Contents

Introduction 1

1 Axiomatic Utility Theory under Risk 8

1.1 Historical Overview 9

1.2 The Axiomatic Basis of Expected Utility Theory 14

1.3 The Empirical Evidence against the Independence Axiom 20

1.4 Non-Linear Utility Theory under Risk 23

1.4.1 Weighted Linear Utility Theory 23

1.4.2 Theories with the Betweenness Property 26

1.4.3 Anticipated Utility Theory 28

1.4.4 The Dual Theory 30

1.4.5 The General Rank-Dependent Utility Model . . 32

1.4.6 Implicit Rank-Linear Utility Theory 37

2 A Rank-Dependent Utility Model with Prize-Dependent Distortion of Probabilities 40

2.1 Rank-Dependent Utility Theory Reconsidered 42

2.1.1 The Generalized Utility Function 42

2.1.2 Absolute Continuity 45

2.1.3 The Set of Elementary Lotteries 49

2.2 Homogeneity on Elementary Lotteries 50

2.2.1 The Common Ratio Effect 52

2.2.2 The Allais Paradox 53

2.3 Further Evidence for Prize-Dependent Distortions of Probabilities 55
2.4 A Characterization Theorem 56
2.5 Rank-Dependent Utility Theory and Relative Utility . 58
2.6 A Generalized Model 62

3 Risk Aversion **67**
3.1 Risk Aversion in the General Rank-Dependent Utility Model 69
3.2 Risk Aversion and Homogeneity 75
3.3 Decreasing Risk Aversion 80
3.4 The Friedman-Savage Hypothesis 82

Conclusion **88**
