**SEVENTEENTH TEXAS SYMPOSIUM ON
RELATIVISTIC ASTROPHYSICS AND
COSMOLOGY ^a**

Editors

HANS BÖHRINGER, GREGOR E. MORFILL, and JOACHIM E. TRÜMPER

Local Organizing Committee

H. BÖHRINGER, W. BRINKMANN, G. DIRNBERGER, H. HIPPMANN, M. IHLE, R. LANGE,
G. E. MORFILL, E. RIEGER, H. SCHEINGRABER, V. SCHÖNFELDER, J. E. TRÜMPER, W.
VOGES, and G. WIEDENMANN

Scientific Organizing Committee

G. E. MORFILL, J. E. TRÜMPER, I. APPENZELLER, J. AUDOUZE, J. N. BAHCALL, J.
EHLERS, G. G. FAZIO, C. E. FICHEL, R. GIACCONI, W. HILLEBRANDT, J. R. JOKIPII, T.
KIRSTEN, R. P. KUDRITZKI, R. NARAYAN, K. NOMOTO, F. PACINI, M. J. REES, B.
SADOLET, B. SCHUTZ, and J. SILK

Texas Symposium International Organizing Committee

J. AUDOUZE, J. D. BARROW, P. BERGMANN, A. CAMERON, J. EHLERS, L. Z. FANG, E. J.
FENYVES, R. GIACCONI, J. C. JONES, M. LIVIO, L. MESTEL, L. MOTZ, Y. NEEMAN, I.
OZSVATH, R. RAMATY, I. ROBINSON, R. RUFFINI, B. SADOLET, A. SALAM, D.
SCHRAMM, E. L. SCHUCKING, G. SETTI, M. M. SHAPIRO, G. SHAVIV, L. C. SHEPLEY, J. J.
STACHEL, A. TRAUTMAN, V. TRIMBLE, S. WEINBERG, J. A. WHEELER, and J. C.
WHEELER

CONTENTS

Preface. By JOACHIM E. TRÜMPER and GREGOR E. MORFILLXV

^a The papers in this volume were presented at the Seventeenth Texas Symposium on Relativistic Astrophysics, which was held on December 11-17, 1994, in Munich, Germany.

Part I. Plenary Talks

| | |
|---|-----|
| Solar Neutrino Problems. <i>By</i> TILL A. KIRSTEN | 1 |
| Superluminal Motions in Our Galaxy. <i>By</i> I. F. MIRABEL and L. F. RODRIGUEZ .. | 21 |
| The Galactic Center. <i>By</i> R. GENZEL, A. ECKART, and A. KRABBE | 38 |
| MACHOS and Dark Matter. <i>By</i> ROGER FERLET | 56 |
| Clusters of Galaxies. <i>By</i> HANS BÖHRINGER | 67 |
| High Redshift Quasars. <i>By</i> P. A. SHAVER | 87 |
| The Extragalactic X- and γ -Ray Backgrounds. <i>By</i> GIANCARLO SETTI | 110 |
| Gravitational Radiation. <i>By</i> KIP S. THORNE | 127 |
| Inflation: From Theory to Observation and Back. <i>By</i> MICHAEL S. TURNER | 153 |
| Particle Physics and Cosmology. <i>By</i> JOHN ELLIS | 170 |

Part II. Highlights—Space-based Astronomy

| | |
|--|-----|
| HST Highlights: New Views of the Universe. <i>By</i> H. S. STOCKMAN | 188 |
| HST Highlights: The Extragalactic Distance Scale. <i>By</i> WENDY L. FREEDMAN .. | 192 |
| Discovery of Explosion Fragments of the Vela Supernova. <i>By</i> BERND ASCHENBACH | 196 |
| The X-Ray Background. <i>By</i> GÜNTHER HASINGER | 200 |
| An Overview of the ASCA Mission. <i>By</i> YASUO TANAKA | 206 |
| ASCA Observations of Supernova Remnants. <i>By</i> ROBERT PETRE and the ASCA TEAM | 208 |
| ASCA Results on Active Galactic Nuclei. <i>By</i> K. MITSUDA | 213 |
| ASCA Results on Clusters of Galaxies. <i>By</i> TAKAYA OHASHI | 217 |
| Recent Highlights of the Compton Gamma Ray Observatory. <i>By</i> CARL E. FICHEL | 221 |
| Highlights of the Energetic Gamma Ray Experiment Telescope. <i>By</i> CARL E. FICHEL | 222 |
| Highlights from the COMPTEL 1 to 30 MeV Sky Survey. <i>By</i> V. SCHONFELDER, K. BENNETT, H. BLOEMEN, W. COLLMAR, R. DIEHL, W. HERMSEN, L. KUIPER, G. LICHTI, M. MCCONNELL, J. RYAN, A. STRONG, and C. WINKLER | 226 |
| BATSE Highlights. <i>By</i> GERALD J. FISHMAN | 232 |
| Highlights from OSSE on the Compton Observatory. <i>By</i> J. D. KURFESS | 236 |

