CONTENTS

Contributors xi

Preface xv

1. Biophysics of the Green Fluorescent Protein

F. G. Prendergast

I. Introduction 1
II. Protein Folding and the Generation of This Chromophore 3
III. The Biophysics of the Fluorescence of GTP 8
IV. Resonance Energy Transfer Involving GFP 15
V. Summary 16
References 17

2. Understanding Structure–Function Relationships in the *Aequorea victoria* Green Fluorescent Protein

Andrew B. Cubitt, Leslie A. Woollenweber, and Roger Heim

I. Introduction 19
II. Structure 20
III. Chromophore Formation 21
IV. Effects of Mutations on the Spectroscopic Properties of GFP 22
V. Effects of Mutations That Improve Thermosensitivity 26
VI. The Development of Enhanced Mutants 27
References 29

3. Quantitative Imaging of the Green Fluorescent Protein (GFP)

David W. Piston, George H. Patterson, and Susan M. Knobel

I. Introduction 31
II. Factors That Influence/Limit Quantitation of GFP in Fluorescence Microscopy 32
III. Applications of LSCM for Quantitative Imaging of GFP 42
IV. Preparation of Purified GFP Samples 46
References 47

4. Single-Molecule Fluorescence Detection of Green Fluorescence Protein and Application to Single-Protein Dynamics

Daniel W. Pierce and Ronald D. Vale

I. Introduction 49
II. Design Considerations for Fluorescence Microscopes for Single-Molecule Detection 51

III. Characteristics of the Fluorescence from Single GFP Molecules 55
IV. Advantages of Using GFP for Single-Molecule Detection 64
V. GFP *in Vitro* and *in Vivo* Assays 65
Appendix I. Details of the TIR Microscope 67
Appendix II. Data Acquisition and Analysis 71
References 72

5. Targeting GFP to Organelles

Francesca De Giorgi, Zimran Ahmed, Carlo Bastianutto, Marisa Brini, Laurence Sophie Jouaville, Robert Marsault, Marta Murgia, Paolo Pinton, Tullio Pozzan, and Rosario Rizzuto

I. Introduction 75
II. Construction and Expression of the Organelle-Targeted GFP Chimeras 76
III. Dynamic Monitoring of Organelle Structure with the Targeted GFPs 79
IV. Expression in Primary Cultures 80
V. Visualizing GFP Chimeras with Different Spectral Properties 81
VI. Protocols 82
References 85

6. Cytoskeletal Dynamics in Yeast

Janet L. Carminati and Tim Stearns

I. Introduction 87
II. Generating GFP Fusions 88
III. Imaging Considerations for Yeast Cells 93
IV. Time-Lapse Microscopy 94
V. Results: Cytoskeletal GFP Fusion Proteins 96
VI. Future 103
References 104

7. Analysis of Nuclear Transport *in Vivo*

Paul Ferrigno and Pamela A. Silver

I. Introduction 107
II. Experimental Approaches and Protocols 108
References 121

8. GFP Fusion Proteins as Probes for Cytology in Fission Yeast

Kenneth E. Sawin

I. Introduction 123
II. Expressing GFP Fusion Proteins 124
III. Applications of Fusion Proteins 131
References 137

9. GFP Variants for Multispectral Imaging of Living Cells

James Haseloff

I. Introduction 139
II. Green Fluorescent Protein Markers 140
III. Imaging of Living Cells 143
IV. Marking Different Cell Types in *Arabidopsis* 146
V. Spectrally Distinct Fluorescent Proteins for Multichannel Confocal Microscopy 147
VI. Summary 149
References 150

10. GFP Fusions to a Microtubule Motor Protein to Visualize Meiotic and Mitotic Spindle Dynamics in *Drosophila*

Sharyn A. Endow

I. Introduction 153
II. Labeling Strategies 154
III. Imaging GFP 156
IV. Applications of Ncd-GFP Imaging 159
V. Perspectives 162
References 162

11. GFP as a Cell and Developmental Marker in the *Drosophila* Nervous System

Andrea Brand

I. Introduction 165
II. Targeted Expression of GFP in *Drosophila* 168
III. Lines for Expression of GFP 168
IV. Visualizing GFP Expression 175
References 180

12. Using Time-Lapse Confocal Microscopy for Analysis of Centromere Dynamics in Human Cells

Kevin F. Sullivan and Richard D. Shelby

I. Introduction 183
II. GFP Fusion Proteins 184
III. Microscopy 185
IV. Analysis 190
V. Summary 194
Appendix: Handling Confocal Images on the Laboratory Computer 195
References 200

13. Visualization of Large-Scale Chromatin Structure and Dynamics Using the *lac* Operator/*lac* Repressor Reporter System

