

# Contents

- Preface, vi
- 1** Introduction, 1
  - 2** Mechanisms of acquired QT prolongation and torsades de pointes, 8
  - 3** Measurement of the QT interval and repolarization assessment, 24
  - 4** Introduction to drug-induced long QT syndrome, 60
  - 5** Risk of QT prolongation and torsades de pointes with antiarrhythmic drugs, 69
  - 6** Risk of QT prolongation and torsades de pointes with antihistamines, 87
  - 7** Risk of QT prolongation and torsades de pointes with psychotropic drugs, 102
  - 8** Risk of QT prolongation and torsades de pointes with antimicrobial and antimalarial drugs, 121
  - 9** Risk of QT prolongation and torsades de pointes with prokinetics and miscellaneous other drugs, 140
  - 10** Acquired long QT syndrome secondary to cardiac conditions, 163
  - 11** Acquired long QT syndrome secondary to noncardiac conditions, 171
  - 12** Perspective on drug-induced repolarization changes, 182
- Index, 191