Part III. Pulsars and Neutron Stars

| | |
|---|-----|
| Detections of Neutron Stars in the Extreme Ultraviolet. <i>By</i> STUART BOWYER .. | 241 |
| Isolated Neutron Stars and Their Emission throughout the Electromagnetic Spectrum. <i>By</i> PATRIZIA A. CARAVEO | 246 |
| ROSAT Observations of Neutron Stars. <i>By</i> WERNER BECKER | 250 |

| | |
|---|-----|
| Plasma Configurations around Rotating, Magnetised Objects—Particle Trapping by the Force-free Surface. <i>By</i> K. O. THIELHEIM | 257 |
| Boundary Effects in the Pulsar Magnetosphere. <i>By</i> ESTELLE ASSEO | 261 |
| Supernova Remnants vs. Pulsar Nebulae. <i>By</i> WOLFGANG KUNDT | 265 |
| Neutron Star Kicks and Multi-Dimensional Supernova Models. <i>By</i> H.-THOMAS JANKA and EWALD MÜLLER | 269 |
| A Long Term Study of High Energy Gamma Ray Emission from the Vela, Geminga, and Crab Pulsars. <i>By</i> P. V. RAMANAMURTHY, D. L. BERTSCH, C. E. FICHEL, G. KANBACH, D. A. KNIFFEN, H. A. MAYER-HASSELWANDER, P. L. NOLAN, P. SREEKUMAR, and D. J. THOMPSON | 275 |
| CGRO/OSSE Observations of Pulsars: An Update. <i>By</i> M. P. ULMER, P. C. SCHROEDER, J. M. CORDES, MATTHEW BAILES, and JONATHON BELL | 279 |
| Gamma-Ray Bursts and the Structure of the Galactic Halo. <i>By</i> PHILIPP PODSIADLOWSKI, MARTIN J. REES, and MALVIN RUDERMAN | 283 |
| Accretion and Magnetic Field Decay in Neutron Stars Entering Binaries. <i>By</i> U. GEPPERT and V. URPIN | 287 |
| Anisotropic Cooling and Atmospheric Radiation of Neutron Stars with Strong Magnetic Field. <i>By</i> YU. A. SHIBANOV, G. G. PAVLOV, V. E. ZAVLIN, L. QIN, and S. TSURUTA | 291 |
| An Internal Friction Model for an Unusually Large Second Derivative of the Pulsar Rotation Rate. <i>By</i> N. SHIBAZAKI and S. HIRANO | 295 |
| Effects of Magnetic Fields on Neutron Star Thermal Evolution. <i>By</i> S. TSURUTA and L. QIN | 299 |
| Fast Pulsars, Strange Stars, and Strange Dwarfs. <i>By</i> FRIDOLIN WEBER and NORMAN K. GLENDENNING | 303 |

Part IV. Binaries and Transients

| | |
|---|-----|
| BATSE Observations of GRS 1915 + 105 and GRO J1655 - 40. <i>By</i> W. S. PACIASAS, K. J. DEAL, B. A. HARMON, C. A. WILSON, S. N. ZHANG, and G. J. FISHMAN | 308 |
| SIGMA Survey of the Galactic Bulge Region. <i>By</i> J. PAUL, A. GOLDWURM, M. VARGAS, J. BALLEST, J.-P. ROQUES, L. BOUCHET, G. VEDRENNE, P. MANDROU, R. SUNYAEV, E. CHURAZOV, M. GILFANOV, A. FINOGENOV, A. VIKHLININ, A. DYACHKOV, N. KHAVENSON, and V. KOVTUNENKO | 312 |
| ASCA Observations of SS 433. <i>By</i> NOBUYUKI KAWAI | 316 |
| Globular Cluster X-Ray Sources in M31. <i>By</i> RODRIGO SUPPER | 320 |
| Observed Characteristics of Supersoft ROSAT Sources in the LMC and Other Galaxies. <i>By</i> PETER KAHABKA | 324 |

