

# CONTENTS

<i>Introduction</i>	Claude Lenfant	<i>iii</i>
<i>Preface</i>		<i>v</i>
<i>Contributors</i>		<i>ix</i>
<b>1. Introduction to Chemokines</b>		<b>1</b>
<i>Albert Zlotnik</i>		
I. Introduction		1
II. Nomenclature System for Chemokine Ligands and Receptors		4
III. Interspecies Chemokine Homology: Therapeutic Implications		5
IV. Genomic Evolution of the Chemokine Superfamily: Functional Significance		6
V. Chemokine Receptors: Role in Tumor Cell Migration		7
VI. Conclusions		9
References		9

<b>2. Chemokine Receptors: Signaling Mechanisms and Roles in Immunoregulation</b>	<b>11</b>
<i>Ji-Liang Gao and Philip M. Murphy</i>	
I. Introduction	11
II. Chemokine Receptor Repertoire and Specificity for Leukocytes and Ligands	12
III. Chemokine Receptors Signal Primarily Through G <sub>i</sub> -Linked Pathways	13
IV. Chemokine Receptor Roles in Immunoregulation	16
V. Cooperation of Chemokine Receptors In Vivo	25
VI. Conclusions	27
References	28
<b>3. Regulation of Chemokine Expression by STAT Proteins</b>	<b>37</b>
<i>Mark H. Kaplan</i>	
I. Introduction	37
II. Stat1	38
III. Stat4	39
IV. Stat6	41
V. BCL-6	42
VI. Conclusions	43
References	43
<b>4. The Role of Chemokines in Lymphocyte Trafficking to Lymph Nodes of the Lung</b>	<b>47</b>
<i>Kevin C. Wilson, William W. Cruikshank, and David M. Center</i>	
I. Introduction	47
II. Chemotaxis	48
III. Movement of T Lymphocytes from the Blood into the Lymph Nodes	49
IV. Movement of T Lymphocytes Within the Secondary Lymphoid Tissues	51
V. Diseases of the Lung	52
VI. B Lymphocytes	55
VII. Dendritic Cells	56
VIII. Summary	59
References	59

<b>5. Genetic Models to Study Chemokine Biology in the Lung</b>	<b>65</b>
<i>Sergio A. Lira, Galya Vassileva, Shu-Cheng Chen, Nicholas W. Lukacs, Stephen W. Chensue, Theodore J. Standiford, Borna Mehrad, and Donald N. Cook</i>	
I. Introduction	65
II. Chemokine Ligands	66
III. Chemokine Receptors	69
IV. Conclusions	74
References	76
<b>6. The Role of Chemokines in Asthmatic Airway Responses</b>	<b>81</b>
<i>Cory M. Hogaboam, Jane M. Schuh, Alison E. John, and Nicholas W. Lukacs</i>	
I. Introduction	81
II. Sources of Chemokines in the Asthmatic Lung	82
III. Chemokines and Eosinophil Recruitment and Activation	84
IV. T-Lymphocyte Accumulation and Asthma	84
V. Chemokines and T-Lymphocyte Responses	86
VI. Viral Infections, Chemokines, and Asthma Exacerbation	86
VII. Airway Remodeling, Chemokines, and Asthma	88
VIII. Summary	90
References	90
<b>7. Chemokines in Chronic Obstructive Pulmonary Disease</b>	<b>99</b>
<i>Zarin Brown and Emma M. Campbell</i>	
I. Introduction	99
II. Chemokines and Chemokine Receptors Superfamily: Current Status	100
III. Chronic Obstructive Pulmonary Disease	100
IV. Role of Chemokines in Animal Models of Lung Injury	105
V. Future Directions	108
References	109
<b>8. Pulmonary Inflammation in Cystic Fibrosis: Mechanisms and Consequences</b>	<b>113</b>
<i>David W. H. Riches</i>	
I. Introduction	113
II. Pathophysiology of Cystic Fibrosis	114
III. Pulmonary Inflammation in Cystic Fibrosis	120
IV. Mechanisms of Pulmonary Inflammation	124

