Preface	xxxi
Introduction	xxxiii

PART I Isolation of Cilia and Flagella

1. Flagellar Amputation and Regeneration in <i>Chlamydomonas</i> <i>Paul A. Lefebvre</i>	
I. Introduction	3
II. Procedures for Flagellar Amputation	4
III. Assay of Flagellar Regeneration	6
References	6
2. Large-Scale Isolation of <i>Chlamydomonas</i> Flagella <i>Stephen M. King</i>	
I. Introduction	9
II. Methods	10
References	12
3. Isolation of Cilia from <i>Tetrahymena thermophila</i> <i>William L. Dentler</i>	
I. Introduction	13
II. <i>Tetrahymena</i> Cell Culture	13
III. Isolation of <i>Tetrahymena</i> Cilia	14
References	15
4. Preparation of Cilia and Subciliary Fractions from <i>Paramecium</i> <i>David L. Nelson</i>	
I. Introduction	17
II. Solutions	18
III. Methods of Deciliation	19
IV. Preparation of Subciliary Fractions	22
References	24

5. Isolation of <i>Euglena</i> Flagella	
<i>Huân M. Ngô and G. Benjamin Bouck</i>	
I. Introduction	25
II. Cell Culture	26
III. Isolation of Flagella	27
References	29
6. Isolation of Ram Sperm Flagella	
<i>Jovenal T. San Agustin and George B. Witman</i>	
I. Introduction	31
II. Preparation of Ram Sperm Flagella	32
III. Demembration of Ram Sperm Flagella	34
References	34
7. Isolation of Molluscan Gill Cilia, Sperm Flagella, and Axonemes	
<i>Raymond E. Stephens</i>	
I. Introduction	37
II. Biological Material	38
III. Methods	38
References	42
8. Isolation of Flagella and Their Membranes from Sea Urchin Spermatozoa	
<i>Lee Hon Cheung</i>	
I. Introduction	43
II. Experimental Procedures	44
References	46
9. Isolation of Fish Sperm Flagella	
<i>Christèle Saudrais and Jean-Luc Gatti</i>	
I. Introduction	47
II. Media	48
III. Collection of Sperm	49
IV. Isolation of Axonemes	49
V. Isolation of Flagella	50
VI. Demembration and ATP Reactivation of Isolated Carp Sperm Flagella	50
VII. Conclusion	51
References	53

PART II Culture and Isolation of Ciliated Epithelial Cells and Cilia**10. Ciliogenesis of Rat Tracheal Epithelial Cells *in Vitro***

*Lawrence E. Ostrowski, Scott H. Randell, Alan B. Clark, Thomas E. Gray,
and Paul Nettesheim*

- I. Introduction 57
- II. Isolation and Culture of Cells 58
- III. Comments and Conclusions 61
- References 62

11. Preparation of Explant and Organ Cultures and Single Cells from Airway Epithelium

Ellen R. Dirksen, Jennifer A. Felix, and Michael J. Sanderson

- I. Introduction 65
- II. Methods 66
- References 73

12. Induction of Ciliogenesis in Oviduct Epithelium

Bernadette Chailley and Emmanuelle Boisvieux-Ulrich

- I. Introduction 75
- II. Methods 77
- III. Troubleshooting 79
- References 80

13. Preparation of Teleost Rod Inner and Outer Segments

Kathy Pagh-Roehl and Beth Burnside

- I. Introduction 83
- II. Method 85
- References 91

14. Isolation of Respiratory Cilia

Annette T. Hastie

- I. Introduction 93
- II. Materials 94
- III. Procedure 95
- References 97

PART III General Methods

15. Electrophoretic Separation of Dynein Heavy Chains

Gianni Piperno

- | | |
|---|-----|
| I. Introduction | 101 |
| II. Chemicals, Solutions, and Apparatus | 102 |
| III. Procedure | 103 |
| IV. Pitfalls | 104 |
| References | 105 |

16. Two-Dimensional Separation of Axonemal Proteins

Gianni Piperno

- | | |
|---|-----|
| I. Introduction | 107 |
| II. Chemicals, Solutions, and Apparatus | 108 |
| III. Procedure | 109 |
| IV. Advantages | 111 |
| V. Pitfalls | 111 |
| References | 111 |

17. Analysis of Flagellar Calcium-Binding Proteins

Tim Otter

- | | |
|------------------------------|-----|
| I. Background and Rationale | 113 |
| II. Materials | 115 |
| III. Diagonal Gel Procedures | 116 |
| References | 119 |

