Contents

PART I PHILOSOPHY OF SCIENCE:
Rationality, Growth, Ignorance, Objectivity, and Criticism

1. The Problems, 3

2. The Decline of Logical Positivism, 7

3. The Pendulum Swings in the Other Direction: Sociological Explanations in Science, 12
   Michael Polanyi: Personal and Tacit Knowledge, 12
   Ludwik Fleck: Denkollektiv and Denkstil, 14
   Thomas Kuhn’s Scientific Revolutions, 16

4. The Popperian School, 27
   Sir Karl Popper, 27
   Hume’s Problem, or the Problem of Induction, 29
   Critical Rationalism and the Tie to Falsification, 29
   Why Falsification Fails, 32
   Imre Lakatos: Metaphysics Transformed into the Methodology of Scientific Research Programs, 35
   The Revival of the Duhem Thesis, 38
   Behind the Methodology of Scientific Research Programs, 39
   Paul Feyerabend, the “Dadasoph,” 44
   “Anything Goes!” and Proliferation, 45
   What Feyerabend Is Actually Against Is Modern Education, 48
   Why Feyerabend Is Really a Rationalist in Disguise, or Why Feyerabend Doesn’t Deserve to Be a
   “Darling of the Left,” 49
   Dadasophia or Dadasophistry? 50
   William Bartley: Pancritical Rationalism, 53

5. Whither the History of Science? 77
   History and the Philosophy of Science, 77
   Stephen Toulmin, 79
   Norwood Russell Hanson, 81

6. Conclusions, 85
PART II  ECONOMICS AND THE PHILOSOPHY OF SCIENCE

7. Philosophy's Influence on Economics: Early Exchanges, 91

8. Sir Karl Popper's Philosophy of the Social Sciences:
   A Disjointed Whole, 103
   Economics: Queen of the Social Sciences, 104
   The Polemical Element: The Case Against Historicism, 108
   Rationality and Situational Logic, 111
   Why Falsification in Economics Fails, 116
   The Neglected Messages: Clarity and Criticism as Objective Method, 129

9. Lakatos and Kuhn: Science as Consensus, 142
   Why Economicus Academicus Chose Lakatos as His Darling, 144
   Semantics Revisited: How "Paradigm" and "Research Program" Have Come to
   Mean Anything and Everything, 144
   Paradigms and SRPs Applied, 145
   The Drive to Be "Normal Scientists," 146
   How "Normal" Are Economists? 150
   Why No Normal Scientist Would Ever Want to Be Either "Normal" or "Revolutionary," 151
   A Short
   Digression on the Development of Economics as a
   Profession, 152
   Communis opinio doctorum, 167

Appendix I  A Short History of the Is–Ought Problem, 181
Appendix II  Economists Whose First Work or Works Deal with
   Methodological and/or Philosophical Topics, 184

Bibliography, 186
Author Index, 235
Subject Index, 244
