
Streptococcal exotoxins	18

Cellular streptococcal proteins	18
Evidence for M protein being the antigen in psoriasis	20
Evidence for other cell wall and membrane peptides being the antigen in psoriasis	20
Are the effector T cells in psoriasis CD4 or CD8?	21
How do the T cells enter the skin?	21
The innate immune system	23
<b>6 Clinical features</b>	<b>25</b>
Age of onset	25
Sex predilection	25
Morphology	25
<b>7 Sites and clinical patterns</b>	<b>33</b>
Plaque psoriasis	33
Guttate psoriasis	37
Chronic plaque combined with guttate psoriasis	39
Koebner phenomenon	40
Erythrodermic psoriasis	40
Pustular psoriasis	42
<i>Generalized pustular psoriasis</i>	42
<i>Localized pustular psoriasis</i>	44
Acral psoriasis	44
Seborrheic psoriasis	46
Childhood psoriasis	46
Diaper 'psoriasis'	49
Linear psoriasis	51
Psoriasis at specific sites	51
<i>Scalp</i>	51
<i>Beard and pubic area</i>	52
<i>Palms and soles</i>	53
<i>Flexures and intertriginous areas</i>	57
<i>Genitalia</i>	57
<i>Mucous membranes</i>	59
<i>Nails</i>	61
<b>8 Differential diagnosis</b>	<b>67</b>
Chronic plaque psoriasis	67
Guttate psoriasis	67
Erythrodermic psoriasis	67
Generalized pustular psoriasis	67
Localized pustular psoriasis	68

Acral psoriasis	68
Seborrheic psoriasis	68
Childhood psoriasis	68
Scalp psoriasis	68
Psoriasis of the palms and soles	68
Flexural psoriasis	69
Nails	69
Linear psoriasis	69
<b>9 Psoriatic arthropathy</b>	<b>71</b>
Epidemiology	71
Genetics	71
Clinical features in peripheral arthropathy	72
Spinal arthritis	72
Relationship between skin lesions and arthropathy	73
Relationship between nail involvement and arthropathy	73
Extra-articular features	73
Treatment	73
Prognosis	74
<b>10 Treatment</b>	<b>75</b>
Topical drugs	75
<i>Topical corticosteroids</i>	75
<i>Coal tar preparations</i>	78
<i>Dithranol</i>	79
<i>Vitamin D analogues</i>	80
<i>Retinoids</i>	80
<i>Topical calcineurin inhibitors</i>	80
Ultraviolet light	81
<i>Phototherapy</i>	81
<i>Laser</i>	82
<i>Photochemotherapy (PUVA)</i>	82
<i>Topical PUVA</i>	83
<i>Climatic therapy</i>	84
Oral therapy	84
<i>Methotrexate</i>	84
<i>Acitretin</i>	85
<i>Cyclosporin</i>	85
<i>Rotation of systemic drugs</i>	86
<i>Other systemic drugs</i>	87

Combined treatments	87
<i>Topical corticosteroids and vitamin D analogues</i>	87
<i>Coal tar and ultraviolet light</i>	87
<i>Acitretin and photochemotherapy</i>	87
<i>Systemic drugs and topical treatment</i>	87
Biologicals	87
<i>Recombinant cytokines</i>	87
<i>Anticytokines</i>	88
<i>Infliximab</i>	88
<i>Etanercept</i>	88
<i>Alfacept</i>	88
<i>Efalizumab</i>	88
<i>General comment on biologicals</i>	88
Future treatments	89
