

DETAILED TABLE OF CONTENTS

PART I BASIC INCOME AND THE PARASITISM OBJECTION	1
1 Basic income confronted with some popular ideas of justice	
1.1 Introduction	5
1.2 Self-reliance	9
1.3 Reciprocity: not only the truly lazy	16
1.4 Basic income and the work ethic	19
Summary and conclusions	21
2 Rawlsian justice and basic income	
2.1 Introduction	23
2.2 Rawlsian justice	23
2.3 The principle of fair opportunity	26
2.4 The inherent bias in the difference principle	29
2.5 How to evaluate Lazy's leisure?	33
2.6 Evaluating Lazy's leisure	34
2.7 Unequal distributed wealth	36
Summary and conclusions	38
3 Basic income and unemployment	
3.1 Introduction	41
3.2 The level of the basic income	44
3.3 Hamminga's thought experiment	47
3.4 A model with dichotomous preferences	51
3.5 The equivalent model of a basic income scheme	61
3.6 (Un)employment rents	66
Summary and conclusions	68
Appendix A model with continuous preferences	70
4 Compensatory justice and basic income	
4.1 Introduction	73
4.2 The economist's view on compensatory justice	74
4.3 The objective approach	80
4.4 The balancing approach	82
4.5 General background conditions of compensatory justice	87
4.6 Compensatory justice in a basic income scheme compared to a conditional scheme	89
4.6.1 The work- and means-test	91
4.6.2 Full employment, minimum wages and conditions of employment legislation	94
4.7 Compensatory justice and parasitism	96
Summary and conclusions	100

PART II FOUR EXPLORATIONS IN THE ECONOMICS OF BASIC INCOME

5 An alternative route to a basic income: The transition from conditional to unconditional social security	
5.1 Introduction	111
5.2 Basic features of conditional and unconditional social security	112
5.3 The impossibility theorem: A basic income is either too low to be socially acceptable or too high to be economically feasible	114
5.4 A partial basic income	116
5.5 An alternative route	121
5.6 Part-time workers	128
5.7 A differential basic income	129
Summary and conclusions	131
6 Why launch a basic income experiment	
6.1 Introduction	133
6.2 What we need to know	135
6.3 A note about the main effects	138
6.4 Basic income versus negative income tax	142
6.5 The New Jersey income-maintenance experiment	144
6.5.1 The design of the New Jersey experiment	147
6.5.2 The operations, surveys, and administration	148
6.6 Lessons drawn from the New Jersey experiments	150
6.7 Design of a new basic income experiment	152
Summary and conclusions	160
7 Basic income social security in an efficiency wage economy	
7.1 Introduction	161
7.2 Efficiency wages and social security arrangements	163
7.3 A dual labor market with conditional social security	165
7.4 A dual labor market with unconditional social security	169
7.5 Conditions to be met	171
7.6 A numerical example	173
Summary and conclusions	176
Appendix	178
8 Trade unions' response to basic income	
8.1 Introduction	181
8.2 Tax level and tax internalization effects	182
8.3 Tax level and tax internalization effects on unions' wage bargaining strategy under basic income social security	184
8.4 Trade unions' response to conditional and to basic income social security	189
8.5 Simulation results of the model	197
Summary and conclusions	203

FIGURES

3.1	Optimal allocations of consumption and leisure	51
3.2	The price of Labour Rights and unemployment income as a function of the participation rate	56
3.3	The relationship between the tax rate, the overall participation rate and the level of basic income	63
4.1	Compensatory payments required compared to the next best alternative	77
5.1	Conditional social security with poverty trap and minimum wage, and unconditional social security	118
5.2	A partial basic income	120
5.3	Conditional social security with limited retained earnings	122
5.4	Conditional social security with maximum retained earnings	123
5.5	Tax allowance equal to the minimum wage	125
5.6	Tax allowance equal to the minimum wage with a partial basic income	126
6.1.A	Income-leisure opportunity set for someone with a relatively high preference for leisure	139
6.1.B	Income-leisure opportunity set for someone with a relatively low preference for leisure	139
6.2	Labour supply response with post-tax income initially on break-even level	141
6.3	Labour supply response of a full-time minimum wage worker	142
6.4	Basic income and negative income tax schemes	143
6.5	Conditional social security and unconditional social security	153
6.6	Conditional and unconditional social security for a breadwinner family	154
8.1	Optimum wage and employment benefits without tax internalization	187
8.2	Iso-union-utility curves for different values for the rate of substitution between wages and employment	190
8.3.A	(Un)employment for both schemes	200
8.3.B	Net income of the (un)employed under both schemes	201
8.3.C	Production, profits and union utility under both schemes	202

TABLES

1.1	Support for workfare and basic income among a representative sample of the Dutch population	7
3.1	Classification of the potential labour force according to labour market status and motivation under conditional social security	48
3.2	Maximum sustainable unemployment benefits	57
3.3	Overview of the outcomes for different values of the feasible participation rate	59
6.1	The Negative-Income-Tax Plans Used in the New Jersey Experiment	147
7.1	Outcomes of the model of (un)conditional social security ($\beta_s=0.8$)	174
7.2	Conditions to be met	175
7.3	Outcomes of the model of (un)conditional social security ($\beta_s=0.5$)	175
7.4	Conditions to be met	176
8.1	Outcomes of the model for different values of the social security parameters	198