| | |
|---|-----|
| On the Nature, Population, and Implications of Luminous Supersoft X-Ray Sources. <i>By</i> R. DI STEFANO and S. RAPPAPORT | 328 |
| Evidence for Particle Acceleration and Nuclear Reactions around Compact Relativistic Objects. <i>By</i> EDUARDO L. MARTÍN | 332 |
| Evaporation of Companions in VLMXBs and Binary Millisecond Pulsars. <i>By</i> JACOB SHAHAM | 336 |
| Accretion Discs around Nonmagnetized Stars. <i>By</i> G. S. BISNOVATYI-KOGAN | 340 |
| Inclination Effects in Z Sources? <i>By</i> ERIK KUULKERS and MICHEL VAN DER KLIS | 344 |

Part V. Supernovae

| | |
|---|-----|
| SN Ia: Light Curves, Spectra, and H_0 . <i>By</i> P. HÖFLICH, C. DOMINIK, A. KHOKHLOV, E. MULLER, and J. C. WHEELER | 348 |
| Chandrasekhar Mass Models for Type Ia Supernovae. <i>By</i> S. E. WOOSLEY, D. GARCIA-SENZ, J. NIEMEYER, W. HILLEBRANDT, S. BLINNIKOV, and P. SASOROV | 352 |
| Type II Supernovae: The Oldest New Kid on the Block. <i>By</i> JASON SPYROMILIO and BRUNO LEIBUNDGUT | 356 |
| Type Ib/Ic/IIb/II-L Supernovae and Binary Star Evolution. <i>By</i> K. NOMOTO, K. IWAMOTO, H. YAMAOKA, T. SUZUKI, O. R. POLS, E. P. J. VAN DEN HEUVEL, and P. HÖFLICH | 360 |
| Convection in Type-II Supernovae: The First Second. <i>By</i> EWALD MÜLLER and H.-THOMAS JANKA | 368 |
| The Physics of Core-Collapse Supernova Explosions. <i>By</i> ADAM BURROWS and JOHN HAYES | 375 |

Part VI. Gamma-Ray Lines

| | |
|---|-----|
| Introductory Remarks to the Gamma-Ray Line Astrophysics Symposium. <i>By</i> V. SCHÖNFELDER | 382 |
| Gamma-Ray Line Observations with CGRO-COMPTEL. <i>By</i> R. DIEHL | 384 |
| Radioactivities Made in Supernovae. <i>By</i> S. E. WOOSLEY, F. X. TIMMES, R. D. HOFFMAN, D. H. HARTMANN, P. A. PINTO, and T. A. WEAVER | 388 |
| Analysis and Implications of the Nuclear Line Emission from the Orion Complex. <i>By</i> R. RAMATY, B. KOZLOVSKY, and R. E. LINGENFELTER | 392 |
| Evidence for ^{56}Co Line Emission from the Type Ia Supernova 1991T Using COMPTEL. <i>By</i> D. J. MORRIS, K. BENNETT, H. BLOEMEN, W. HERMSEN, G. G. LICHTI, M. L. MCCONNELL, J. M. RYAN, and V. SCHÖNFELDER | 397 |
| Gamma-Ray Line Spectroscopy with INTEGRAL. <i>By</i> PETER VON BALLMOOS, TONY DEAN, and CHRISTOPH WINKLER | 401 |
| Particle Acceleration in Orion-like Objects. <i>By</i> ANDREI M. BYKOV | 406 |

