## **PART I Techniques for Examination of Cells within Tissues**

<b>1. Advances in High-Pressure and Plunge-Freeze Fixation</b>	
<i>M. E. Galway, J. W. Heckman, Jr., G. J. Hyde, and L. C. Fowke</i>	
I. Introduction	4
II. Plunge-Freeze Fixation	7
III. High-Pressure Freeze Fixation	11
IV. Results and Discussion	14
V. Conclusions and Perspectives	17
References	17
<b>2. Ion Localization and X-Ray Microanalysis</b>	
<i>Martin J. Hodson</i>	
I. Introduction	21
II. Plant Materials	22
III. The Choice of Methods	22
IV. Cryo-SEM and X-Ray Microanalysis	23
V. Freeze Substitution and TEM	26
VI. Other Preparative Techniques	28
VII. Other Machinery Used for Ion Localization	29
VIII. Conclusions	30
References	30
<b>3. Freeze-Fracture Deep-Etch Methods</b>	
<i>Chris Hawes and Barry Martin</i>	
I. Introduction	33
II. Materials	34
III. Methods	35
IV. Critical Aspects of the Procedure	38
V. Conclusions	42
References	43
<b>4. Advances in Immunoelectron Microscopy</b>	
<i>Patricia J. Moore</i>	
I. Introduction	45

II. Tissue Preparation	46
III. On-Grid Section Labeling	48
IV. Protocols	52
V. Conclusions and Perspectives	55
References	55
5. Freeze-Substitution	
<i>M. V. Parthasarathy</i>	
I. Introduction	57
II. Freeze-Substitution	57
III. Conclusion and Perspectives	67
References	67
6. The Cell Optical Displacement Assay (CODA)—Measurements of Cytoskeletal Tension in Living Plant Cells with a Laser Optical Trap	
<i>Melvin Schindler</i>	
I. Introduction	71
II. Optical Trapping—A Tool for Cellular Measurements and Manipulations	74
III. Cell Optical Displacement Assay (CODA)—A Quantitative Tool for Tension Analysis in the Cytoskeleton of Living Plant Cells	75
IV. CODA and the Plant Cell—Conclusions	81
References	83
7. Methods in Plant Immunolight Microscopy	
<i>Roy C. Brown and Betty E. Lemmon</i>	
I. Introduction	86
II. Preparing Isolated Cells for Immunostaining	89
III. Immunostaining	97
IV. Mounting	100
V. Image Recording	101
VI. Sectioning Intact Tissues for Immunostaining	102
VII. Perspectives	105
References	106
8. Confocal Epipolarization Microscopy of Gold Probes in Plant Cells and Protoplasts	
<i>Lawrence R. Griffing, Marco A. Villanueva, Josephine Taylor, and Scott Moon</i>	
I. Introduction	109
II. Configuring a Confocal Laser Scanning Microscope for Epipolarization	110
III. Imaging Colloidal Gold in Protoplasts	113
IV. Imaging Biologically Delivered Gold Beads	119
V. Conclusions	119
References	120

<b>9.</b>	<b>Monoclonal Antibodies to Cell-Specific Cell Surface Carbohydrates in Plant Cell Biology and Development</b>	
	<i>Roger I. Pennell and Keith Roberts</i>	
	I. Applications	124
	II. Methods	134
	III. Perspectives	137
	References	139
<b>10.</b>	<b>Epitope Tagging for the Detection of Fusion Protein Expression in Transgenic Plants</b>	
	<i>Mark J. Gultinan and Lauren McHenry</i>	
	I. Introduction	143
	II. Methods	144
	III. Results and Discussion	148
	IV. Conclusions and Perspectives	148
	References	151
<b>11.</b>	<b><i>In Situ</i> Enzyme Histochemistry on Plastic-Embedded Plant Material</b>	
	<i>Marc De Block</i>	
	I. Introduction	153
	II. Methods	154
	III. Results and Discussion	158
	IV. Conclusion	163
	References	163
<b>12.</b>	<b><i>In Situ</i> Hybridization</b>	
	<i>Geoffrey Ian McFadden</i>	
	I. Introduction	165
	II. Which Protocol to Use?	166
	III. Labels, Tags, and Detection Systems	168
	IV. Probe Types	170
	V. Hybridization Conditions	176
	VI. Controls	180
	VII. New Techniques	180
	References	181
<b>13.</b>	<b>Localization of RNA by High Resolution <i>in Situ</i> Hybridization</b>	
	<i>Xingxiang Li and Thomas W. Okita</i>	
	I. Introduction	185
	II. Principles of <i>in Situ</i> Hybridization Technique at the Electron Microscopy Level	186
	III. Materials	188
	IV. Methods	188

