Neurovascular unit

G. J. del Zoppo, T. Mabuchi, J. A. Koziol, S. Fukuda, L. L. Eggleston, Jr.

Vascular and non-vascular matrix (ECM) degradation 3

S.-R. Lee, K. Tsuji, X. Wang, E. Tejima, M. M. Ning, E. H. Lo

Matrix metalloproteinases, tissue plasminogen activator and reperfusion injury in ischemic stroke 21

C. M. Maier, L. Hsieh, P. H. Chan

Matrix metalloproteinase-9 in stroke and neurodegenerative disorders 27

D.-I. Yang, J.-T. Lee, K.J. Yin, C.-H. Yeh, J. Xu, C. Y. Hsu

Molecular mechanism of amyloid peptide-induced cerebral endothelial cell apoptosis 41

Angiogenesis

K.-A. Hossmann, H.-J. Busch, E. Schneeloch, G. Mies, J. R. Buschmann

Arteriogenesis: a new concept for the prevention of impending stroke 81

*T. Cheng, H. Guo, D. Liu, J. A. Fernandez,
J. H. Griffin, C. Benesch, B. V. Zlokovic*
Neurovascular protection by activated protein C
..... 51

K. J. Becker
The adaptive immune response in cerebral
ischemic injury 59

*B. Hufnagel, M. Dworak, M. Soufi, Z. Mester,
Y. Zhu, J. R. Schaefer, S. Klumpp, J. Krieglstein*
Does activation of protein phosphatase type 2C
by unsaturated fatty acids in endothelial cells
play a role in atherosclerosis? 71

*S. Valable, E. Pacary, V. Berezowski, J. Brill-
laut, R. Cecchelli, D. Divoux, E. T. Mac Kenzie,
M. Bernaudin, S. Roussel, E. Petit*
Contribution of angiogenic factors (VEGF and
Ang-1) in neuroprotection and vascular remod-
elling after cerebral ischemia 91

Mechanisms of ischemic damage

P. Nicotera

Molecular switches in neuronal cell death 107

V. L. Dawson, T. M. Dawson

Nuclear-mitochondrial conversations in PARP-1 dependent neurotoxicity 113

K. Blomgren, C. Zhu, H. Hagberg

Caspase-independent, AIF-mediated cell death after hypoxia-ischemia in the developing brain 121

N. Plesnila, C. Zhu, E. Wagner, K. Blomgren, C. Culmsee

Role of apoptosis-inducing factor for neuronal cell death after focal cerebral ischemia .. 133

T. Hayashi, P. H. Chan, K. Abe

Oxidative injury in the ER in stroke 143

T. P. Obrenovitch, M. Wang, J. Urenjak, M. J. Butler, J. P. Dreier

The role(s) of nitric oxide during cortical spreading depression 157

B. Schatlo, J. Kleeberg, U. Dirnagl, J. P. Dreier

The combination of endothelin-1 and elevated baseline K⁺ does not induce cortical spreading ischaemia in rats 167

J. Anrather, C. Iadecola, T. Kawano, A. Kunz, E. Ross, G. Wang, P. Zhou

Mechanisms of cyclooxygenase-2 mediated neurotoxicity 173

K. R. Wagner, S. Beiler, C. Dean, C. Hall, J. Knight, B. A. Packard, A. G. Smulian, M. J. Linke, G. M. de Courten-Myers

NF-kappaB activation and pro-inflammatory cytokine gene upregulation in white matter following porcine intracerebral hemorrhage 185

R. Ran, A. Lu, Y. Tang, H. Xu, A. C. Rigby, F. R. Sharp

Hsp70 promotes TNF-mediated apoptosis whereas Hsp70 prevents mitochondrial-mediated apoptosis: implications for focal and global ischemia 195

G. A. Rosenberg, M. Grossetete, R. Sood, S. Mun-Bryce

Mechanism in intracerebral hemorrhage: MRI, models and MMPs 205

S. Park, C. Zhou, J. Tang, A. Colohan, J. H. Zhang

Apoptosis, neurovascular protection, and subarachnoid hemorrhage 217

M. Bernaudin, Y. Tang, E. T. MacKenzie, P. Schumann-Bard, E. Petit, F. R. Sharp

Hypoxic-inducible factors and cerebral ischemia 229

C.-Y. Kuan, A. J. Schloemer, A. Lu, K. A. Burns, F. R. Sharp, P. Rakic

Apoptotic neurons pass the G1/S-phase checkpoints following cerebral ischemia-hypoxia 245

M. Wittmann, C. P. Bengtson, H. Bading

Extrasynaptic NMDA receptors: mediators of excitotoxic cell death 253

Yu. Chen, C. Hamelink, D. Vaudry, C. Xiang, M. Brownstein, M. Chen, Yo. Chen, J. Hallenbeck, L. E. Eiden

Expression profiling of cerebrocortical transcripts during middle cerebral artery occlusion and treatment with pituitary adenylate cyclase activating polypeptide (PACAP) in the mouse 267

A. M. Planas, R. Gorina, C. Justicia, N. Montoya, V. Petegnief, A. Chamorro

The cellular response to STAT signalling depends on the specific proteins involved: Activation of Jak2/Stat1 is a signal promoting cell death in astrocytes 279

D. Cai, R. M. McCarron, E. Z. Yu, Y. Li, J. Hallenbeck

Suppression of Akt phosphorylation and kinase activity in ground squirrel hibernation ... 293

