THE ABDOMINAL AORTIC ANEURYSM: GENETICS, PATHOPHYSIOLOGY, AND MOLECULAR BIOLOGY

Editors and Conference Organizers
M. DAVID TILSON AND CHARLES D. BOYD

CONTENTS

Introductory Remarks. By M. DAVID TILSON ...................................... xi

Part I. Epidemiology of the Abdominal Aortic Aneurysm, Clinical Genetics, and Screening

Incidence and Prevalence of Abdominal Aortic Aneurysms. Estimated by Necropsy Studies and Population Screening by Ultrasound. By HENRIK BENGTSSSON, BJÖRN SONSESSON, AND DAVID BERGQVIST ........ 1

Relationship of Cardiovascular Risk Factors to Racial Differences in Femoral Bypass Surgery and Abdominal Aortic Aneurysmectomy in Massachusetts. By WAYNE W. LAMORTE, THAYER E. SCOTT, AND JAMES O. MENZOIAN ................................................................. 25

The Oxford Screening Program for Aortic Aneurysm and Screening First-Order Male Siblings of Probands with Abdominal Aortic Aneurysm. By JACK COLLIN ........................................................................... 36

Genetic Aspects of Abdominal Aortic Aneurysm. By ALAIN VERLOES, NATZI SAKALIHAN, RAYMOND LIMET, AND LUCIEN KOUISCHER ................................................................. 44

Variables That Affect the Expansion Rate and Rupture of Abdominal Aortic Aneurysms. By JACK L. CRONENWETT ................................. 56

Incidence of Cancer and Abdominal Aortic Aneurysms. A Logistic Regression Analysis. By EMILY L. CHAN, PAULA BELEM, ROCCO G. CIOCCA, DERALD MADS, RONALD P. CODY, JAMES W. MACKENZIE, CHARLES D. BOYD, AND ALAN M. GRAHAM .............. 68

This volume contains papers presented at a conference entitled The Abdominal Aortic Aneurysm: Genetics, Pathophysiology, and Molecular Biology, which was sponsored by the New York Academy of Sciences and held on March 7-9, 1996 in New York City.
Part II. Pathophysiology and Animal Models

Inflammatory Aspects of Experimental Aneurysms. Effect of Methylprednisolone and Cyclosporine. By PHILIP B. DOBRIN, NORBERT BAUMGARTNER, SAMY ANIDJAR, GREGORIO CHEJIFEC, and ROBERT MRKVICKA .................................. 74

Effects of Hypertension and Propranolol upon Aneurysm Expansion in the Anidjar/Dobrin Aneurysm Model. By MICHAEL A. RICCI, JEFFREY M. SLAIBY, GREGORY R. GADOWSKI, EDITH D. HENDLEY, PATRICIA NICHOLS, and DAVID B. PILCHER ....................................... 89

Formation and Growth of Aortic Aneurysms Induced by Adventitial Elastolysis. By JOHN V. WHITE and STACEY L. MAZZACCO ........... 97

Hemodynamic and Biochemical Characteristics of the Aorta in the WKY, SHR, WKHT, and WKHA Rat Strains. By MICHAEL A. RICCI, JEFFREY M. SLAIBY, EDITH D. HENDLEY, WILLIAM STIREWALT, LISE CLOUTIER, PATRICIA NICHOLS, and JOHN N. EVANS .......... 121

Part III. Enzymology of Matrix Destruction

Role of Serine Proteases in Aneurysm Development. By SRINIVASA K. RAO, KRISHNA V. REDDY, and JON R. COHEN ...................... 131

Biochemistry and Molecular Regulation of Matrix Macromolecules in Abdominal Aortic Aneurysms. By ANUJA GHORPADE and B. TIMOTHY BAXTER .................................................. 138

Plasminogen Activators in Abdominal Aortic Aneurysmal Disease. By JEFFREY M. REILLY .......................................................... 151

