Preface	V
Contributors	IX
Introduction to the Series "Game Equilibrium Models"	1
Introduction to Volume I: "Evolution and Game Dynamics"	3
 <i>Ilan Eshel</i>	
GAME THEORY AND POPULATION DYNAMICS IN COMPLEX GENETICAL SYSTEMS: THE ROLE OF SEX IN SHORT TERM AND IN LONG TERM EVOLUTION	6
1. Game Theory and the Dynamics of Evolutionary Changes in Complex Sexual Systems - The Problem.....	6
2. Selective Gene Substitution and Long Term Convergence to an ESS in a Viability Population Game	9
3. Other Relevant Payment Functions and Evolutionary Genetic Stability (EGS)	12
4. Is It Possible to Infer a (Long Term) Game Structure From the (Short Term) Population Dynamics?.....	14
5. The Role of Sex in Short and in Long Term Evolution.....	18
6. Summary	22
Discussion	22
 <i>Franz J. Weissing</i>	
EVOLUTIONARY STABILITY AND DYNAMIC STABILITY IN A CLASS OF EVOLUTIONARY NORMAL FORM GAMES	29
1. Introduction	30
2. Notation and Basic Definitions	34
3. Nash Equilibrium Strategies of RSP-Games	36
4. Evolutionary Stability in RSP-Games	42
5. Stability with Respect to the Continuous Replicator Dynamics.....	47
6. Stability with Respect to the Discrete Replicator Dynamics.....	60
7. Complex Attractors of the Discrete Replicator Dynamics	76
8. Are RSP-Games Played in Biological Populations?.....	93
 <i>Reinhard Selten</i>	
ANTICIPATORY LEARNING IN TWO-PERSON GAMES	98
1. Introduction	99
2. Regular Equilibrium Points	101
3. The Preliminary Model	105
4. The Anticipatory Learning Process	118
5. Special Stability Conditions	140
6. Anticipated Anticipations	148
7. Concluding Remark.....	153
 <i>Rolf F. Hoekstra, Yoh Iwasa and Franz J. Weissing</i>	
THE ORIGIN OF ISOGAMOUS SEXUAL DIFFERENTIATION	155
1. Introduction	155
2. A General Model for the Evolution of Mating Types.....	157
3. Some Specific Models.....	175
4. Conclusions	180

Roy Gardner and Molly Morris

THE EVOLUTIONARY STABILITY OF BLUFFING IN A CLASS OF EXTENSIVE FORM GAMES	182
I. Introduction	182
II. Evolutionary Dynamics of an Extensive Form Game	183
III. Evolutionarily Stable Strategies	185
IV. Biological Interpretations	189
V. Discussion	192

Reinhard Selten and Avi Shmida

POLLINATOR FORAGING AND FLOWER COMPETITION IN A GAME EQUILIBRIUM MODEL	195
1. Introduction	195
2. The Decision Problem of a Pollinator	202
3. Heuristic Discussion of Optimal Pollinator Foraging	209
4. Derivation of Results on Optimal Foraging	213
5. The Critical Level of the Microhabitat Quality	216
6. Pollen Flow	220
7. The Investment Game	229
8. Necessary Conditions for Strong Evolutionary Stability in the Investment Game	231
9. Sufficient Conditions for Strong Evolutionary Stability in the Investment Game	234
10. Parameter Influences	242
11. Discussion	246

James W. Friedman and Peter Hammerstein

TO TRADE, OR NOT TO TRADE; THAT IS THE QUESTION	257
1. Introduction	257
2. A Summary of the Field Observation of the Hamlet	258
3. A Simplified Model of Mating Behavior	260
4. Optimal Behavior and Equilibrium	265
5. The Scope for Male Specialization	268
6. Concluding Comments	274

Hans J. Poethke and Franz J. Weissing

COMPETITION AVOIDANCE IN A DRAGONFLY MATING SYSTEM	276
1. Introduction	276
2. The Information Situation at the Mating Place	278
3. The Low Density Case	281
4. A General Normal Form Game	283
5. Evolutionary Stability in Games with Strategy-Payoff Feedback	293
6. Numerical Results	297
7. A Game Model with Switching Costs	301

David Messick

ON THE EVOLUTION OF GROUP-BASED ALTRUISM	304
1. Introduction	304
2. Mechanisms for the Evolution of Altruism	305
3. The Model	308
4. Psychological Implications	320
