## 4 Measurements During Integrative Cardiorespiratory Exercise Testing . . . . .

<b>What Is an Integrative Cardiopulmonary Exercise Test?</b>	77
<b>When Should Cardiopulmonary Exercise Testing Be Used?</b>	77
<b>Measurements</b>	<b>78</b>
Electrocardiogram	78
Maximal Oxygen Uptake ( $\dot{V}O_{2\max}$ ) and Maximum Oxygen Uptake (Peak $\dot{V}O_2$ )	80
Oxygen Uptake and Work Rate	81
Pattern of Work Rate Increase and the $\dot{V}O_2$ Response	81
Cardiac Output and Stroke Volume	84
Anaerobic, Lactate, and Lactic Acidosis Thresholds	86
Heart Rate–Oxygen Uptake Relationship and Heart Rate Reserve	90

## 5 Pathophysiology of Disorders Limiting Exercise . . . . .

<b>Obesity</b>	<b>112</b>
<b>Peripheral Arterial Diseases</b>	<b>114</b>
<b>Heart Diseases</b>	<b>114</b>
Coronary Artery Disease	115
Myopathic Heart Disease	116
Valvular Heart Disease	117
Congenital Heart Disease	118
<b>Pulmonary Vascular Diseases</b>	<b>118</b>
Causes of Increased Ventilation	118
Causes of Exercise Arterial Hypoxemia	119
Effect on Systemic Hemodynamics	119
<b>Ventilatory Disorders</b>	<b>120</b>
Obstructive Lung Diseases	120
Restrictive Lung Diseases	124
Chest Wall (Respiratory Pump) Disorders	125

## 6 Clinical Exercise Testing . . . . .

<b>Exercise Laboratory and Equipment</b>	<b>134</b>
General Laboratory Environment	134
Gas Exchange Measurement	134
Measurement of Volume, Flow Rate, or Ventilation	135
Breathing Valves, Mouthpieces, and Masks	136
Gas Analyzers	136
Ergometers: Treadmills and Cycles	137
Electrocardiogram and Systemic Blood Pressure	139
Oximetry, Blood Sampling, and Arterial Catheters	140
Data Sampling and Computation	142
Quality Control, Validation, and Maintenance	142

Cardiopulmonary .....	76
Oxygen Pulse and Stroke Volume	91
Arterial Blood Pressure	92
Breathing Reserve	92
Expiratory Flow Pattern	92
Tests of Uneven $\dot{V}_A/\dot{Q}$	93
Arterial Bicarbonate and Acid–Base Response	98
Tidal Volume/Inspiratory Capacity Ratio	99
Measurements Unique to Constant Work Rate Exercise Testing	99
<b>Data Display and Interpretation</b>	<b>104</b>
Evaluation of Systemic Function from the Nine-Panel Graphical Array	104
Factors Confounding Interpretation of Cardiopulmonary Exercise Testing	106
