Preface

vii

Part One Probability and expectation

| | | |
|----------|---------------------------------------|-----------|
| 1 | Probability | 3 |
| 1.1 | Introduction | 3 |
| 1.2 | Some definitions | 3 |
| 1.3 | How we measure probability | 4 |
| 1.4 | The three approaches to probability | 5 |
| 1.5 | The laws of probability | 6 |
| 1.6 | Tree diagrams | 12 |
| 1.7 | Conditional probability | 14 |
| | Review questions | 20 |
| 2 | Probability distributions | 24 |
| 2.1 | Introduction | 24 |
| 2.2 | What is a probability distribution? | 24 |
| 2.3 | The binomial distribution | 25 |
| 2.4 | The Poisson distribution | 29 |
| | Review questions | 33 |
| 3 | The normal distribution | 35 |
| 3.1 | Introduction | 35 |
| 3.2 | Standard scores | 35 |
| | Review questions | 41 |
| 4 | Decision criteria: expectation | 43 |
| 4.1 | Introduction | 43 |
| 4.2 | Decision criteria | 43 |
| 4.3 | Which criteria? | 46 |
| 4.4 | Expected monetary value | 47 |
| 4.5 | The value of perfect information | 48 |
| 4.6 | Multi-stage decision analysis | 49 |
| 4.7 | Revising probabilities | 52 |
| | Review questions | 56 |

Part Two Elementary forecasting

| | | |
|----------|---------------------------------|-----------|
| 5 | The time series | 61 |
| 5.1 | Introduction | 61 |
| 5.2 | The components of a time series | 61 |

| | | |
|---|---|------------|
| 5.3 | The calculation of trend | 63 |
| 5.4 | The trend of a quarterly series | 65 |
| 5.5 | The calculation of seasonal variation | 66 |
| 5.6 | Series with seasonal variation eliminated | 67 |
| 5.7 | The importance of residuals | 69 |
| 5.8 | Forecasting from the time series | 70 |
| 5.9 | Additive or multiplicative model? | 72 |
| | Review questions | 73 |
| 6 | Regression and correlation | 75 |
| 6.1 | Introduction | 75 |
| 6.2 | Bivariate distributions | 75 |
| 6.3 | Regression | 77 |
| 6.4 | Curve fitting | 83 |
| 6.5 | Correlation | 85 |
| | Review questions | 92 |
| Part Three Sampling, estimation and significance | | |
| 7 | Sample design | 97 |
| 7.1 | Introduction | 97 |
| 7.2 | The sampling frame | 98 |
| 7.3 | Systematic sampling | 98 |
| 7.4 | Stratified sampling | 99 |
| 7.5 | Multi-stage sampling | 100 |
| 7.6 | Cluster sampling | 101 |
| 7.7 | Quota sampling | 101 |
| 8 | Sampling and confidence limits | 103 |
| 8.1 | Introduction | 103 |
| 8.2 | The sampling distribution of sample means | 103 |
| 8.3 | The sampling distribution of sample proportions | 105 |
| 8.4 | The sampling distribution of sums and differences | 106 |
| 8.5 | Confidence limits | 109 |
| 8.6 | Summary | 111 |
| | Review questions | 111 |

| | | |
|--|---|------------|
| 9 | Estimation | 113 |
| 9.1 | Introduction | 113 |
| 9.2 | Estimating a population mean | 113 |
| 9.3 | Estimating a population proportion | 115 |
| 9.4 | Determining the sample size | 116 |
| 9.5 | Estimating a population variance | 117 |
| 9.6 | Degrees of freedom | 120 |
| 9.7 | Pooled estimates of the population mean | 120 |
| 9.8 | Finite population adjustments | 121 |
| | Review questions | 122 |
| 10 | Hypothesis testing | 124 |
| 10.1 | Introduction | 124 |
| 10.2 | Type 1 errors | 124 |
| 10.3 | Type 2 errors | 126 |
| 10.4 | Significance testing | 129 |
| 10.5 | One-sided and two-sided tests | 131 |
| | Review questions | 132 |
| 11 | Statistical significance | 133 |
| 11.1 | Introduction | 133 |
| 11.2 | Tests of significance | 133 |
| 11.3 | Test of population means using large samples | 135 |
| 11.4 | Testing for a difference between means | 136 |
| 11.5 | Tests of population means using small samples | 138 |
| 11.6 | Tests of proportions | 143 |
| 11.7 | Conclusion | 145 |
| | Review questions | 146 |
| 12 | The chi-square test | 148 |
| 12.1 | Introduction | 148 |
| 12.2 | The chi-square test | 149 |
| 12.3 | Observed and expected frequencies | 149 |
| 12.4 | Errors resulting from the use of χ^2 | 151 |
| 12.5 | Contingency tables | 153 |
| 12.6 | Conclusion | 155 |
| | Review questions | 156 |
| Part Four Analytical techniques | | |
| 13 | Inventories | 161 |
| 13.1 | Introduction | 161 |
| 13.2 | Inventory costs | 161 |
| 13.3 | An inventory model | 162 |
| 13.4 | The effect of discounts | 167 |
| 13.5 | Dealing with uncertainty | 168 |
| 13.6 | Production run models – the economic batch quantity | 169 |
| | Review questions | 171 |