18. Phosphorylation of *Chlamydomonas* Flagellar Proteins

Robert A. Bloodgood and Nancy L. Salomonsky

- | | |
|---|-----|
| I. Introduction | 121 |
| II. <i>In Vivo</i> Labeling of <i>Chlamydomonas</i> Flagellar Proteins with [³² P]-Orthophosphoric Acid | 123 |
| References | 126 |

19. *In Situ* Glycosylation of Flagellar Lipids

S.-J. Chen, T. K. Rosiere, and G. Benjamin Bouck

- | | |
|---|-----|
| I. Introduction | 129 |
| II. Protocol for Demonstrating Glucosyltransferase Activity | 130 |
| III. Glucosyltransferase(s): Enrichment and Identification of Polyacrylamide Gels | 132 |
| References | 134 |

20. Detection of Flagellar Protein Kinases on Polyvinylidene Fluoride Membranes Following Sodium Dodecyl Sulfate–Polyacrylamide Gel Electrophoresis	
<i>Jovenal T. San Agustin and George B. Witman</i>	
I. Introduction	135
II. Methods	136
References	139
21. Measurement of ATPase Activity Using [γ-32P]ATP	
<i>Stephen M. King</i>	
I. Introduction	141
II. Methods	142
References	144
22. Nonradioactive Method for ATPase Assays	
<i>Osamu Kagami and Ritsu Kamiya</i>	
I. Introduction	147
II. Method	148
References	149

PART IV Structure

23. Immunoelectron Microscopy	
<i>Karl A. Johnson</i>	
I. Introduction	153
II. Primary Antibodies	153
III. Specimen Preparation	154
IV. Immunolabeling Technique	158
References	161
24. Immunofluorescence Microscopy of Cilia and Flagella	
<i>M. A. Sanders and J. L. Salisbury</i>	
I. Introduction	163
II. General Considerations	164
III. Reagents and Solutions	164
IV. Immunofluorescence of Ciliated and Flagellated Cells	165
V. Troubleshooting and Variations	168
References	168

25. Scanning Transmission Electron Microscopic Analysis of the Isolated Dynein ATPase	
<i>Silvio P. Marchese-Ragona and J. S. Wall</i>	
I. Introduction	171
II. Method	173
References	174
26. High-Resolution Negative Staining of the Isolated Dynein ATPase	
<i>Silvio P. Marchese-Ragona</i>	
I. Introduction	177
II. Method	178
References	181
27. Computer-Assisted Analysis of Flagellar Structure	
<i>Eileen O'Toole, David Mastronarde, J. Richard McIntosh, and Mary E. Porter</i>	
I. Introduction	183
II. Specimen Preparation and Electron Microscopy	184
III. Image Analysis	184
IV. Quantitative Analysis	190
References	191
28. Preparation of Cilia and Flagella for Thin-Section Transmission Electron Microscope Analysis	
<i>Harold J. Hoops</i>	
I. Introduction	193
II. Sources of Materials	194
III. Procedures	194
References	197
29. Fixation of Mammalian Spermatozoa for Electron Microscopy	
<i>David M. Phillips</i>	
I. Introduction	199
II. Choice of Fixative	199
III. Fixation of Sperm <i>in Situ</i>	200
IV. Fixation of Sperm in Suspension	201
V. Conclusion: A Few Hints	203
Reference	204

PART V Motors and Motion Analysis**30. Reactivation of *Chlamydomonas* Cell Models***Cynthia J. Horst and George B. Witman*

- I. Introduction 207
- II. Methods 208
- III. Comments 209
- References 210

31. Reactivation of Extracted *Paramecium* Models*Yutaka Naitoh*

- I. Introduction 211
- II. Methods 213
- References 223

32. Isolation and Reactivation of Newt Lung Respiratory Cilia*Robert Hard*

- I. Introduction 225
- II. Methods 226
- References 229

33. Reactivation of Motility of Demembrated Sea Urchin Sperm Flagella*Charles J. Brokaw*

- I. Introduction 231
- II. General Considerations 232
- III. Methods 233
- IV. Comments 235
- V. Extensions to Other Species 236
- VI. Algorithm for Calculating Recipes for Solutions 236
- VII. Health and Safety Considerations 237
- References 237

34. High-Speed Video Microscopy of Flagella and Cilia*Sumio Ishijima*

- I. Introduction 239
- II. Video Cameras 240
- III. Other Equipment 242
- IV. Procedure for Recording 243
- References 243

