

CONTENTS

1 INTRODUCTION	1
2 PARAMETERS AND SOLUTIONS OF LINEAR ECONOMIC MODELS	3
2.1 Linear multi-equation econometric models	3
2.2 Input-output models	5
2.3 Tabular survey of linear multi-equation econometric models and Leontief input-output models presented .	6
3 TOLERANCE ANALYSIS IN THE CASE OF DIRECT IMPACTS: INDE- PENDENT AND RECURSIVE SYSTEMS	8
3.1 Tolerance analysis in independent equation systems	8
3.2 Tolerance analysis in recursive equation systems ..	9
4 TOLERANCE ANALYSIS IN THE CASE OF INDIRECT IMPACTS: INTERDEPENDENT EQUATION SYSTEMS	10
4.1 General remarks	10
4.2 Tolerance analysis of elements of the matrix B (B-tolerance)	11
4.3 Tolerance analysis of elements of the matrix C (C-tolerance)	14
4.4 Tolerance analysis in input-output models	26
4.4.1 Indirect effects of changing input coeffi- cients	26
4.4.2 Tolerance of input coefficients	28
5 SUMMARY AND OUTLOOK	30
BIBLIOGRAPHY	32
APPENDIX	34
