Preface	V
Contributors	IX
Introduction to the Series "Game Equilibrium Models"	1
Introduction to Volume IV: "Social and Political Interaction"	3
<i>Werner Güth and Reinhard Selten</i>	
MAJORITY VOTING IN THE CONDORCET PARADOX AS A PROBLEM OF EQUILIBRIUM SELECTION	7
1. Introduction	7
2. Games in Normal Form	10
3. Uniform Perturbations	12
4. The Condorcet Game	12
5. The Structure of Equilibrium Selection Theory	15
6. The Reduced Perturbed Condorcet Game	16
7. Initial Candidates	19
8. Dominance	21
9. The Tracing Procedure	21
10. The Limit Solution of Non-Degenerate Condorcet Games	24
11. The Structure of the Limit Solution	28
12. Degenerate Condorcet Games	32
<i>Jan Potters, Frans van Winden and Michael Mitzkewitz</i>	
DOES CONCESSION ALWAYS PREVENT PRESSURE?	41
1. Introduction	41
2. The Standard Game	42
3. The Extended Game	45
4. Admissible Equilibria of the Two-Period Extended Game	46
5. The Harsanyi-Selten Solution of the Two-Period Extended Game	50
6. Conclusions	52
Appendix A	53
Appendix B	56
<i>Reinhard Selten and Jonathan Pool</i>	
THE DISTRIBUTION OF FOREIGN LANGUAGE SKILLS AS A GAME EQUILIBRIUM	64
1. Introduction	64
2. The Model	73
3. Equilibrium Points and the Structure of Group Best Replies	76
4. Monotone Group Strategies and Aggregated Games	79
5. Existence of Equilibrium Points	84
<i>Roy Gardner</i>	
RESISTING THE DRAFT. A PERFECT EQUILIBRIUM APPROACH	88
1. Introduction	88
2. Model and Notation	90
3. Reluctant Volunteers and Perfect Equilibrium	94
4. Resistance and Perfect Equilibrium	96
5. Institutional Variations on the Draft	100

Dirk Wendt

ALTRUISM IN SOCIAL DILEMMAS - FAILURE TO CATCH IT IN A PARAMETER	103
Study 1	107
Study 2	109
Study 3	111
Individual Strategies	112
Study 4	116
Study 5	117
Alternative Strategies and Models	120

Barry O'Neill

THE STRATEGY OF CHALLENGES: TWO BEHEADING GAMES IN MEDIAEVAL LITERATURE	124
Sir Gawain and the Green Knight	124
Daring as a Formal Game: Version I	128
The Daring Game II: The Green Knight's Secret Knowledge	132
The Daring Game III: Playing By Pretending to Play	132
The Feast of Bricriu	136
A One-Person Two-Player Game	139
Game Theory and Literary Analysis	140
Superpower Rivalry in the Third World	142
Appendix: Calculating the Equilibria	144

Reinhard Selten

BALANCE OF POWER IN A PARLOR GAME	150
1. Introduction	150
2. Changing Alliances - A Parlor Game	152
3. Comments on the Rules of <i>Changing Alliances</i>	159
4. A Theoretical Model	162
5. The Solution of the Theoretical Model	168
6. Discounted Payoffs	200
7. The Interpretation of the Solution	205

Roy Gardner and Werner Güth

MODELLING ALLIANCE FORMATION: A NONCOOPERATIVE APPROACH	210
I. Introduction	210
II. Alliance Formation and Ideological Relatedness	211
III. Military Technology and Alliance Formation	217
IV. Alliance Formation with Superpowers: An Incomplete Information Game	221
V. Conclusion	226

Werner Güth

THE (STABILITY OF THE) WESTERN DEFENSE ALLIANCE - A GAME THEORETIC ANALYSIS - ..	229
I. Introduction	229
II. Incomplete Information about Western Europe's Security Interests	232
III. On Allocating the Cost for American Protection of Western Europe	240
IV. Conclusions	252

Rudolf Avenhaus, Werner Güth, and Reiner K. Huber

IMPLICATIONS OF THE DEFENSE EFFICIENCY HYPOTHESIS FOR THE CHOICE OF MILITARY FORCE STRUCTURES. PART I: GAMES WITH AND WITHOUT COMPLETE INFORMATION ABOUT THE ANTAGONIST'S INTENTIONS	256
1. Defense Efficiency Hypothesis	256
2. Completely Informed Players	258
3. Incompletely Informed Players	275

Rudolf Avenhaus, Werner Güth, and Reiner K. Huber

IMPLICATIONS OF THE DEFENSE EFFICIENCY HYPOTHESIS FOR THE CHOICE OF MILITARY FORCE STRUCTURES. PART II: A SEQUENTIAL GAME INCLUDING THE POSSIBILITY OF RESTRUCTURING FORCES	289
1. Defense Efficiency Hypothesis	289
2. Game Model and Solution Requirements	293
3. The Class of Games with Considerable Resource Costs of Restructuring Armed Forces	297
4. Games with Minor Resource Costs of Restructuring Armed Forces	310
5. Final Remarks	315

Rudolf Avenhaus, Akira Okada, and Shmuel Zamir

INSPECTOR LEADERSHIP WITH INCOMPLETE INFORMATION	319
1. Introduction	320
2. The Nuclear Material Safeguards Example	323
3. Simple Inspection Games	326
4. Deterrence and Commitment	337
5. Inspector Leadership with Incomplete Information	343
6. Applications	355