35. Micromanipulation of Sperm and Other Ciliated or Flagellated Single Cells	
<i>Sumio Ishijima</i>	
I. Introduction	245
II. Methods	246
References	249
36. Preparation and Reactivation of Demembrated, Cytosol-Free Ram Spermatozoa	
<i>Jovenal T. San Agustin and George B. Witman</i>	
I. Introduction	251
II. Methods	252
References	255
37. Microscopic Assays of Flagellar Dynein Activity	
<i>Winfield S. Sale and David R. Howard</i>	
I. Introduction	257
II. Methods	258
References	261
38. High-Resolution Imaging of Flagella	
<i>Keith G. Kozminski</i>	
I. Introduction	263
II. Methods	264
III. Conclusion	270
References	270
39. Flagellar Surface Motility: Gliding and Microsphere Movements	
<i>Robert A. Bloodgood</i>	
I. Introduction	273
II. Description of Gliding Motility	274
III. Procedures	274
IV. Nongliding Mutants	277
V. Perspectives	278
References	278
40. Assay of <i>Chlamydomonas</i> Phototaxis	
<i>Anthony G. Moss, Gregory J. Pazour, and George B. Witman</i>	
I. Introduction	281
II. Culture and Handling of <i>Chlamydomonas</i> Cells	282
III. Phototaxis Room Setup	282
IV. Equipment for Actinic Illumination of Cells during Assay	283

V. Phototaxis Chamber	284
VI. Microscopy	284
VII. Video Equipment	285
VIII. Analysis and Presentation	285
References	287

41. Quantification of Ciliary Beat Frequency and Metachrony by High-Speed Digital Video

Michael J. Sanderson and Ellen R. Dirksen

I. Introduction	289
II. Optimization of the Light Signal Waveform Produced by Beating Cilia	290
III. Quantification of Ciliary Metachronism	291
IV. Video Techniques for Measuring Ciliary Activity	292
V. A High-Speed Digital Video Photodetection Technique	292
VI. Summary	296
References	296

PART VI Cytoskeletal Preparations

42. Isolation and Fractionation of the *Tetrahymena* Cytoskeleton and Oral Apparatus

Norman E. Williams and Jerry E. Honts

I. Introduction	301
II. Methods	302
References	305

43. Release of the Cytoskeleton and Flagellar Apparatus from *Chlamydomonas*

Bruce E. Taillon and Jonathan W. Jarvik

I. Introduction	307
II. Strains and Reagents	308
III. Solutions	309
IV. Procedures	309
V. Additional Treatments	312
References	313

44. Purification of SF-Assemblin

Angela Bremerich, Karl-Ferdinand Lechtreck, and Michael Melkonian

I. Introduction	315
II. Methods	316
III. Comments	321
References	321

45. Purification of Basal Bodies and Basal Body Complexes from <i>Chlamydomonas reinhardtii</i>	
<i>Susan K. Dutcher</i>	
I. Introduction	323
II. Methods	324
III. Comparison of Protocols	329
IV. Components of Basal Body Complexes	329
V. Learning about Function	333
References	333
46. Preparation and Reactivation of <i>Spermatozopsis</i> Cytoskeletons	
<i>Karl-Ferdinand Lechtreck and Michael Melkonian</i>	
I. Introduction	335
II. Methods	338
References	339
47. Centrin-Based Contractile Fibers: Chromatographic Purification of Centrin	
<i>Andre T. Baron, Ramesh Errabolu, Jacquelyn Dinusson, and Jeffrey L. Salisbury</i>	
I. Introduction	341
II. Methods	342
III. Perspectives	349
References	349
PART VII Flagellar Fractionation and Membrane Characterization	
48. Isolation of Flagellar Paraxonemal Rod Proteins	
<i>Huân M. Ngô and G. Benjamin Bouck</i>	
I. Introduction	355
II. Methods	356
References	359
49. Preparation of Ciliary and Flagellar Remnants	
<i>Raymond E. Stephens</i>	
I. Introduction	361
II. Remnant Fractionation	362
References	364

