List of contributors xiv
Preface xvii
Acknowledgments xix

1 Methodological concerns in puberty-related research 1
CHRIS HAYWARD

Part 1 Sex differences in hormones and their effect at puberty

2 The biology of puberty: new developments in sex differences 17
PATRICIA Y. FECHNER

3 Hormonal changes at puberty and the emergence of gender differences in internalizing disorders 29
KATHERINE SANBORN AND CHRIS HAYWARD

Part 2 Girls at puberty

4 Puberty and body image 61
ERIC STICE

5 Gender differences in opposite sex relationships: interactions with puberty 77
LAURA COMPIAN AND CHRIS HAYWARD

6 Aggression, psychopathology, and delinquency: influences of gender and maturation – where did all the good girls go? 93
STEPHANIE R. HAWKINS, SAMANTHA PIA MILLER, AND HANS STEINER
Part 3 Boys at puberty

7 Boys at puberty: psychosocial implications
JENICA HUDDLESTON AND XIAOJIA GE

Part 4 Puberty and psychopathology

8 Puberty and depression
ADRIAN ANGOLD, CAROL WORTHMAN, AND E. JANE COSTELLO

9 Puberty and schizophrenia
ANDREW GOTOWIEC, MARY V. SEEMAN, AND ROBIN Z. COHEN

Part 5 Pubertal timing: antecedents

10 Childhood sexual abuse and pubertal timing: implications for long-term psychosocial adjustment
TANYA A. BERGEVIN, WILLIAM M. BUKOWSKI, AND LEIGH KARAVASILIS

11 Psychosocial factors predicting pubertal onset
LAURIE L. MESCHKE, PAMELA JO JOHNSON, BONNIE L. BARBER, AND JACQUELYNNE S. ECCLES

Part 6 Pubertal timing: consequences

12 Short-term and long-term consequences of early versus late physical maturation in adolescents
KARINA WEICHOLD, RAINER K. SILBEREISEN, AND EVA SCHMITT-RODERMUND

13 When coming of age means coming undone: links between puberty and psychosocial adjustment among European American and African American girls
ALICE MICHAEL AND JACQUELYNNE S. ECCLES

Part 7 Puberty and context

14 Puberty in context
JULIA A. GRABER

Index
1.1 Hypothetical outcome data showing stratification by age and Tanner Stage. This figure shows an age effect but no pubertal stage effect

1.2 Hypothetical outcome data showing stratification by age and Tanner Stage. This figure shows a pubertal stage effect but no age effect

1.3 Hypothetical outcome data showing stratification by age and Tanner Stage. This figure shows an additive age and pubertal stage effect

1.4 Hypothetical outcome data showing stratification by age and Tanner Stage. This figure shows an interaction effect between age and pubertal stage. The interaction in this figure represents an early pubertal timing effect

1.5 Survival curves using hypothetical outcome data comparing those with early pubertal timing and those with nonearly pubertal timing. This figure demonstrates a short-term early pubertal timing effect

1.6 Survival curves using hypothetical outcome data comparing those with early pubertal timing and those with nonearly pubertal timing. This figure demonstrates a long-term early pubertal timing effect

1.7 Survival curves using hypothetical outcome data comparing those with early pubertal timing and those with nonearly pubertal timing. This figure demonstrates no early pubertal timing effect

3.1 Potential CNS effects of estrogen at puberty

3.2 Hypothetical interaction between hormonal changes at puberty and predisposing factors: HPA axis disregulation in girls with a history of trauma

6.1 Age-specific prevalence of self-reported violent offending
6.2 Gender differences in clinically significant behaviors
6.3 Gender differences in committing offenses
8.1 Four potential pathways linking puberty and depression
8.2 Relationship between sex steroid level and depression
8.3 Relationship between sex steroid level and mean life event counts
9.1 Comparison of the relationship between age at first psychotic symptoms and puberty onset for females and males
10.1 Schematic representation of the general model that guided the analyses of the associations between abuse history, pubertal timing, relationship experiences (i.e., compliance), and affective outcomes
10.2 Association between sexual abuse and pubertal timing as a function of physical abuse for boys and girls (higher pubertal timing scores indicate a later entry into puberty)
10.3 Association between sexual abuse, physical abuse, and compliance in dating relationships
10.4 Association between sexual abuse and compliance as a function of pubertal timing
10.5 Association between physical abuse and compliance as a function of pubertal timing
10.6 Association between sexual abuse and depression for boys and girls
10.7 Association between pubertal timing and depression for boys and girls
12.1 Model for development of problem behaviors during puberty
13.1 Timing of menarche for African American and European American girls
13.2 Girls’ eating symptoms: interaction of menarche and ethnic group
13.3 Girls’ self-esteem: interaction of menarche and ethnic group
