HEART IN STRESS<sup>a</sup>

*Editor and Conference Organizer*

DIPAK K. DAS

---

CONTENTS

Preface. By DIPAK K. DAS ................................................................. ix

Part I. Molecular Basis of Stress, Myocardial Hypertrophy, and Beyond

Cardiac Hypertrophy: Signal Transduction, Transcriptional Adaptation, and Altered Growth Control. By MICHAEL WAGNER, EDUARDO MASCARENO, AND M.A.Q. SIDDIQUI .......................................................... 1

The Ins and Outs of Caveolar Signaling: m2 Muscarinic Cholinergic Receptors and eNOS Activation versus Neuregulin and ErbB4 Signaling in Cardiac Myocytes. By OLIVIER FERON, YOU-YANG ZHAO, AND RALPH A. KELLY................................................................. 11

Amplification of Angiotensin II Signaling in Cardiac Myocytes by Adenovirus-Mediated Overexpression of the AT<sub>1</sub> Receptor. By GEORGE W. BOOZ, LOIS L. CARL, AND KENNETH M. BAKER ........................................... 20

Mitochondrial ATP-Dependent Potassium Channels: Viable Candidate Effectors of Ischemic Preconditioning. By YONGGE LIU, TOSHIAKI SATO, JEGATHEESAN SEHARASEYON, ADAM SZEWczyK, BRIAN O’ROURKE, AND EDUARDO MARBÁN.................................................. 27

The Molecular Mechanism of Cardiac Hypertrophy and Failure. By TSUTOMU YAMAZAKI, ISSEI KOMURO, ICHIRO SHIOJIMA, AND YOSHIO YAZAKI . 38

Part II. Stress Response: Signal Transduction and Stress Proteins

Oxygen Free Radical Signaling in Ischemic Preconditioning. By DIPAK K. DAS, RICHARD M. ENGELMAN, AND NILANJANA MAULIK .................. 49

<sup>a</sup>The papers of this volume resulted from a conference entitled Heart in Stress–Jubilee Symposium in Conjunction with the 3rd International Congress of Pathophysiology, held June 28–July 3, 1998 in Helsinki, Finland.
Inhibition of Myocardial TNF-α Production by Heat Shock: A Potential Mechanism of Stress-Induced Cardioprotection against Postischemic Dysfunction. By XIANZHONG MENG, ANIRBAN BANERJEE, LIHUAA AO, DANIEL R. MELDRUM, BRIAN S. CAIN, BRIAN D. SHAMES, AND ALDEN H. HARKEN .......................................................... 69
Cardiac Adaptation to Ischemia-Reperfusion Injury. By JOHN G. KINGMA, JR. ........................................... 83

Part III. Stress Response to Cardiac Hypertrophy and Failure

Subcellular Remodeling and Heart Dysfunction in Cardiac Hypertrophy due to Pressure Overload. By NARANJAN S. DHALLA, LEONARD GOLFMAN, XUELIANG LIU, HIDEKI SASAKI, VIJAYAN ELIMBAN, AND HEINZ RUPP ................................................. 100

In Vitro Analysis of SERCA2 Gene Regulation in Hypertrophic Cardiomyocytes and Increasing Transfection Efficiency by Gene-Gun Biollistics. By KARIN EIZEMA, HAN A.A. VAN HEUGTEN, KAREL BEZSTAROSTI, MARGA C. VAN SETTEN, AND JOS M. J. LAMERS .......................................................... 111

Myocardial Response to Stress in Cardiac Hypertrophy and Heart Failure: Effect of Antihypertensive Drugs. By SUBHA SEN ......................................................... 125

Part IV. Cardiac Response to Oxidative Stress: Role of Antioxidants

Oxidized LDL and Atherogenesis. By SEppo YLÄ-HERTTUALA ......................................................... 134

Effect of Antioxidant Trace Elements on the Response of Cardiac Tissue to Oxidative Stress. By CHRISTINE BARANDIER, STÉPHANE TANGUY, SYLVIE PUCHEU, FRANÇOIS BOUCHER, AND JOËL DE LEIRIS ......................................................... 138

Apoptosis in Isolated Adult Cardiomyocytes Exposed to Adriamycin. By DINENDER KUMAR, LORRIE KIRSCHENBAUM, TIMAO LI, IGOR DANELISEN, AND PAWAN SINGAL .................................................................. 156

Physical Exercise and Antioxidant Defenses in the Heart. By MUSTAFA ATALAY AND CHANDAN K. SEN ................................................................................ 169

Part V. Preconditioning and Adaptation to Stress

New Insights into Cardioprotection by Ischemic Preconditioning and Other Forms of Stress. By SANDRA DE ZEEUW, MIRELLA A. VAN DEN DOEL, DIRK J. DUNCKER, AND PIETER D. VERDOUW ........................................................................ 178