50.	<i>In Vitro</i> Polymerization of Tubulin from Echinoderm Sperm Flagellar Microtubules	
	<i>Ryoko Kuriyama and Richard W. Linck</i>	
	I. Introduction	365
	II. Methods	366
	III. Discussion	371
	References	372
51.	Methods for the Isolation of Tektins and Sarkosyl-Insoluble Protofilament Ribbons	
	<i>Mark A. Pirner and Richard W. Linck</i>	
	I. Introduction	373
	II. Methods	376
	III. Discussion	378
	References	379
52.	Isolation of Radial Spoke Heads from <i>Chlamydomonas</i> Axonemes	
	<i>Gianni Piperno</i>	
	I. Introduction	381
	II. Method	382
	References	383
53.	Isolation of the Dense Fibers of Mammalian Sperm Flagella	
	<i>Monica Brito and Luis O. Burzio</i>	
	I. Introduction	385
	II. Methods	386
	III. Comments	388
	References	388
54.	Isolation of the Fibrous Sheath of Mammalian Sperm Flagella	
	<i>Monica Brito and Luis O. Burzio</i>	
	I. Introduction	391
	II. Methods	392
	III. Comments	394
	References	395
55.	Isolation and Fractionation of Ciliary Membranes from <i>Tetrahymena</i>	
	<i>William L. Dentler</i>	
	I. Introduction	397
	II. Methods	398
	References	400

56.	Measurement of Membrane Potential and Na⁺ and H⁺ Transport in Isolated Sea Urchin Sperm Flagella and Their Membrane Vesicles	
	<i>Lee Hon Cheung</i>	
	I. Introduction	401
	II. Methods	402
	References	406
57.	Nonradioactive Methods for Labeling and Identifying Membrane Surface Proteins	
	<i>William L. Dentler</i>	
	I. Introduction	407
	II. Methods	409
	References	411
58.	Fluorescence Labeling of Flagellar Membranes	
	<i>Robin Wright</i>	
	I. Introduction	413
	II. Cell Culture and Staining	415
	III. Prospects	418
	References	418
59.	Electrophysiology of Ciliates	
	<i>Hans Machemer</i>	
	I. Introduction	419
	II. Methods	420
	References	423
60.	Isolation of <i>Chlamydomonas</i> Mastigonemes	
	<i>Mitchell Bernstein</i>	
	I. Introduction	425
	II. Starting Material	426
	III. Extraction of Flagellar Membranes	427
	IV. Materials and Methods	428
	V. Analysis of Purified Mastigonemes	429
	References	430
61.	Ciliary Membrane Tubulin: Isolation and Fractionation	
	<i>Raymond E. Stephens</i>	
	I. Introduction	431
	II. Preparation of Membrane Tubulin by Reconstitution	432
	III. Additional Purification	434
	References	435

62. Peptide Receptors in Sea Urchin Sperm Flagella*Lawrence J. Dangott*

- | | |
|-----------------|-----|
| I. Introduction | 437 |
| II. Methods | 439 |
| III. Comments | 443 |
| References | 444 |

PART VIII Assay and Isolation of Flagellar Enzymes**63. Assaying Protein Phosphatases in Sperm and Flagella***Geracimo E. Bracho and Joseph S. Tash*

- | | |
|-------------------------|-----|
| I. Introduction | 447 |
| II. Methods | 448 |
| III. Concluding Remarks | 455 |
| References | 456 |

64. Flagellar Adenylyl Cyclases in *Chlamydomonas**Yuhua Zhang and William J. Snell*

- | | |
|---|-----|
| I. Introduction | 459 |
| II. Methods | 460 |
| III. Evaluating Parameters of the Assay Conditions | 463 |
| IV. Regulation of Gametic and Vegetative Adenylyl Cyclase | 463 |
| References | 465 |

65. Isolation and Characterization of Sea Urchin Flagellar Creatine Kinase*Robert M. Tombes*

- | | |
|-----------------|-----|
| I. Introduction | 467 |
| II. Methods | 468 |
| III. Summary | 471 |
| References | 471 |

66. Isolation and Characterization of Protein Kinases of*Paramecium Cilia**Gail L. Carlson and David L. Nelson*

- | | |
|--|-----|
| I. Introduction | 473 |
| II. Materials | 474 |
| III. Assays | 475 |
| IV. Properties of Protein Kinases | 475 |
| V. Isolation of Protein Kinases from Cilia | 477 |
| References | 480 |