| | | |
|-----------|--|------------|
| 14 | Queuing and simulation | 172 |
| 14.1 | Introduction | 172 |
| 14.2 | Types of queueing situations | 172 |
| 14.3 | A sample queueing model | 173 |
| 14.4 | Simulation | 175 |
| 14.5 | Monte Carlo methods | 175 |
| 14.6 | A queueing model | 179 |
| 14.7 | An inventory model | 181 |
| | Review questions | 185 |
| 15 | Inequalities and linear programming | 189 |
| 15.1 | Introduction | 189 |
| 15.2 | Inequalities | 189 |
| 15.3 | Ordered pairs | 191 |
| 15.4 | Simultaneous linear orderings | 192 |
| 15.5 | Linear expressions and linear programming | 193 |
| 15.6 | Profit maximisation – two-dimensional model | 197 |
| 15.7 | Tips on drawing the diagrams | 198 |
| 15.8 | Cost minimisation | 198 |
| | Review questions | 201 |
| 16 | The Simplex method | 203 |
| 16.1 | Introduction | 203 |
| 16.2 | The detached coefficient method | 203 |
| 16.3 | Linear programming: Simplex method | 206 |
| 16.4 | Lifting the constraints: scarcity value | 211 |
| 16.5 | A mixed inequalities example | 212 |
| | Review questions | 219 |
| 17 | Transportation and assignment | 222 |
| 17.1 | Introduction | 222 |
| 17.2 | The Simplex form of the transportation problem | 222 |
| 17.3 | A first feasible solution: the ‘Northwest Corner’ method | 223 |
| 17.4 | Finding an improved feasible solution | 224 |
| 17.5 | Reallocation routes | 225 |
| 17.6 | The optimum solution | 228 |
| 17.7 | Shadow costs | 229 |
| 17.8 | Degeneracy | 233 |
| 17.9 | A better method of obtaining a first feasible solution | 237 |
| 17.10 | Solution of transportation matrices when supply and demand are not equal | 239 |
| 17.11 | A problem involving maximisation | 241 |
| 17.12 | An assignment problem | 242 |
| 17.13 | The Hungarian method | 243 |

| | | |
|-----------|---|------------|
| 17.14 | Summary of the Hungarian method | 245 |
| | Review questions | 246 |
| 18 | Network analysis: project planning | 250 |
| 18.1 | Introduction | 250 |
| 18.2 | Network symbols | 250 |
| 18.3 | Precedence tables | 251 |
| 18.4 | The <i>ij</i> event numbering rule | 253 |
| 18.5 | Dummy activities | 254 |
| 18.6 | Finding the total project time | 257 |
| 18.7 | The critical path | 258 |
| 18.8 | Float | 260 |
| 18.9 | Project summary tables | 261 |

| | |
|---|-----|
| 18.10 Gantt charts: 'loading' the network | 262 |
| 18.11 Progress charts | 264 |
| 18.12 Dealing with uncertainty – project evaluation and review technique (PERT) | 264 |
| 18.13 Decreasing the total project time | 265 |
| Review questions | 268 |
| <i>Specimen examination questions</i> | 270 |
| <i>Answers</i> | 280 |
| <i>Tables</i> | 304 |
| <i>Index</i> | 308 |
