

TABLE OF CONTENTS

I.	INTRODUCTION	1
II.	MULTIPLE ATTRIBUTE DECISION MAKING — AN OVERVIEW	16
2.1	Basics and Concepts	16
2.2	Classifications of MADM Methods	19
2.2.1	Classification by Information	20
2.2.2	Classification by Solution Aimed At	24
2.2.3	Classification by Data Type	24
2.3	Description of MADM Methods	24
	Method (1): DOMINANCE	27
	Method (2): MAXIMIN	28
	Method (3): MAXIMAX	29
	Method (4): CONJUNCTIVE METHOD	30
	Method (5): DISJUNCTIVE METHOD	31
	Method (6): LEXICOGRAPHIC METHOD	32
	Method (7): LEXICOGRAPHIC SEMIORDER METHOD	33
	Method (8): ELIMINATION BY ASPECTS (EBA)	34
	Method (9): LINEAR ASSIGNMENT METHOD (LAM)	35
	Method (10): SIMPLE ADDITIVE WEIGHTING METHOD (SAW)	36
	Method (11): ELECTRE (Elimination et Choice Translating Reality)	37
	Method (12): TOPSIS (Technique for Order Preference by Similarity to Ideal Solution)	38
	Method (13): WEIGHTED PRODUCT METHOD	40
	Method (14): DISTANCE FROM TARGET METHOD	41
III.	FUZZY SETS AND THEIR OPERATIONS	42
3.1	Introduction	42
3.2	Basics of Fuzzy Sets	43
3.2.1	Definition of a Fuzzy Set	43

3.2.2	Basic Concepts of Fuzzy Sets	45
3.2.2.1	Complement of a Fuzzy Set	45
3.2.2.2	Support of a Fuzzy Set	46
3.2.2.3	α -cut of a Fuzzy Set	46
3.2.2.4	Convexity of a Fuzzy Set	47
3.2.2.5	Normality of a Fuzzy Set	48
3.2.2.6	Cardinality of a Fuzzy Set	48
3.2.2.7	The m^{th} Power of a Fuzzy Set	49
3.3	Set-Theoretic Operations with Fuzzy Sets	49
3.3.1	No Compensation Operators	52
3.3.1.1	The Min Operator	52
3.3.2	Compensation-Min Operators	53
3.3.2.1	Algebraic Product	53
3.3.2.2	Bounded Product	53
3.3.2.3	Hamacher's Min Operator	53
3.3.2.4	Yager's Min Operator	54
3.3.2.5	Dubois and Prade's Min Operator	54
3.3.3	Full Compensation Operators	57
3.3.3.1	The Max Operator	57
3.3.4	Compensation-Max Operators	57
3.3.4.1	Algebraic Sum	57
3.3.4.2	Bounded Sum	58
3.3.4.3	Hamacher's Max Operator	58
3.3.4.4	Yager's Max Operator	58
3.3.4.5	Dubois and Prade's Max Operator	59
3.3.5	General Compensation Operators	60
3.3.5.1	Zimmermann and Zysno's θ Operator	61
3.3.6	Selecting Appropriate Operators	62
3.4	The Extension Principle and Fuzzy Arithmetics	63

3.4.1	The Extension Principle	64
3.4.2	Fuzzy Arithmetics	66
3.4.2.1	Fuzzy Number	66
3.4.2.2	Addition of Fuzzy Numbers	69
3.4.2.3	Subtraction of Fuzzy Numbers	73
3.4.2.4	Multiplication of Fuzzy Numbers	76
3.4.2.5	Division of Fuzzy Numbers	79
3.4.2.6	Fuzzy Max and Fuzzy Min	82
3.4.3	Special Fuzzy Numbers	86
3.4.3.1	L-R Fuzzy Number	87
3.4.3.2	Triangular (or Trapezoidal) Fuzzy Number	88
3.4.3.3	Proof of Formulas	89
3.4.3.3.1	The Image of Fuzzy Number N	94
3.4.3.3.2	The Inverse of Fuzzy Number N	95
3.4.3.3.3	Addition and Subtraction	96
3.4.3.3.4	Multiplication and Division	97
3.5	Conclusions	99
IV.	FUZZY RANKING METHODS	101
4.1	Introduction	101
4.2	Ranking Using Degree of Optimality	114
4.2.1	Baas and Kwakernaak's Approach	114
4.2.2	Watson et al.'s Approach	125
4.2.3	Baldwin and Guild's Approach	127
4.3	Ranking Using Hamming Distance	134
4.3.1	Yager's Approach	137
4.3.2	Kerre's Approach	143
4.3.3	Nakamura's Approach	147
4.3.4	Kolodziejczyk's Approach	158