Part VII. Gamma-Ray Bursts: Observation and Theory

| | |
|--|-----|
| Gamma-Ray Burst Mini-Symposium—Introductory Remarks. <i>By</i> GERALD J. FISHMAN | 410 |
| Temporal Properties of Gamma-Ray Bursts. <i>By</i> CHRYSsa KouVELIOTOU | 411 |
| BATSE Observations of the Spectra of Gamma-Ray Bursts. <i>By</i> MICHAEL S. BRIGGS | 416 |
| EGRET Observations of Gamma-Ray Bursts. <i>By</i> E. J. SCHNEID, D. L. BERTSCH, C. E. FICHEL, R. C. HARTMAN, S. D. HUNTER, D. J. THOMPSON, G. KANBACH, H. A. MAYER-HASSELWANDER, Y. C. LIN, P. F. MICHELSON, P. L. NOLAN, B. L. DINGUS, C. VON MONTIGNY, P. SREEKUMAR, and D. A. KNIFFEN | 421 |
| COMPTEL Observations of Gamma-Ray Bursts. <i>By</i> R. M. KIPPEN, J. RYAN, A. CONNORS, M. MCCONNELL, V. SCHÖNFELDER, J. GREINER, M. VARENDORFF, W. COLLMAR, W. HERMSEN, L. KUIPER, C. WINKLER, L. O. HANLON, and K. S. O'FLAHERTY | 425 |
| Search for GRB Counterparts. <i>By</i> J. GREINER | 429 |
| Global Distribution Constraints on GRB Models. <i>By</i> D. H. HARTMANN, M. S. BRIGGS, and G. N. PENDLETON | 434 |
| Gamma-Ray Burst Models: General Requirements and Predictions. <i>By</i> P. MÉSZÁROS | 440 |
| Gamma-Ray Bursts—What Are They? <i>By</i> S. E. WOOSLEY | 446 |

Part VIII. Ultra-High-Energy Cosmic Rays

| | |
|--|-----|
| The Ultra-High-Energy Cosmic Rays: An Astrophysical Puzzle. <i>By</i> MURAT BORATAV | 450 |
| The Cosmic Ray Composition towards the Knee: Experimental Status and Implications. <i>By</i> DIETRICH MÜLLER and SIMON SWORDY | 454 |
| The Highest Energy Cosmic Rays. <i>By</i> BRUCE R. DAWSON | 460 |
| Propagation and Acceleration of Ultra-High Energy Cosmic Rays. <i>By</i> VLADIMIR S. PTUSKIN | 464 |
| Possible Extragalactic Sources of the Highest Energy Cosmic Rays. <i>By</i> JORG P. RACHEN | 468 |
| Search for Cosmic Gamma-Rays above 24 TeV with the HEGRA Detector. <i>By</i> E. LORENZ | 472 |
| Necessity and Reality of Experimental Investigation of Ultrahigh Energy Cosmic Rays (10^{19} - 10^{21} eV). <i>By</i> YU. A. FOMIN, G. B. KHRISTIANSEN, and G. V. KULIKOV | 477 |

Part IX. Gravitational Radiation

| | |
|---|-----|
| LISA—Laser Interferometer Space Antenna for Gravitational Wave Measurements. <i>By</i> KARSTEN DANZMANN | 481 |
|---|-----|

| | |
|--|-----|
| Wide-Band Spherical Gravitational Wave Detector. <i>By</i> M. KARIM, M. BOCKO, L. E. MARCHESI, and G. ZHANG | 485 |
| Binary Neutron Star Inspiral, LIGO, and Cosmology. <i>By</i> LEE SAMUEL FINN | 489 |
| On the Detectability of Post-Newtonian Effects in Gravitational-Wave Emission of a Coalescing Binary. <i>By</i> ANDRZEJ KRÓLAK, KOSTAS D. KOKKOTAS, and GERHARD SCHÄFER | 493 |
| Gravitational Wave Signals from Collapsing Rotating Polytropes. <i>By</i> EWALD MÜLLER and THOMAS ZWERGER | 498 |
| Gravitational Waves from Coalescing Neutron Stars. <i>By</i> XING ZHUGE, JOAN CENTRELLA, and STEPHEN McMILLAN | 503 |
| Coalescing Compact Binaries to Second-Post-Newtonian Order. <i>By</i> LUC BLANCHET | 507 |
| Gravitational Waves from a Particle Orbiting around a Rotating Black Hole: Post-Newtonian Expansion. <i>By</i> MASARU SHIBATA, MISAO SASAKI, HIDEYUKI TAGOSHI, and TAKAHIRO TANAKA | 512 |