V.	Future Challenges	134
	References	135
<b>9.</b>	<b>Chemokines in Infectious Diseases of the Lung</b>	<b>145</b>
	<i>Theodore J. Standiford, Wan C. Tsai, and Borna Mehrad</i>	
I.	Lung Antimicrobial Host Defense: Overview	145
II.	Chemokines as Mediators of Pulmonary Host Defense	146
III.	Role of CXC Chemokines/Receptors in Lung Antimicrobial Host Defense	147
IV.	Role of ELR <sup>-</sup> CXC Chemokines/Receptors in Lung Antimicrobial Host Defense	155
V.	Role of CC Chemokines/Receptors in Lung Antimicrobial Host Defense	156
VI.	Conclusions	160
	References	161
<b>10.</b>	<b>Chemokines and HIV</b>	<b>171</b>
	<i>Brian R. Lane and David M. Markovitz</i>	
I.	Introduction	171
II.	RANTES/CCL5, MIP-1 $\alpha$ /CCL3, and MIP-1 $\beta$ /CCL4 Can Suppress HIV Replication	172
III.	CD4 Is Necessary, But Not Sufficient, for HIV-1 Entry	173
IV.	CXCR4 and CCR5 Are HIV Coreceptors	173
V.	Clinical Studies Suggest the Involvement of RANTES, MIP-1 $\alpha$ , and MIP-1 $\beta$ in HIV Pathogenesis	175
VI.	Genetic Evidence for the Importance of Chemokines and Their Receptors in HIV-1 Pathogenesis	175
VII.	Alternative HIV Coreceptors	176
VIII.	Coreceptor Expression and Cellular Tropism	176
IX.	HIV Induces Signals via Chemokine Receptors	177
X.	RANTES and SDF-1 $\alpha$ Can Stimulate HIV-1 Replication Under Certain Circumstances	178
XI.	Other Chemokines Affect HIV-1 Pathogenesis	178
XII.	HIV Infection and the Lung	179
XIII.	Summary	180
	References	181
<b>11.</b>	<b>Chemokines in Acute Lung Injury</b>	<b>189</b>
	<i>Thomas R. Martin and Richard B. Goodman</i>	
I.	Introduction	189
II.	Pathophysiology of ARDS	190
III.	Chemokines and Lung Inflammation	192

IV.	Measurement Issues	194
V.	Chemokines in Clinical Studies of ARDS	195
VI.	Strategies for Inhibiting Chemokines in ARDS	212
VII.	Future Directions	213
	References	214
<b>12.</b>	<b>Chemokines in Granulomatous Lung Inflammation</b>	<b>221</b>
	<i>Stephen W. Chensue, Akihiro Matsukawa, Cory M. Hogaboam, and Steven L. Kunkel</i>	
I.	Introduction	221
II.	The Chemokine Supergene Families of Ligands and Receptors	223
III.	Cytokines, Chemokines, and Granulomatous Inflammation	225
IV.	Animal Models of Chronic Lung Disease	226
V.	Conclusion	232
	References	233
<b>13.</b>	<b>Chemokines in Pulmonary Fibrosis</b>	<b>239</b>
	<i>Michael P. Keane, John A. Belperio, and Robert M. Strieter</i>	
I.	Introduction	239
II.	The CXC Chemokines	241
III.	The CC Chemokines	248
IV.	Conclusion	253
	References	254
<b>14.</b>	<b>Chemokines and Chemokine Receptors in the Pathogenesis of Lung Allograft Rejection</b>	<b>261</b>
	<i>John A. Belperio, Michael P. Keane, David J. Ross, and Robert M. Strieter</i>	
I.	Introduction	261
II.	Rejection and Lung Transplantation	262
III.	Chemokines and Chemokine Receptors	264
IV.	Chemokines and Chemokine Receptors and Acute Lung Allograft Rejection	266
V.	CXC Chemokines/Chemokine Receptors During Acute Lung Allograft Rejection	274
VI.	Fractalkine/CX <sub>3</sub> CL1 and Its Interaction with CX <sub>3</sub> CR1 During Acute Lung Allograft Rejection	279
VII.	The Role of Chemokines/Chemokine Receptors During Chronic (BOS) Lung Allograft Rejection	281

VIII. Conclusion	285
References	286
<b>15. Chemokines in Lung Cancer</b>	<b>297</b>
<i>Robert M. Strieter, John A. Belperio, Roderick J. Phillips, Steven M. Dubinett, and Michael P. Keane</i>	
I. Introduction	297
II. Involvement of Chemokines in Cellular Transformation	298
III. Involvement of Chemokines in the Regulation of Angiogenesis in Tumors	299
IV. Evidence That Chemokines Are Involved in Tumor Cell Invasion	311
V. Evidence That Chemokines Are Involved in the Recruitment of Leukocytes to the Tumor	313
VI. Evidence That Chemokines Regulate the Pattern of Organ-Specific Metastasis	315
VII. Conclusion	316
References	316
<b>16. Chemokines in Pleural Disorders</b>	<b>325</b>
<i>Veena B. Antony and Nasreen Najmunnisa</i>	
I. Introduction	325
II. Chemokines and Chemokine Receptors in Infectious Disease	326
III. Chemokines and Chemokine Receptors in Malignant Disease	330
IV. Chemokines and Pleurodesis	333
V. Chemokines and Asbestos-Induced Pleural Disease	333
VI. Other Functions of Chemokines	334
VII. Conclusion	335
References	335
