<i>Preface to first edition</i>	vi
<i>Preface to second edition</i>	vii
<i>Conversion factors, respiratory symbols, and abbreviations used in text</i>	viii
1 Development of techniques of respiratory support	1
2 Physiological background to mechanical ventilation	20
3 The mechanical basis of respiratory support	63
4 Respiratory failure: causes, conservative treatment, and indications for respiratory support	83
5 Non-invasive techniques of respiratory support	115
6 Respiratory support: techniques for minimising mean airway pressure	134
7 Pulmonary barotrauma: techniques for reducing peak airway pressure	164
8 Selection and care of artificial airways	191
9 Care of the patient during respiratory support	218
10 Modern ventilator technology	243
<i>Appendix 1</i> Suppliers of respiratory support equipment	287
<i>Index</i>	291
