Contents of Volume 64	xii
Contributors	xvii
Preface to the Third Edition	xxi
Preface to the Second Edition	xxv
Preface to the First Edition	xxix

## **PART I Principles of Cytometry and General Methods**

### **1. A Brief History of Flow Cytometry and Sorting**

*Myron R. Melamed*

I. Introduction	3
II. Instrumentation	4
III. Applications	9
References	13

### **2. Principles of Flow Cytometry: An Overview**

*Alice L. Givan*

I. Introduction	19
II. The Illumination of a Particle	20
III. Fluidics: Centering Particles in the Illuminating Beam	26
IV. Collection of Light Signals from Particles	33
V. From Light Signals to a Data File	37
VI. From Data to Information	41
VII. Sorting	44
VIII. Conclusions	48
References	48

### **3. Laser Scanning Cytometry**

*Louis A. Kamentsky*

I. Introduction	51
II. Background	52
III. Description of the Instrument	55
IV. The Utility and Operational Characteristics of Some Laser Scanning Cytometry List Mode Features	62
V. Utility of Solid Phase Cytometry for Cell Preparation	80

VI. Future Directions	82
References	84

#### 4. Principles of Confocal Microscopy

*J. Paul Robinson*

I. Brief History of Microscope Development	89
II. Development of Confocal Microscopy	90
III. Image Formation in Confocal Microscopy	92
IV. Useful Fluorescent Probes for Confocal Microscopy	96
V. Applications of Confocal Microscopy	100
VI. Conclusions	105
References	105

#### 5. Optical Measurements in Cytometry: Light Scattering, Extinction, Absorption, and Fluorescence

*Howard M. Shapiro*

I. Introduction	108
II. Signal Processing Tasks in Flow Cytometry: An Overview	108
III. The Optical Signal: Interaction of Light with Cells	110
IV. Detection: Converting Optical Signals to Current	118
V. Electronics: Converting Current to Voltage	123
VI. Fluorescence Compensation and Logarithmic Amplification	124
VII. Peak Detection, Integration, and Pulse Width Measurement; Triggering	127
VIII. Measurement Sensitivity: Changing Concepts and the Bottom Line	127
References	129

#### 6. Flow Cytometric Fluorescence Lifetime Measurements

*Harry A. Crissman and John A. Steinkamp*

I. Introduction	131
II. Applications of the Technology	134
III. Cell Preparation and Staining	137
IV. Fluorescence Lifetime Flow Cytometry Instrumentation	138
V. Results	141
VI. Critical Aspects of the Technology	144
VII. Future Directions	146
References	147

#### 7. Principles of Data Acquisition and Display

*Howard M. Shapiro*

I. Introduction	149
II. Pulse Characterization Using Analog and Hybrid Circuits	150
III. Analog Data Display	154

IV. Analog-to-Digital Conversion	155
V. Pulse Characterization by Digital Signal Processing	159
VI. Data Storage and Display with Digital Computers	161
References	167
<b>8. Time as a Flow Cytometric Parameter</b>	
<i>Larry Seamer and Larry A. Sklar</i>	
I. Introduction	169
II. Historical Overview	171
III. Sample Mixing and Delivery	171
IV. Data Analysis	175
V. Applications	179
VI. Conclusions	181
References	181
<b>9. Protein Labeling with Fluorescent Probes</b>	
<i>Kevin L. Holmes and Larry M. Lantz</i>	
I. Introduction	185
II. Labeling of Proteins with Organic Fluorescent Dyes	186
III. Labeling of Proteins with Phycobiliproteins	194
IV. Conclusion	202
References	202

## **PART II Cell Preparation**

<b>10. Preparation of Cells from Blood</b>	
<i>J. Philip McCoy, Jr.</i>	
I. Introduction	207
II. Collection, Transport, and Storage of Blood	208
III. Fixation and Preservation	210
IV. Separation of Erythrocytes from Leukocytes	210
V. Assessment of Cell Viability	211
VI. Staining	212
VII. Summary	212
Appendix 1	213
Appendix 2	214
Appendix 3	214
References	214
<b>11. Cell Preparation for the Identification of Leukocytes</b>	
<i>Carleton C. Stewart and Sigrid J. Stewart</i>	
I. Introduction	218
II. Antibodies	219
III. Tandem Fluorochromes	234

IV. Cell Preparation and Staining Procedures	237
V. Titering Antibodies	244
VI. Solutions and Reagents	249
References	250