Part X. Active Galactic Nuclei

| | |
|--|-----|
| Active Galactic Nuclei across the Electro-magnetic Spectrum. <i>By</i> THIERRY J.-L. COURVOISIER | 517 |
| Recent X-Ray Spectral Results from Seyfert 1 Galaxies. <i>By</i> A. C. FABIAN, R. F. MUSHOTZKY, K. NANDRA, and C. S. REYNOLDS | 521 |
| Correlated Optical and Gamma-Ray Variability in Blazars. <i>By</i> STEFAN WAGNER | 526 |
| Decelerating Relativistic Jets, BL-LAC Objects, and the Fanaroff-Riley Classification. <i>By</i> GEOFFREY V. BICKNELL | 530 |
| Pair Cascade Models of Gamma-Ray Blazars. <i>By</i> AMIR LEVINSON and ROGER BLANDFORD | 534 |
| Soft X-Ray Excesses as a Probe of the Conditions at the Innermost Part of Accretion Flow in AGN. <i>By</i> B. CZERNY, P. T. ŻYCKI, and Z. LOSKA | 538 |
| Activity of Rotating Magnetospheres in AGNs: Collimated Propagation of MHD Waves near a Black Hole. <i>By</i> KOUICHI HIROTANI and AKIRA TOMIMATSU | 542 |
| Accretion Disks in Active Galaxies: The Sub-Keplerian Paradigm. <i>By</i> SANDIP K. CHAKRABARTI | 546 |
| On the Hot Spot near a Kerr Black Hole. <i>By</i> ALEXANDER ZAKHAROV | 550 |
| Non-stationary Accretion with Ordered Magnetic Fields and Outflows in AGNs and Quasars. <i>By</i> M. M. ROMANOVA and R. V. E. LOVELACE | 554 |
| Cosmological Origin of Quasars. <i>By</i> ABRAHAM LOEB | 558 |

Part XI. Gravitational Lensing

| | |
|--|-----|
| Testing Cosmogonic Models with Gravitational Lensing. <i>By</i> JOACHIM WAMBSGANSS, RENYUE CEN, JEREMIAH P. OSTRIKER, and EDWIN L. TURNER | 563 |
| Giant Luminous Arcs. <i>By</i> FRANÇOIS HAMMER, ISABELLA GIOIA, OLIVIER LE FÈVRE, and GERRY LUPPINO | 568 |
| The Investigation of Cluster Mass Distribution by Gravitational Lenses. <i>By</i> G. SOUCAIL | 573 |
| Determining the Mass Distribution of Clusters from Gravitational Lensed Background Galaxies. <i>By</i> CAROLIN SEITZ | 578 |
| Ray Propagation in the Cheese Slice Universe. <i>By</i> SYLVIE LANDRY and CHARLES C. DYER | 583 |
| Gravitational Lensing by Cosmic Strings. <i>By</i> F. MARLEAU, C. C. DYER, and J. H. PALMER | 587 |
| The Correlation of 1-Jansky Sources to Zwicky Clusters. <i>By</i> STELLA SEITZ | 591 |
| Dark Matter from Quasar Microlensing. <i>By</i> M. R. S. HAWKINS | 596 |
| Cosmological Parameters and Gravitational Lensing Statistics. <i>By</i> PHILLIP HELBIG | 600 |
| Gravitational Lensing with Polarization to Determine Galaxy Masses. <i>By</i> C. C. DYER, P. P. KRONBERG, R. A. PERLEY, and H.-J. RÖSER | 604 |
| AGAPE, an Experiment to Detect MACHO's in the Direction of the Andromeda Galaxy. <i>By</i> R. ANSARI, M. AURIÈRE, P. BAILLON, A. BOUQUET, G. COUPINOT, C. COUTURES, C. GHESQUIÈRE, Y. GIRAUD-HÉRAUD, P. GONDOLO, J. HECQUET, J. KAPLAN, A. L. MELCHIOR, M. MONIEZ, J. P. PICAT, and G. SOUCAIL | 608 |