V. Results and Discussion	195
VI. Perspectives	197
References	199
<b>14. Recombinant Aequorin Methods for Intracellular Calcium Measurement in Plants</b>	
<i>Heather Knight and Marc R. Knight</i>	
I. Introduction	201
II. Expression of Recombinant Aequorin in Plants	204
III. Reconstitution of Aequorin	206
IV. Measurement of Light	207
V. Perspectives	213
References	215
<b>15. Confocal Microscopy of the Shoot Apex</b>	
<i>Mark P. Running, Steven E. Clark, and Elliot M. Meyerowitz</i>	
I. Introduction	217
II. Materials	218
III. Methods	219
IV. Results and Discussion	225
V. Conclusions and Perspectives	228
References	229
<b>16. Measurements of Wall Stress Relaxation in Growing Plant Cells</b>	
<i>Daniel J. Cosgrove</i>	
I. Introduction	231
II. Theory Underlying the Method	232
III. Materials	233
IV. Methods	236
V. Critical Aspects of the Procedure	238
VI. Results and Interpretation	239
VII. Conclusion and Perspectives	242
References	242
<b>17. High-Resolution NMR Methods for Study of Higher Plants</b>	
<i>Justin K. M. Roberts and Jian-Hua Xia</i>	
I. Introduction	245
II. Materials	246
III. Methods	250
IV. Critical Aspects of the Procedures	253
V. Results and Discussion	256
VI. Conclusions and Perspectives	256
References	257

<b>18. Electrophysiology</b>	
<i>John F. Thain</i>	
I. Introduction	259
II. Materials and Methods	260
III. Critical Aspects of the Procedure	269
IV. Results and Discussion	271
V. Conclusion and Perspectives	273
References	273

**19. Ion-Selective Microelectrodes for Measurement of Intracellular Ion Concentrations**

*A. J. Miller*

I. Introduction	275
II. Materials	281
III. Methods	282
IV. Results	288
V. Conclusions and Perspectives	290
References	290

**20. Patch-Clamping Plant Cells**

*Frans J. M. Maathuis and Dale Sanders*

I. Introduction	293
II. Materials and Methods	295
III. Results and Discussion	299
References	301

**PART II Techniques for Manipulation and Analysis of Different Cell Types**

**21. Methods for Mesophyll and Bundle Sheath Cell Separation**

*Jen Sheen*

I. Introduction	305
II. Materials	307
III. Methods	308
IV. Critical Aspects of the Procedure	310
V. Results and Discussion	311
VI. Conclusions and Perspectives	313
References	313

**22. Synchronization of Cell Cultures of Higher Plants**

*Hiroaki Kodama and Atsushi Komamine*

I. Introduction	315
II. Application	318

III. Plant Materials	318
IV. Procedures	319
V. Critical Aspects for Synchronization	320
VI. Results	320
VII. Discussion	327
References	328
<b>23. Genetic Tagging of Cells and Cell Layers for Studies of Plant Development</b>	
<i>Angelo Spena and Francesco Salamini</i>	
I. Introduction	331
II. Chimeras	332
III. Spontaneous Sectors	338
IV. Sectors Induced at Specific Stages of Development	342
V. Sector Boundary Analysis	344
VI. Pattern Determination	346
VII. Perspectives	349
References	350
<b>24. Chemically Induced Mitotic Synchrony in Root Apical Meristems</b>	
<i>Betty Prewett and Thomas Jacobs</i>	
I. Introduction	355
II. Materials and Recipes	356
III. Aspects of the Procedure	358
IV. Methods	361
V. Perspectives	364
References	364
<b>25. Manipulation of Pollen Grains for Gametophytic and Sporophytic Types of Growth</b>	
<i>V. Raghavan</i>	
I. Introduction	367
II. Materials and Methods	368
III. Critical Aspects of the Procedures	374
IV. Conclusions and Perspectives	374
References	375
<b>26. Root Border Cells as Tools in Plant Cell Studies</b>	
<i>Lindy A. Bringham, Ho-Hyung Woo, and Martha C. Hawes</i>	
I. Introduction	378
II. Materials	379
III. Methods	379
IV. Special Considerations	382
V. Applications of Border Cells in Teaching and Research	384