## 12. Strategies for Cell Permeabilization and Fixation in Detecting Surface and Intracellular Antigens

*Steven K. Koester and Wade E. Bolton*

I. Introduction	253
II. Application	254
III. Materials and Methods	262
IV. Concluding Remarks	266
References	266

## Standardization, Quality Assurance

### 13. Stoichiometry of Immunocytochemical Staining Reactions

*James W. Jacobberger*

I. Introduction	271
II. Structure of Immunoglobulin G	273
III. Cell Structure	274
IV. Permeabilized Cell Structure	274
V. Antibody–Antigen Reactions	281
VI. Multiparametric Analyses	292
VII. Summary	294
References	295

### 14. Standardization and Quantitation in Flow Cytometry

*Robert A. Hoffman*

I. Introduction	300
II. General Issues	300
III. Performance Characteristics—Dynamic Range, Linearity, Resolution, and Sensitivity	302
IV. Standardization and Calibration of Common Cytometry Measurements	312
V. Examples of Applications Using Calibrated Measurements	330
VI. Issues in Quantitation of Fluorochromes and Other Molecules	332
References	334

## Cell Proliferation

### 15. Methods to Identify Mitotic Cells by Flow Cytometry

*Gloria Juan, Frank Traganos, and Zbigniew Darzynkiewicz*

I. Introduction	343
II. Materials	345

III. Cell Preparation and Staining	345
IV. Instruments	346
V. Critical Aspects of the Procedure	346
VI. Results and Discussion	347
VII. Comparison of Anti-H3-P Monoclonal Antibody with Other Markers of Mitotic Cells	350
References	353
<b>16. Cell Cycle Kinetics Estimated by Analysis of Bromodeoxyuridine Incorporation</b>	
<i>Nicholas H. A. Terry and R. Allen White</i>	
I. Introduction	355
II. Applications	357
III. Materials	358
IV. Methods	360
V. Critical Aspects of the Procedure	369
References	372
<b>17. Flow Cytometric Analysis of Cell Division History Using Dilution of Carboxyfluorescein Diacetate Succinimidyl Ester, a Stably Integrated Fluorescent Probe</b>	
<i>A. Bruce Lyons, Jhagvaral Hasbold, and Philip D. Hodgkin</i>	
I. Introduction and Background	376
II. Reagents and Solutions	378
III. Preparation and Labeling of Cells	378
IV. Gathering of Information Concurrent with Division	381
V. Analysis of Data	386
VI. Application of Carboxyfluorescein Diacetate Succinimidyl Ester to <i>in Vitro</i> Culture of Lymphocytes	390
VII. Monitoring Lymphocyte Responses <i>in Vivo</i>	392
VIII. Antigen Receptor Transgenic Models	395
References	397
<b>18. Antibodies against the Ki-67 Protein: Assessment of the Growth Fraction and Tools for Cell Cycle Analysis</b>	
<i>Elmar Endl, Christiane Hollmann, and Johannes Gerdes</i>	
I. Introduction	399
II. Application	401
III. Materials and Methods	402
IV. Critical Aspects	408
V. Controls and Standards	409
VI. Examples of Results	410
References	414

## 19. Detection of Proliferating Cell Nuclear Antigen

*Jørgen K. Larsen, Göran Landberg, and Göran Roos*

I. Introduction	419
II. Molecular Biology of Proliferating Cell Nuclear Antigen	420
III. Methods for Immunochemical Detection and Quantification of Proliferating Cell Nuclear Antigen	421
IV. Results of Cytometric Analysis of Proliferating Cell Nuclear Antigen Expression	423
V. Applications in Toxicology, Pathology, and Oncology	426
References	428

## 20. Lymphocyte Activation Associated Antigens

*Andrea Fattorossi, Alessandra Battaglia, and Cristiano Ferlini*

I. Introduction	433
II. Methodological Aspects	437
III. To Flow or Not to Flow for Assessing Lymphocyte Activation/ Proliferation? And, If Yes, How Reliable Is Immunophenotyping?	447
IV. Additional Approaches	453
V. Concluding Remarks	455
References	457

