CONTRIBUTORS TO VOLUME 246	ix
PREFACE	xi
VOLUMES IN SERIES	xiii

1. Why Spectroscopy? Which Spectroscopy?	KENNETH SAUER	1
--	---------------	---

Section I. Ultraviolet/Visible Spectroscopy

2. Optical Spectroscopy: General Principles and Overview	IGNACIO TINOCO, JR.	13
--	---------------------	----

A. Absorption and Circular Dichroism

3. Absorption and Circular Dichroism Spectroscopy of Nucleic Acid Duplexes and Triplexes	DONALD M. GRAY, SU-HWI HUNG, AND KENNETH H. JOHNSON	19
4. Circular Dichroism	ROBERT W. WOODY	34
5. Bioinorganic Spectroscopy	EDWARD I. SOLOMON, MARTIN L. KIRK, DANIEL R. GAMELIN, AND SABINE PULVER	71
6. Magnetic Circular Dichroism	JOHN C. SUTHERLAND	110
7. Low-Temperature Spectroscopy	ROBERT H. AUSTIN AND SHYAMSUNDER ERRAMILI	131

B. Transient Absorption and Kinetics

8. Rapid-Scanning Ultraviolet/Visible Spectroscopy Applied in Stopped-Flow Studies	PETER S. BRZOVIĆ AND MICHAEL F. DUNN	168
9. Transient Absorption Spectroscopy in Study of Processes and Dynamics in Biology	HERBERT VAN AMERONGEN AND RIENK VAN GRONDELLE	201
10. Hole Burning Spectroscopy and Physics of Proteins	JOSEF FRIEDRICH	226

C. Linear Dichroism and Fluorescence

11. Polarized Optical Spectroscopy of Chromoproteins	HERBERT VAN AMERONGEN AND WALTER S. STRUVE	259
12. Fluorescence Anisotropy Applied to Biomolecular Interactions	DAVID M. JAMESON AND WILLIAM H. SAWYER	283
13. Fluorescence Resonance Energy Transfer	PAUL R. SELVIN	300
14. Time-Resolved Fluorescence Spectroscopy	ALFRED R. HOLZWARTH	334
15. Covalent Labeling of Proteins and Nucleic Acids with Fluorophores	ALAN WAGGONER	362

Section II. Vibrational Spectroscopy

16. Biomolecular Vibrational Spectroscopy	RICHARD A. MATHIES	377
17. Raman Spectroscopy of DNA and Proteins	WARNER L. PETICOLAS	389
18. Resonance Raman Spectroscopy of Metalloproteins	THOMAS G. SPIRO AND ROMAN S. CZERNUSZEWICZ	416
19. Structure and Dynamics of Transient Species Using Time-Resolved Resonance Raman Spectroscopy	JAMES R. KINCAID	460
20. Infrared Spectroscopy Applied to Biochemical and Biological Problems	F. SIEBERT	501

Section III. Magnetic Resonance Spectroscopy, X-Ray Spectroscopy

21. Perspectives on Magnetic Resonance and X-Ray Absorption Spectroscopy in Biochemistry	MELVIN P. KLEIN	529
22. Electron Paramagnetic Resonance Spectroscopy	GARY W. BRUDVIG	536
23. Protein Structure and Mechanism Studied by Electron Nuclear Double Resonance Spectroscopy	VICTORIA J. DEROSE AND BRIAN M. HOFFMANN	554
24. Electron Spin Labels	GLENN L. MILLHAUSER, WAYNE R. FIORI, AND SIOBHAN M. MIICK	589
25. Optically Detected Magnetic Resonance of Photoexcited Triplet States	AUGUST H. MAKI	610
26. X-Ray Absorption Spectroscopy and Applications in Structural Biology	VITTAL K. YACHANDRA	638

Section IV. Special Topics

27. Component Resolution Using Multilinear Models	ROBERT T. ROSS AND SUE LEURGANS	679
28. Ultraviolet/Visible Spectroelectrochemistry of Redox Proteins	SHAOJUN DONG, JIANJUN NIU, AND THERESE M. COTTON	701
29. Digital Imaging Spectroscopy for Massively Parallel Screening of Mutants	DOUGLAS C. YOUVAN, ELLEN GOLDMAN, SIMON DELAGRAVE, AND MARY M. YANG	732
30. Diode Array Detection in Liquid Chromatography	HUGO SCHEER	749