## **PART III Signal Transduction and Information Transfer**

### **27. *In Vivo* Footprinting of Protein–DNA Interaction**

*Anna-Lisa Paul and Robert J. Ferl*

I. Introduction	391
II. Materials	392
III. Methods	394
IV. Typical Results and Discussion	397
V. Conclusions and Perspectives	399
References	399

### **28. The Interaction Trap: *In Vivo* Analysis of Protein–Protein Associations**

*Brenda W. Shirley and Inhwan Hwang*

I. Introduction	401
II. Materials	403
III. Methods	404
IV. Critical Aspects of the Procedures	413
V. Conclusions and Perspectives	414
References	415

### **29. Cloning Plant Genes by Complementation of Yeast Mutants**

*Christophe d'Enfert, Michèle Minet, and François Lacroute*

I. Introduction	417
II. Materials and Methods	419
III. Critical Aspects of the Procedures	426
IV. Results and Discussion	427
V. Conclusion and Perspectives	428
References	429

### **30. Differential mRNA Display**

*T. Lynne Reuber and Frederick M. Ausubel*

I. Introduction	431
II. Methods	432
III. Critical Aspects of the Technique	436
IV. Potential Modifications of the Procedure	437
V. Results and Discussion	438
VI. Conclusions and Perspectives	440
References	440

<b>31. Molecular Methods for Isolation of Signal Transduction Pathway Mutants</b>	
<i>Joanne Chory, Hsou-min Li, and Nobuyoshi Mochizuki</i>	
I. Introduction	441
II. Method I: Transformation of <i>Arabidopsis thaliana</i>	443
III. Method II: Screen/Selection for Signal Transduction Pathway Mutants	446
IV. Genetic Characterization	452
V. Results and Discussion	453
VI. Conclusions	453
References	454
<b>32. Induction of Signal Transduction Pathways through Promoter Activation</b>	
<i>R. Walden, K. Fritze, and H. Harling</i>	
I. Introduction	455
II. Materials	456
III. Methods	458
IV. Critical Aspects of the Procedure	464
V. Discussion	466
References	468
<b>33. <i>In Vitro</i> Analysis of G-Protein Functions</b>	
<i>Hong Ma and Catherine A. Weiss</i>	
I. Introduction	471
II. Materials	475
III. Methods for Detecting G Proteins	475
IV. Analysis of G-Protein Involvement in Cellular Processes	480
V. Conclusion	482
References	482
<b>34. Production of Recombinant Plant Calmodulin and Its Use to Detect Calmodulin-Binding Proteins</b>	
<i>Birong Liao and Raymond E. Zielinski</i>	
I. Introduction	487
II. Materials	488
III. Methods	489
IV. Critical Aspects of the Procedures	494
V. Results	495
References	499
<b>35. Analysis of Light Signaling Pathway in Stomatal Guard Cells</b>	
<i>Ken-Ichiro Shimazaki and Toshinori Kinoshita</i>	
I. Introduction	501
II. Materials and Methods	502

III. Results and Discussion	507
IV. Conclusions and Perspectives	512
References	512
<b>36. Immunocytochemical Localization of Receptor Protein Kinases in Plants</b>	
<i>Veronica P. Counihan, Thomas E. Phillips, and John C. Walker</i>	
I. Introduction	515
II. Immunolocalization in Paraffin-Embedded Tissue by Light Microscopy	518
III. Immunolocalization in Plastic-Embedded Tissue by Light Microscopy	523
IV. Immunolocalization by Electron Microscopy	524
V. Formulations	527
VI. Conclusions	527
References	528
<b>37. Expression and Assay of Autophosphorylation of Recombinant Protein Kinases</b>	
<i>Mark A. Horn and John C. Walker</i>	
I. Introduction	532
II. Materials	532
III. Selecting the Region of the Protein Kinase Molecule to Express	532
IV. Choosing the Best Expression Vector	533
V. Choice of <i>E. coli</i> Strains for Heterologous Protein Expression	534
VI. Isolation of Fusion Proteins	535
VII. Demonstration of Protein Kinase Activity	536
VIII. Determining the Number of Autophosphorylation Sites	538
IX. Discussion and Conclusions	539
References	540
<b>38. Transmembrane Signaling and Phosphoinositides</b>	
<i>Myeon H. Cho and Wendy F. Boss</i>	
I. Introduction	543
II. Materials	544
III. Methods and Critical Aspects of the Procedures	546
IV. Conclusions and Perspectives	551
References	552
<b>Index</b>	<b>555</b>
<b>Volumes in Series</b>	<b>569</b>