67.	Isolation of Inner- and Outer-Arm Dyneins	
	<i>David R. Howard and Winfield S. Sale</i>	
	I. Introduction	481
	II. Isolation of Sea Urchin Sperm Axonemes and Dynein	482
	III. Isolation of <i>Chlamydomonas</i> Inner-Arm Dynein	483
	IV. Fractionation of Dyneins by Sucrose Density Gradient Zonal Centrifugation	484
	V. Other Considerations	485
	References	485
68.	Separation of Dynein Species by High-Pressure Liquid Chromatography	
	<i>Osamu Kagami and Ritsu Kamiya</i>	
	I. Introduction	487
	II. Solutions	488
	III. High-Pressure Liquid Chromatography System	489
	IV. Procedure	489
	References	489
69.	Reconstitution of Dynein Arms <i>in Vitro</i>	
	<i>Elizabeth F. Smith</i>	
	I. Introduction	491
	II. Methods for Isolating Axonemes, Extracted Axonemes, and Dynein	492
	III. Assessing Reconstitution	493
	IV. Precautions	495
	References	495
70.	Inhibitors of the Dynein ATPase and Ciliary or Flagellar Motility	
	<i>Takashi Shimizu</i>	
	I. Introduction	497
	II. Inhibition Kinetics	498
	III. Vanadate	498
	IV. Aluminum Fluoride	499
	V. <i>erythro-9-[3-(2-Hydroxyonyl)]adenine</i>	500
	VI. Other Inhibitors	500
	References	501
71.	Vanadate-Mediated Photolysis of Dynein Heavy Chains	
	<i>Stephen M. King</i>	
	I. Introduction	503
	II. Methods	504
	References	506

72. Modified Nucleotides as Probes for Dynein*Charlotte K. Omoto*

- | | |
|--|-----|
| I. Introduction | 507 |
| II. Synthesis and Purification | 508 |
| III. Using Anthraniloyl ATP and Methylanthraniloyl ATP | 509 |
| References | 510 |

PART IX Genetics and Molecular Tools for the Analysis of Cilia and Flagella**73. Transformation of *Chlamydomonas reinhardtii****Julie A. E. Nelson and Paul A. Lefebvre*

- | | |
|-----------------|-----|
| I. Introduction | 513 |
| II. Materials | 514 |
| III. Procedure | 514 |
| References | 516 |

74. Insertional Mutagenesis and Isolation of Tagged Genes in *Chlamydomonas**Lai-Wa Tam and Paul A. Lefebvre*

- | | |
|-----------------|-----|
| I. Introduction | 519 |
| II. Methods | 521 |
| References | 523 |

75. Molecular Mapping of Genes for Flagellar Proteins in *Chlamydomonas**Carolyn D. Silflow, Pushpa Kathir, and Paul A. Lefebvre*

- | | |
|-----------------|-----|
| I. Introduction | 525 |
| II. Methods | 527 |
| References | 529 |

76. Mating and Tetrad Analysis in *Chlamydomonas reinhardtii**Susan K. Dutcher*

- | | |
|--|-----|
| I. Introduction | 531 |
| II. Mating of Flagellated Strains | 532 |
| III. Mating of Aflagellated Strains | 535 |
| IV. Tetrad Analysis | 536 |
| V. Constructing Diploid Strains | 538 |
| VI. Meiotic Analysis of Stable Diploid Strains | 539 |
| References | 539 |

77. Strategies for the Isolation of Flagellar Motility and Assembly Mutants in <i>Chlamydomonas</i>	
<i>Ritsu Kamiya</i>	
I. Introduction	541
II. Procedure	542
References	543
78. Epitope Tagging of Flagellar Proteins	
<i>Dennis R. Diener</i>	
I. Introduction	545
II. Uses of Epitope Tagging	546
III. Principal Aspects of Epitope Tagging	547
IV. Conclusion	549
References	549
79. Enrichment of mRNA Encoding Flagellar Proteins	
<i>Laura R. Keller</i>	
I. Introduction	551
II. Methods	552
III. Practical Considerations	555
References	556
80. DNA-Mediated Transformation in <i>Tetrahymena</i>	
<i>Jacek Gaertig and Martin A. Gorovsky</i>	
I. Introduction	559
II. Transformation Strategies in <i>Tetrahymena</i>	560
III. Methods for Introducing Transforming DNA into <i>Tetrahymena thermophila</i>	563
References	568
81. Strategies for the Isolation of Ciliary Motility and Assembly Mutants in <i>Tetrahymena</i>	
<i>David G. Pennock and Martin A. Gorovsky</i>	
I. Introduction	571
II. Materials	572
III. Special Procedures and Equipment	573
IV. Strains	573
V. Bringing Recessive Micronuclear Mutations to Macronuclear Expression	574
VI. Chemical Mutagenesis	574
VII. Screening for Temperature-Sensitive Ciliary Assembly or Motility Mutants	575

VIII. Rescreening Putative Regeneration/Motility Mutants	576
References	577
82. Identification of New Dynein Heavy-Chain Genes by RNA-Directed Polymerase Chain Reaction	
<i>David J. Asai and Peggy S. Criswell</i>	
I. Introduction	579
II. Methods	580
References	585
Index	587
Volumes in Series	599