Part XII. Galaxy Formation

| | |
|--|-----|
| The Canada-France Redshift Survey. <i>By</i> O. LE FÈVRE, S. J. LILLY, D. CRAMPTON, F. HAMMER, and L. TRESSE | 612 |
| Emission-Line Galaxies at $z \leq 0.3$ in the Canada-France Redshift Survey. <i>By</i> CLÁUDIA ROLA, LAURENCE TRESSE, GRAZYNA STASINSKA, and FRANÇOIS HAMMER | 616 |
| Redshift Distribution & Nature of μ -JY Radio Sources. <i>By</i> FRANÇOIS HAMMER, DAVID CRAMPTON, OLIVIER LE FÈVRE, and SIMON LILLY | 620 |
| From X-Ray Observations to Galaxy Formation. <i>By</i> G. FABBIANO | 624 |
| Photoionization Effects during Galaxy Formation. <i>By</i> MATTHIAS STEINMETZ | 628 |
| On the Origin of Halo Globular Clusters and Spheroid Stars. <i>By</i> MARIO VIETRI and ENRICO PESCE | 632 |

Part XIII. Large-Scale Structure

| | |
|---|-----|
| Clusters and Large-Scale Structure. <i>By</i> NETA A. BAHCALL | 636 |
|---|-----|

| | |
|--|-----|
| The Primordial Perturbation Spectrum and Large Scale Structure. <i>By</i> STEFAN GOTTLÖBER | 650 |
| The Density of the Universe from the Peculiar Velocities of Sc Galaxies. <i>By</i> WOLFRAM FREUDLING, LUIZ N. DA COSTA, RICCARDO GIOVANELLI, MARTHA P. HAYNES, JOHN J. SALZER, and GARY WEGNER | 654 |
| HST Cepheid Distance to Leo Group Galaxy M96. <i>By</i> T. SHANKS, N. R. TANVIR, H. C. FERGUSON, and D. R. T. ROBINSON | 658 |
| E.R.O.S. Search for Microlensing of Stars by Low Mass Objects in the Galactic Halo. <i>By</i> CHRISTOPHE MAGNEVILLE | 664 |

Part XIV. Microwave Background

| | |
|---|-----|
| CMB Anisotropies: An Overview. <i>By</i> DOUGLAS SCOTT | 668 |
| Mapping with the Jodrell Bank-Tenerife Radiometers. <i>By</i> R. D. DAVIES, C. M. GUTIÉRREZ, R. REBOLO, R. A. WATSON, A. N. LASENBY, and S. HANCOCK | 672 |
| Comments on the Comparison of the COBE DMR and Tenerife Data. <i>By</i> CHARLES H. LINEWEAVER | 676 |
| The Slope of Matter Density Perturbations from Tenerife and COBE/DMR. <i>By</i> F. ATRIO-BARANDELA, L. CAYÓN, and J. SILK | 680 |
| Estimating Microwave Power Spectra. <i>By</i> MAX TEGMARK | 684 |
| Structure Formation with Global Texture. <i>By</i> RUTH DURRER and ZHI-HONG ZHOU | 688 |
| Chasing CMB Photons through the Nonlinear Universe. <i>By</i> ROBIN TULUIE and PABLO LAGUNA | 692 |
| CMB Anisotropies Numerically vs. Analytically. <i>By</i> NAOSHI SUGIYAMA and WAYNE HU | 697 |
| The Grishchuk-Zeldovich Effect in the Open Universe. <i>By</i> DAVID H. LYTH ... | 701 |
| How Anisotropic Can a Universe Be? <i>By</i> JOHN D. BARROW | 706 |
| The Signatures of Voids and the CMBR. <i>By</i> SHARON L. VADAS | 710 |
| Ω from the COBE-DMR Anisotropy Maps. <i>By</i> J. L. SANZ, L. CAYÓN, E. MARTINEZ-GONZÁLEZ, N. SUGIYAMA, and S. TORRES | 714 |
| Topology of the Microwave Background on Scales 1°-2° and Reionization. <i>By</i> P. D. NASELSKY and D. I. NOVIKOV | 718 |
| CMB Anisotropy due to Compton Scattering in Clusters of Galaxies. <i>By</i> S. COLAFRANCESCO, P. MAZZOTTA, Y. REPHAELI, and N. VITTORIO | 722 |
| Index of Contributors | 726 |