Cellular Mechanisms of Infarct Size Reduction with Ischemic Preconditioning: Role of Calcium? By KARIN PRZYKLKEN, BORIS Z. SIMKHOVICH, BARBARA BAUER, KATSUYA HATA, LIN ZHAO, GARY T. ELLIOTT, AND ROBERT A. KLONER ......................................................... 192

Role of KATP Channel in Heat Shock and Pharmacological Preconditioning. By RAKESH C. KUKREJA ........................................................................ 211

Pharmacologic Enhancement of Tolerance to Ischemic Cardiac Stress Using Monophosphoryl Lipid A: A Comparison with Antecedent Ischemia. By LIN ZHAO AND GARY T. ELLIOTT ...................................................................... 222

Part VI. Myocardial Adaptation to Hypoxia

Adaptation to Chronic Hypoxia Confers Tolerance to Subsequent Myocardial Ischemia by Increased Nitric Oxide Production. By JOHN E. BAKER, PATRICIA HOLMAN, B. KALYANARAMAN, OWEN W. GRIFFITH, AND KIRKWOOD A. PRITCHARD, JR. ........................................................................ 236
Metabolic Changes in the Normal and Hypoxic Neonatal Myocardium. By SALAH ABDEL-ALEEM, JAMES D. ST. LOUIS, G. CHAD HUGHES, AND JAMES E. LOWE ................................................................. 254

Regulation of Cardiovascular Development and Physiology by Hypoxia-Inducible Factor 1. By GREGG L. SEMENZA, FATON AGANI, NARAYAN IYER, LORI KOTCH, ERIK LAUGHNER, SANDRA LEUNG, AND AIMEE YU ............................................................ 262

Activity of Cytochrome c Oxidase in the Right and Left Ventricular Myocardium of Male and Female Rats Exposed to Intermittent High Altitude Hypoxia. By A. STIEGLEROVÁ, Z. DRAHOTA, J. HOUSTEK, M. MILEROVÁ, V. PELOUCH, AND B. OSTADAL ........................................... 269

Part VII. Stress in Cardiac Surgery

Interaction of Bradykinin with Angiotensin, Prostacyclin, and Nitric Oxide in Myocardial Preservation. By MOTOAKI SATO, DIPAK K. DAS, AND RICHARD M. ENGELMAN .......................................................... 286

Alternatives for Myocardial Protection: Adenosine-Enhanced Ischemic Preconditioning. By JAMES D. MCCULLY AND SIDNEY LEVITSKY ........... 295

Part VIII. Na/H Exchanger and Stress

The Role of the Myocardial Sodium-Hydrogen Exchanger in Mediating Ischemic and Reperfusion Injury: From Amiloride to Cariporide. By MORRIS KARMAZYN ............................................................. 326

Regulation of Cardiac Sarcolemmal Na+/H+ Exchanger Activity by Endogenous Ligands: Relevance to Ischemia. By METIN AVKIRAN AND ROBERT S. HAWORTH ................................................................. 335

Na+/H+ Exchangers: Molecular Diversity and Relevance to Heart. By JOHN ORŁOWSKI ...................................................................................... 346

Part IX. Nitric Oxide: Stress and Myocardial Protection

Nitric Oxide and the Vascular Endothelium in Myocardial Ischemia-Reperfusion Injury. By JAKOB VINCENT-JOHANSEN, ZHI-QING ZHAO, MASANORI NAKAMURA, JAMES E. JORDAN, RUSSELL S. RONSON, VINOD H. THOURANI, AND ROBERT A. GUYTON ................................................. 354

Nitric Oxide Prevents Myoglobin/Tert-Butyl Hydroperoxide-Induced Inhibition of Ca2+ Transport in Skeletal and Cardiac Sarcoplasmic Reticulum. By ELIZABETH V. MENSHEKOVA, VLADIMIR B. RITOV, NIKOLAJ V. GORBUNOV, GUY SALAMA, H. GREGG CLAYCAMP, AND VALERIAN E. KAGAN ........................................................................ 371
Part X. Apoptosis and Molecular Signaling

Role for NADPH/NADH Oxidase in the Modulation of Vascular Tone. By Thomas Münzel, Ulrich Hink, Thomas Heitzer, and Thomas Meinertz .............................................................. 386

Differential Regulation of Apoptosis by Ischemia-Reperfusion and Ischemic Adaptation. By Nilanjana Maulik, Hiroaki Sasaki, and Nathaniel Galang ......................................................... 401

Apoptosis in Myocardial Ischemia-Reperfusion. By Roberta A. Gottlieb and Robert L. Engler ................................................................. 412

Stress Signal to Survival and Apoptosis. By Atsushi Takeda and Nobuakira Takeda ........................................................... 427

Index of Contributors ................................................................. 437

Financial assistance was received from:

Major Contributor:
- UNESCO GLOBAL NETWORK FOR MOLECULAR AND CELL BIOLOGY
