|  |                |             |
|--|----------------|-------------|
| <i>Introduction</i>  | Claude Lenfant | <i>iii</i>  |
| <i>Preface</i>   |                | <i>v</i>    |
| <i>Contributors</i>  |                | <i>vii</i>  |
| <br>   |                |             |
| <b>1. Overview</b>   |                | <b>1</b>    |
| <i>Thomas L. Petty</i>   |                |             |
| References   |                | 5           |
| <br>   |                |             |
| <b>2. Definitions and Clinical Risk Factors</b>                                |                | <b>7</b>    |
| <i>Marc Moss and B. Taylor Thompson</i>  |                |             |
| I. Introduction  |                | 7           |
| II. The Definition of ARDS   |                | 8           |
| III. Persistent Problems and Controversies Involving<br>the Definition of ARDS |                | 14          |
| IV. Clinical Risk Factors for the Development<br>of ARDS                       |                | 22          |
| V. Mortality from ARDS   |                | 26          |
|  |                | <br>        |
|  |                | <i>xiii</i> |

|   |           |
|---|-----------|
| VI. Conclusions   | 29        |
| References  | 30        |
| <b>3. Epidemiology of Acute Lung Injury: A Public Health Perspective</b>                          | <b>37</b> |
| <i>Gordon D. Rubenfeld and Margaret J. Neff</i>   |           |
| I. Introduction   | 37        |
| II. Incidence   | 38        |
| III. Attributable Mortality   | 43        |
| IV. Attributable Morbidity  | 46        |
| V. Effect of Aging Population   | 48        |
| VI. Pediatrics  | 49        |
| VII. Conclusions  | 50        |
| References  | 51        |
| <b>4. Radiographic Findings of the Acute Respiratory Distress Syndrome</b>                        | <b>55</b> |
| <i>Desirée M. Quiñones Maymí and Philip C. Goodman</i>  |           |
| I. Introduction   | 55        |
| II. Definition and Causes of ARDS   | 56        |
| III. Pathophysiology  | 56        |
| IV. Chest Radiography   | 57        |
| V. Complications of ARDS  | 59        |
| VI. Computed Tomography and ARDS  | 66        |
| VII. Other Imaging Modalities   | 69        |
| VIII. Conclusions   | 70        |
| References  | 71        |
| <b>5. Pulmonary Pathology of the Acute Respiratory Distress Syndrome: Diffuse Alveolar Damage</b> | <b>75</b> |
| <i>Joseph F. Tomashefski, Jr.</i>   |           |
| I. Introduction   | 75        |
| II. Exudative Phase   | 77        |
| III. Proliferative Phase  | 83        |
| IV. Fibrotic Phase and Longstanding Healed ARDS   | 89        |
| V. Pulmonary Vascular Remodeling  | 92        |
| VI. Localization of Lesions: Regional Alveolar Damage   | 98        |
| VII. Idiopathic DAD/Acute Interstitial Pneumonia  | 105       |
| VIII. Immunohistochemical Profile and Morphogenesis of Diffuse Alveolar Damage                    | 105       |

|   |            |
|---|------------|
| IX. Clinicopathological Correlations  | 107        |
| References  | 108        |
| <b>6. Pathogenesis of Acute Lung Injury: Experimental Studies</b>   | <b>115</b> |
| <i>Nicholas David Manzo and Aaron B. Waxman</i>   |            |
| I. Introduction   | 115        |
| II. Cytokines and Chemokines  | 116        |
| III. Neutrophil Trafficking   | 124        |
| IV. Coagulation System  | 128        |
| V. Conclusion   | 132        |
| References  | 132        |
| <b>7. Pathogenesis of Acute Lung Injury: Clinical Studies</b>   | <b>147</b> |
| <i>Lorraine B. Ware and Timothy W. Evans</i>  |            |
| I. Introduction   | 147        |
| II. Methodology Used in Clinical Studies  | 147        |
| III. The Alveolar Capillary Membrane  | 153        |
| IV. Specific Inflammatory Cells, Pathways, and Mediators  | 161        |
| V. Repair Mechanisms  | 168        |
| VI. Future Directions   | 169        |
| References  | 169        |
| <b>8. Is Apoptosis Important in the Pathogenesis and Resolution of the Acute Respiratory Distress Syndrome?</b> | <b>181</b> |
| <i>Gustavo Matute-Bello and Thomas R. Martin</i>  |            |
| I. Introduction   | 181        |
| II. Apoptosis in the Pathogenesis of ARDS   | 182        |
| III. Apoptosis in the Resolution of ARDS  | 192        |
| IV. Summary and Conclusions   | 194        |
| References  | 196        |
| <b>9. Pathogenesis of Ventilator-Induced Lung Injury</b>  | <b>201</b> |
| <i>James A. Frank, Yumiko Imai, and Arthur S. Slutsky</i>   |            |
| I. Introduction   | 201        |
| II. Adverse Effects of Mechanical Ventilation   | 202        |
| III. Mechanical Forces During Positive-Pressure Ventilation   | 203        |