Andrew S. Belmont, Gang Li, Gail Sudlow, and Carmen Robinett

I. Introduction 203
II. Overview of Methodology 204
III. Construction of the *lac* Operator Repeat 206
IV. Manipulation of the *lac* Operator Repeats 208
V. Repressor–NLS and GFP–Repressor–NLS Constructs 210
VI. Gene Amplification and Cell Cloning 212
VII. Repressor Staining and Immunodetection of the *lac* Operator Repeat 214
VIII. *In Vivo* Observation of GFP–Repressor Localization 215
IX. Phototoxicity Issues 216
X. Present Results and Future Directions 218
References 220

14. Centrosome Dynamics in Living Cells

Aaron Young, Richard Tuft, Walter Carrington, and Stephen J. Doxsey

I. Introduction 224
II. Cloning and Expression of GFP–Pericentrin 225
III. High-Speed Microscopy 228
IV. Image Restoration by an Improved Deconvolution Method 231
V. Imaging Centrosomes 234
VI. Postimaging Confirmation of Centrosome Integrity and Function 235
References 238

15. Transfections of Primary Muscle Cell Cultures with Plasmids Coding for GFP Linked to Full-Length and Truncated Muscle Proteins

Guissou A. Dabiri, Kenan K. Turnacioglu, Joseph C. Ayoob, Jean M. Sanger, and Joseph W. Sanger

I. Introduction 240
II. Construction of GFP-Linked Muscle Proteins 241
III. Preparation of Embryonic Avian Cardiomyocytes and Skeletal Muscle Myoblasts 243
IV. Methods of Transfection of Cross-Striated Cells in Culture 244
V. Transfection of Cross-Striated Muscle Cells with Full-Length cDNA for Sarcomeric Proteins 247
VI. Microscopic Observations of Live Cells 255
VII. Postprocessing of Transfected Cells 257
VIII. Problems Encountered in Cells Transfected with GFP–Sarcomeric Proteins 257
IX. Overview 258
References 258

16. Monitoring the Dynamics and Mobility of Membrane Proteins Tagged with Green Fluorescent Protein

J. Lippincott-Schwartz, J. F. Presley, K. J. M. Zaal, K. Hirschberg, C. D. Miller, and J. Ellenberg

I. Introduction 261
II. Constructing and Expressing GFP Fusion Proteins: Strategies for Optimizing Brightness and Assessing Chimera Function 262
III. Practical Guidelines for the Preparation and Imaging of GFP-Expressing Cells 264
IV. Time-Lapse Imaging of GFP Chimeras: Critical Parameters 265
V. Analysis of Time-Lapse Imaging Data 268
VI. Relating GFP Chimera Fluorescence to Actual Numbers of GFP Molecules 270
VII. Fluorescence Recovery after Photobleaching FRAP 271
VIII. Qualitative FRAP Experiments 272
IX. Quantitative FRAP 275
X. Calculating D 276
XI. Fluorescence Loss in Photobleaching (FLIP) Using a Confocal Microscope 278
XII. Other Applications of Photobleaching 280
References 280

17. Synchronous Real-Time Reporting of Multiple Cellular Events

Jeffrey D. Plautz and Steve A. Kay

I. Introduction 283
II. Green Fluorescent Protein 284
III. Luciferase 285
IV. Instrumentation and Techniques 286
V. Future Directions 290
References 291

18. Visualizing Protein Interactions in Living Cells Using Digitized GFP Imaging and FRET Microscopy

Ammasi Periasamy and Richard N. Day

I. Introduction 294
II. The Theory of FRET 295
III. Review of the FRET Literature 297
IV. Why Use FRET Microscopy? 298
V. Why Use the GFPs for FRET? 298
VI. Some Considerations for the Use of GFPs in FRET Imaging 301
VII. Some Considerations for Designing a FRET Imaging System 303
VIII. The Practical Application of FRET to Visualize Protein–Protein Interactions 307
IX. Overview and Conclusion 309
References 310

19. Flow Cytometric Analysis and FACS Sorting of Cells Based on GFP Accumulation

David W. Galbraith, Michael T. Anderson, and Leonard A. Herzenberg

I. General Introduction 315
II. Methods and Specific Applications 319
III. Typical Results 328
IV. Discussion and Conclusions 335
References 338

20. GFP Biofluorescence: Imaging Gene Expression and Protein Dynamics in Living Cells

Paul C. Goodwin

I. Introduction 344
II. Facilities 345
III. Maintaining Cells 347
IV. Imaging Systems 349
V. Computer Systems 355
VI. Output 359
VII. Conclusions 365
References 366