4.4	Ranking Using α -Cuts	165
4.4.1	Adamo's Approach	166
4.4.2	Buckley and Chanas' Approach	168
4.4.3	Mabuchi's Approach	169
4.5	Ranking Using Comparison Function	182
4.5.1	Dubois and Prade's Approach	183
4.5.2	Tsukamoto et al.'s Approach	199
4.5.3	Delgado et al.'s Approach	203
4.6	Ranking Using Fuzzy Mean and Spread	217
4.6.1	Lee and Li's Approach	217
4.7	Ranking Using Proportion to The Ideal	225
4.7.1	McCahone's Approach	225
4.8	Ranking Using Left and Right Scores	233
4.8.1	Jain's Approach	234
4.8.2	Chen's Approach	238
4.8.3	Chen and Hwang's Approach	246
4.9	Ranking with Centroid Index	252
4.9.1	Yager's Centroid Index	252
4.9.2	Murakami et al.'s Approach	255
4.10	Ranking Using Area Measurement	259
4.10.1	Yager's Approach	259
4.11	Linguistic Ranking Methods	265
4.11.1	Efstathiou and Tong's Approach	266
4.11.2	Tong and Bonissone's Approach	274
5.	FUZZY MULTIPLE ATTRIBUTE DECISION MAKING METHODS	289
5.1	Introduction	289
5.2	Fuzzy Simple Additive Weighting Methods	292
5.2.1	Baas and Kwakernaak's Approach	293
5.2.2	Kwakernaak's Approach	301

5.2.3	Dubois and Prade's Approach	306
5.2.4	Cheng and McInnis's Approach	315
5.2.5	Bonissone's Approach	323
5.3	Analytic Hierarchical Process (AHP) Methods	329
5.3.1	Saaty's AHP Approach	331
5.3.2	Laarhoven and Pedrycz's Approach	339
5.3.3	Buckley's Approach	351
5.4	Fuzzy Conjunctive/Disjunctive Method	371
5.4.1	Dubois, Prade, and Testemale's Approach	371
5.5	Heuristic MAUF Approach	385
5.6	Negi's Approach	395
5.7	Fuzzy Outranking Methods	407
5.7.1	Roy's Approach	409
5.7.2	Siskos et al.'s Approach	419
5.7.3	Brans et al.'s Approach	432
5.7.4	Takeda's Approach	450
5.8	Maximin Methods	454
5.8.1	Bellman and Zadeh's Approach	455
5.8.2	Yager's Approach	460
5.9	A New Approach to Fuzzy MADM Problems	465
5.9.1	Converting Linguistic Terms to Fuzzy Numbers	466
5.9.2	Converting Fuzzy Numbers to Crisp Scores	474
5.9.3	The Algorithm	476
VI.	CONCLUDING REMARKS	487
6.1	MADM Problems and Fuzzy Sets	487
6.2	On Existing MADM Solution Methods	488
6.2.1	Classical Methods for MADM Problems	488
6.2.2	Fuzzy Methods for MADM Problems	488
6.2.2.1	Fuzzy Ranking Methods	489

6.2.2.2 Fuzzy MADM Methods	489
6.3 Critiques of the Existing Fuzzy Methods	489
6.3.1 Size of Problem	490
6.3.2 Fuzzy vs. Crisp Data	490
6.4 A New Approach to Fuzzy MADM Problem Solving	491
6.4.1 Semantic Modeling of Linguistic Terms	491
6.4.2 Fuzzy Scoring System	492
6.4.3 The Solution	492
6.4.4 The Advantages of the New Approach	493
6.5 Other Multiple Criteria Decision Making Methods	493
6.5.1 Multiple Objective Decision Making Methods	493
6.5.2 Methods of Group Decision Making under Multiple Criteria	494
6.5.2.1 Social Choice Theory	494
6.5.2.2 Experts Judgement/Group Participation	498
6.5.2.3 Game Theory	498
6.6 On Future Studies	501
6.6.1 Semantics of Linguistic Terms	501
6.6.2 Fuzzy Ranking Methods	502
6.6.3 Fuzzy MADM Methods	503
6.6.4 MADM Expert Decision Support Systems	503

VII. BIBLIOGRAPHY	505