# Cell Death/Apoptosis

## 21. Analysis of Mitochondria during Cell Death

*Andrea Cossarizza and Stefano Salvioli*

I. Introduction	467
II. Scientific Background	468
III. Apoptosis and Mitochondria	470
IV. Method	472
V. Results	473
VI. Pitfalls and Misinterpretation of the Data	476
VII. Comparison with Other Methods	477
VIII. Reviews of the Applications	478
IX. Biological and Biomedical Information	479
X. Future Directions	480
References	481

## 22. Cytometry of Caspases

*Steven K. Koester and Wade E. Bolton*

I. Introduction	487
II. Materials and Methods: Caspase Peptide Inhibitors and Methods to Monitor Responses	490
III. Results and Discussion	497
References	502

## 23. Analysis of Apoptosis in Plant Cells

*Iona E. Weir*

I. Introduction	505
II. Apoptosis in Plants	506
III. Problems Associated with Analyzing Plant Cells Using Flow Cytometry	509
IV. Morphological Changes of Plant Cells	512
V. Physiological Changes during Apoptosis	520
VI. Conclusion	524
References	524

## 24. Difficulties and Pitfalls in Analysis of Apoptosis

*Zbigniew Darzynkiewicz, Elżbieta Bedner, and Frank Traganos*

I. Introduction	527
II. Apoptotic Index May Not Be Correlated with Incidence of Cell Death	529
III. Difficulties in Estimating Frequency of Apoptosis by Analysis of DNA Fragmentation	531
IV. The Lack of Evidence Is Not Evidence for the Lack of Apoptosis	532
V. Misclassification of Apoptotic Bodies or Nuclear Fragments as Single Apoptotic Cells	533
VI. Apoptosis versus Necrosis versus “Necrotic Stage“ of Apoptosis	535
VII. Selective Loss of Apoptotic Cells during Sample Preparation	537
VIII. Live Cells Engulfing Apoptotic Bodies Masquerade as Apoptotic Cells	538
IX. The Problems with Commercial Kits and Reagents	538
X. Cell Morphology Is Still the Gold Standard for Identification of Apoptotic Cells	539
XI. Laser Scanning Cytometry: Have Your Cake and Eat It Too	541
References	544

## PART VI Cell–Cell, Cell–Environment Interactions

### 25. Analysis of Cell Migration

*Nicole Dodge Zantek and Michael S. Kinch*

I. Introduction and Application	549
II. General Strategies to Measure Cell Migration	550
References	558

### 26. Three-Dimensional Extracellular Matrix Substrates for Cell Culture

*Sherry L. Voytik-Harbin*

I. Introduction	561
II. Application	563
III. Methods	565
IV. Application of Intestinal Submucosa as a Three-Dimensional Extracellular Matrix Substrate	572
V. Summary	576
References	578

<b>27. Three-Dimensional Imaging of Extracellular Matrix and Extracellular Matrix–Cell Interactions</b>	
<i>Sherry L. Voytik-Harbin, Bartłomiej Rajwa, and J. Paul Robinson</i>	
I. Introduction	583
II. Three-Dimensional Imaging of Extracellular Matrix and Extracellular Matrix–Cell Interactions: Current Techniques and Their Limitations	584
III. Three-Dimensional Microscopy of Living Systems: Extracellular Matrix and Extracellular Matrix–Cell Interactions	587
IV. Summary	593
References	596
<b>28. Cytometric Analysis of Cell Contact and Adhesion</b>	
<i>Michael S. Kinch</i>	
I. Introduction and Application	599
II. General Strategies to Measure Cell–Cell Adhesions	600
III. General Strategies to Measure Cell–Ligand Adhesions	606
IV. Specificity of Cell Adhesion	608
V. Optimization of Experimental Conditions	609
References	611
<b>29. Invadopodia: Unique Methods for Measurement of Extracellular Matrix Degradation <i>in Vitro</i></b>	
<i>Emma T. Bowden, Peter J. Coopman, and Susette C. Mueller</i>	
I. Introduction	613
II. Invadopodia Activity, a Measurement for Localized Membrane Degradation	615
III. Fluorescent Activated Cell Sorting—Phagocytosis, a Measurement for Internalization of Proteolyzed Extracellular Matrix	619
IV. Protocols	623
References	626
Index	629
Volumes in Series	645

## **Contents of Volume 64 Cytometry, Third Edition, Part B**

### **PART VII Cytogenetics and Molecular Genetics**

#### **30. Sorting of Plant Chromosomes**

*Jaroslav Doležel, Martin A. Lysák, Marie Kubaláková, Hana Šimková, Jiří Macas, and Sergio Lucretti*

