6 A STUDY ON EATING ATTITUDES AMONG HIGH SCHOOL STUDENTS IN BERLIN

6.1 Method
6.1.1 Subjects
6.1.2 Procedure
6.1.3 Measures
   6.1.3.1 Demographic data
   6.1.3.2 Knowledge and Interest
   6.1.3.3 Eating Disorders Inventory (EDI)

6.2 Results
6.2.1 Subjects
6.2.2 Eating Disorders Inventory
6.2.3 Knowledge of eating disorders
6.2.4 Detailed Knowledge
6.2.5 Further Interest
6.2.6 Source of knowledge
6.2.7 Relationship between knowledge of eating disorders and risk for disordered eating
6.2.8 Relationship between further interest and risk for disordered eating

6.3 Discussion and summary of the results
6.3.1 The Eating Disorders Inventory
6.3.2 Knowledge of eating disorders
6.3.3 Source of knowledge
6.3.4 Relationship between knowledge of eating disorders and risk for disordered eating.

7 PREVENTION OF EATING DISORDERS

7.1 Studies on the prevention of eating disorders
7.1.1 Increasing knowledge of eating disorders among adolescents
7.1.2 Programs focusing on reducing the risk factors of eating disorders
7.1.3 Programs focusing on issues of adolescence and eating disorders

7.2 Issues in the design and approach of eating disorders prevention programs
7.2.1 How old should participants be?
7.2.2 Primary versus secondary prevention
7.2.3 Should prevention programs target boys as well as girls?
7.2.4 Implementing long-term programs

7.3 Contents of a prevention program
7.3.1 Providing adolescents with the facts about eating disorders
7.3.2 Addressing the challenges of adolescence
7.3.3 Equipping adolescents with life skills

7.4 Settings of eating disorders prevention programs
7.4.1 The community
7.4.2 Health professionals
7.4.3 Parents and family
7.4.4 Schools

7.5 Methods of delivery
7.5.1 Using peer-led groups
7.5.2 Using a multi-level approach
7.6 Evaluation
7.6.1 Process evaluation
7.6.2 Impact evaluation
7.6.3 Cost-effect evaluation
7.6.4 Output measures

7.7 Conclusion

8 AN EATING DISORDERS PREVENTION PROGRAM

8.1 A theoretical Model

8.2 Designing and implementing a prevention program

8.3 Components of the Prevention Program
8.3.1 Health professionals and the community
8.3.2 Teachers, coaches, and parents
8.3.3 Adolescents
8.3.3.1 Target group and content
8.3.3.2 Setting
8.3.3.3 Method of delivery
8.3.3.4 Timing of the intervention
8.3.4 Outcome Evaluation

8.4 Conclusion

9 CONCLUSIONS AND DIRECTIONS FOR FUTURE RESEARCH

9.1 Investigating protective and developmental factors

9.2 Prevention research

9.3 Focusing on high-risk individuals

9.4 Developing new approaches in the field of health promotion and adolescent health