Role of Matrix Metalloproteinases in Abdominal Aortic Aneurysms. By ROBERT W. THOMPSON and WILLIAM C. PARKS .................... 157

Cellular Components and Features of Immune Response in Abdominal Aortic Aneurysms. By WILLIAM H. PEARCE and ALISA E. KOCH ........... 175

Part IV. Molecular Approaches to the Etiology of Aneurysms

Candidate Genes for Abdominal Aortic Aneurysms. By HELENA KUIVANIEMI, SANDRA J. WATTON, SIMON J. PRICE, YINING ZHU, ZORAN GATALICA, and GERARD TROMP ..................................... 186

A Genetic Basis for Autoimmune Manifestations in the Abdominal Aortic Aneurysm Resides in the MHC Class II Locus DR-beta-1. By M. DAVID TILSON, KATHLEEN J. OZSVATH, HITOSHI HIROSE, and SHICHAO XIA ................................................................. 208

Multiple Defects in Type III Collagen Synthesis Are Associated with the Pathogenesis of Abdominal Aortic Aneurysms. By DAVID W. ANDERSON, TROY K. EDWARDS, MICHAEL H. RICKETTS, HELENA KUIVANIEMI, GERARD TROMP, CATHERINE A. STOLLE, SUSAN B. DEAK, and CHARLES D. BOYD .................................................. 216

Closing Remarks and Conference Summary. By CHARLES D. BOYD and M. DAVID TILSON .......................................................... 229
Poster Papers

A Modern Series of Ruptured Infrarenal Aortic Aneurysms. Improved Survival at a Cost. By Enrico Ascfer, Patrick S. DePippo, Judith Hanson, William Yorkovich, and Elke Lorenson .............. 231

Trace Elements, Atherosclerosis, and Abdominal Aneurysms. By Leslie M. Klevay .................. 239

The UK Small Aneurysm Trial. By J. T. Powell, R. M. Greenhalgh, C. V. Ruckley, and F. G. R. Fowkes ......... 249

Design of a Trial To Evaluate the Effect of Propranolol upon Abdominal Aortic Aneurysm Expansion. By Michael A. Ricci, David B. Pilcher, and Ruth McBride .............. 252

Abdominal Aortic Aneurysm with Left Iliac Aneurysm in Identical Twins. By Michael A. Ricci, Beth Nutter, Iris McDonald, and Gail Strinberg .......... 254

Aortic Aneurysmal Disease in Women. Is There a Greater Incidence of Suprarenal Involvement? By Michael F. Silane, Kathleen M. Conte, Gary A. Fantini, and Elias Kazam .............. 256

Suppression of Experimental Aneurysmal Degeneration with Chemically Modified Tetracycline Derivatives. By Drazan Petrinec, Dennis R. Holmes, Shixiong Liao, Lorne M. Golub, and Robert W. Thompson .............. 263

CD-18 Monoclonal Antibody Blocks the Early Events of Aneurysm Expansion. By G. Strinberg, M. A. Ricci, R. S. Guibord, M. Mercier, P. Nichols, and M. M. Bednar .............. 266
Do Aneurysms Cause Atherosclerosis? By Bauer Sumpio and M. David Tilson

An in Vitro Model of Aneurysmal Disease: Effect of Leukocyte Infiltration and Shear Stress on MMP Production within the Arterial Wall. By M. M. Thompson, A. Wills, E. McDermott, M. Crowther, N. Brindle, and P. R. F. Bell

Neovascularization in the Abdominal Aortic Aneurysm. Endothelial Nitric Oxide Synthase, Nitric Oxide, and Elastolysis. By David Paik and M. David Tilson

Molecular Mimicry in Human Aortic Aneurysmal Diseases. By K. J. Ozsvath, H. Hirose, S. Xia, and M. D. Tilson

Phenotypic Overlap between Familial Aneurysms and Ehlers-Danlos Syndrome Type IV Resulting from a Type III Procollagen Gene Mutation. By David W. Anderson, Smita Thakker-Varia, and Catherine A. Stolle