**31. Quantitative DNA Fiber Mapping**

*Heinz-Ulli G. Weier*

**32. Primed *in Situ* Labeling**

*Johnny Hindkjaer, Lars Bolund, and Steen Kolvraa*

**33. Measurements of Telomere Length on Individual Chromosomes by Image Cytometry**

*Steven S. S. Poon and Peter M. Lansdorp*

**34. Detection of Chromosome Translocation Products in Single Interphase Cell Nuclei**

*Jingly Fung, Santiago Munné, and Heinz-Ulli G. Weier*

**PART VIII Cell Function and Differentiation**

**35. Analysis of Mitochondria by Flow Cytometry**

*Martin Poot and Robert H. Pierce*

**36. Analysis of RNA Synthesis by Cytometry**

*Peter Østrup Jensen, Jacob Larsen, and Jørgen K. Larsen*

**37. Flow Cytometry of Erythropoiesis in Culture: Bivariate Profiles of Fetal and Adult Hemoglobin**

*Ralph M. Böhmer*

**38. Flow Cytometric Analysis of Human Hemopoietic Progenitor Differentiation by Assessing Cell Division Rate and Phenotypic Profile**

*Luca Pierelli, Giovanni Scambia, and Andrea Fattorossi*

**PART IX Experimental Oncology**

**39. Cytometry of Antitumor Drug-Intracellular Target Interactions**

*Paul J. Smith and Marie Wiltshire*

**40. Monitoring of Cellular Resistance to Cancer Chemotherapy: Drug Retention and Efflux**

*Awtar Krishan*

41. Resistance of Tumor Cells to Chemo- and Radiotherapy Modulated by the Three-Dimensional Architecture of Solid Tumors and Spheroids  
*Ralph E. Durand and Peggy L. Olive*
42. Analysis of DNA Damage in Individual Cells  
*Peggy L. Olive, Ralph E. Durand, Judit P. Banáth, and Peter J. Johnston*
43. Cytometric Methods to Analyze Ionizing-Radiation Effects  
*William D. Wright, Isabelle Lagroye, Peng Zhang, Robert S. Malyapa, and Joseph L. Roti Roti*
44. Cytometric Methods to Analyze Thermal Effects  
*Robert P. VanderWaal, Ryuji Higashikubo, Mai Xu, Douglas R. Spitz, William D. Wright, and Joseph L. Roti Roti*

## **PART X Clinical Oncology**

45. Multiparameter Data Acquisition and Analysis of Leukocytes by Flow Cytometry  
*Carleton C. Stewart and Sigrid J. Stewart*
46. Immunophenotyping of Hematological Malignancies by Laser Scanning Cytometry  
*Richard J. Clatch*
47. Immunophenotyping of Acute Leukemia: Utility of CD45 for Blast Cell Identification  
*J-P. Vial and F. Lacombe*
48. Cell Proliferation Markers in Human Solid Tumors: Assessing Their Impact in Clinical Oncology  
*Maria Grazia Daidone, Aurora Costa, and Rosella Silvestrini*
49. Detection of Minimal Residual Disease  
*Andrzej Deptala and Sharon P. Mayer*
50. Analysis of Human Tumors by Laser Scanning Cytometry  
*Wojciech Gorczyca, Andrzej Deptala, Elżbieta Bedner, Xun Li, Myron R. Melamed, and Zbigniew Darzynkiewicz*

51. Laser Cytometry of Human Tissues and Tumors: Proliferation and Therapeutic Applications  
*David A. Rew*
52. Prediction and Precise Diagnosis of Diseases by Data Pattern Analysis in Multiparameter Flow Cytometry: Melanoma, Juvenile Asthma, and Human Immunodeficiency Virus Infection  
*Günter Valet, Hanna Kahle, Friedrich Otto, Edeltraut Bräutigam, and Luc Kestens*

## **PART XI Microorganisms and Infectious Diseases**

53. Flow Cytometric Analysis of Microorganisms  
*S. A. Sincock and J. Paul Robinson*
54. Staining and Measurement of DNA in Bacteria  
*Harald B. Steen*
55. Flow Cytometric Monitoring of Bacterial Susceptibility to Antibiotics  
*Mette Walberg and Harald B. Steen*
56. Flow Cytometry for Evaluation and Investigation of Human Immunodeficiency Virus Infection  
*Thomas W. Mc Closkey*