Neuronal remodeling and fun

U. Ito, T. Kuroiwa, E. Kawakami, I. Nakano, K. Oyanagi

Neuronal remodeling process associated with disseminated selective neuronal necrosis (DSNN) in the ischemic penumbra of the cerebral cortex 315

M. Chopp, J. Chen, L. Wang, Z.G. Zhang

Delayed treatment of stroke with EPO and statins-induction of brain plasticity and functional recovery, and confluent roles of VEGF and BDNF 323

Mechanisms of neuroprotectio

S. Klumpp, D. Kriha, G. Bechmann, A. Maaßen, S. Pallast, J. Krieglstein

Phosphorylation of bFGF is essential for its neuroprotective effect 359

R. P. Simon, Z. Xiong

A novel neuroprotective strategy in ischemic brain: blocking calcium-permeable acid-sensing ion channels 367

C. E. Junge, T. Sugawara, E. E. Olson, P. Lyuboslavsky, R. J. McKeon, P. H. Chan, S. F. Traynelis

A role for protease activated receptor-1 (PAR1) in the neurodegenerative processes of ischemia 301

Functional outcome

M. Endres, B. Winter

Functional outcome after mild cerebral ischemia 333

J. Kofler, R. Noppens, P. D. Hurn, R. J. Traystman

Neurological outcome from CPR: do genes and gender make a difference? 341

K. Masamoto, J. Kershaw, M. Ureshi, N. Takizawa, H. Kobayashi, K. Tanishita, I. Kanno

CBF and PO₂ dynamics in rat cortex during neuronal activation by hind paw stimulation 351

Con

M. Stenzel-Poore, R. P. Simon

Lipopolysaccharide (LPS) preconditioning in stroke; a look into the neuroprotective signature 379

A. Saito, T. Hayashi, C. M. Maier, P. H. Chan

Bad as a molecular switch for ischemic neuronal death/survival 387

- Y. Zhu, C. Culmsee, S. Klumpp, J. Krieglstein*
Neuroprotection by transforming growth factor-beta1 involves activation of NF- κ B through PI3k/Akt and MAPK/Erk1,2 signaling pathways 397

Neuroprotectants

M. D. Ginsberg, L. Belayev, N. G. Bazan, V. L. Marcheselli, M. D. Hill, Y. Y. Palesch, L. Khoutorova, E. B. Rodriguez de Turco, K. Ryckborst, D. Tamariz, R. Busto

Albumin-based neurotherapeutics for acute ischemic stroke: from bench to bedside . 421

N. G. Bazan

Endogenous neuroprotection in ischemia-reperfusion by novel docosahexaenoic acid-derived messengers 435

J. Gerwien, P. Ghezzi, L. Torup, A. Cerami, M. Brines, M. Leist

Erythropoietin-derived neuroprotective cytokines that do not bind to the classical erythropoietin receptor 445

Stem cells

M. Hoehn, E. Küstermann, D. Wiedermann, C. Bührle, J. Blunk, R. Weber, S. Wegener, T. Trapp, J. Hescheler, B. Fleischmann, K. Kandal, P. Ramos-Cabrer

Stem cell migration after stroke observed by *in vivo* MR imaging 503

E. Shohami, Y. Kloog, A. Alexandrovich, R. Kohen, S.M. Beni, R.J. Reiber, A. Biegon
Intracellular pathways as novel targets for treatment after brain injury 407

F. Shibasaki, H. Uchino, T. Kristian, G. Perkins, N. Ishii, B. K. Siesjö
Potent neuroprotection of CsA by inhibiting pathways involving calcineurin and cyclophilin D in forebrain ischemia 453

C. Culmsee, V. Junker, W. Kremers, S. Thal, L. von Baumgarten, N. Plesnila, J. Kriegstein
Combination therapy in ischemic stroke 467

T. Hayashi, W. Zhang, K. Abe
Edaravone extends time window of tPA for ischemic stroke 481

Y. Furuichi, M. Maeda, N. Ueyama, A. Moriguchi, N. Satoh, N. Matsuoka, S. Mutoh, T. Yanagihara
Combined thrombolytic therapy and treatment with immunosuppressant (tacrolimus): can it extend the therapeutic window of t-PA? 491

H. Hodges, S. Patel, Z. Dong, E. Miljan, C. Hicks, R. P. Stroemer, L. Stevanato, K. Pollock, A. A. Oliveira, J. D. Sinden
c-Myc-ERTM immortalised human stem cell lines as potential treatments for ischaemic brain damage 513

Clinical trials

- K. M. Woodbury-Harris, Y. Palesch*
Clinical trials: a stepwise process 527
- J. Kennedy, C. Ma, A. M. Buchan, on behalf of
the FASTER Collaborators*
FASTER prevention, fastest neuroprotec-
tion 533
- P. J. Tyrell for the IL-1ra in acute stroke study
group: University of Manchester and Salford
Royal Hospitals Trust, UK*
IL-1ra in acute clinical stroke: safety and bio-
logical activity 543

K. Kogure

Application of an anti-oxidant therapy for 300,000 Japanese patients in the early stage of stroke 549

S. Warach

A novel MRI marker of blood brain barrier opening in human ischemic stroke 557

W.-D. Heiss, R. Graf

Translational Research – does it really help in the development of stroke therapy 563
