<i>List of figures</i>	vii
<i>List of tables</i>	ix
<i>Notes on contributors</i>	xi
<i>Preface</i>	xv

Part I: Introduction: Industrial change and regional development

- | | | |
|---|--|---|
| 1 | Structural change and the spatial organisation of the productive system: an introduction | 3 |
| | <i>Georges Benko and Mick Dunford</i> | |

Part II: Social relations, industrial organisation and comparative economic development

- | | | |
|---|--|----|
| 2 | Two social strategies in the production of new industrial spaces | 27 |
| | <i>Danièle Leborgne and Alain Lipietz</i> | |
| 3 | Industrial trajectories and social relations in areas of new industrial growth | 51 |
| | Mick Dunford | |

Part III: The Italian industrial districts

- | | | |
|---|---|-----|
| 4 | The Italian model of spatial development in the 1970s and 1980s | 85 |
| | <i>Gioacchino Garofoli</i> | |
| 5 | The industrial district as a creative milieu | 102 |
| | <i>Giacomo Becattini</i> | |

Part IV: Flexible production, large firms and spatial organisation

- | | | |
|---|--|-----|
| 6 | Oligopoly is alive and well: notes for a broader discussion of flexible accumulation | 117 |
| | <i>Flavia Martinelli and Erica Schoenberger</i> | |
| 7 | Technical flexibility and mass production: flexible specialisation and dynamic flexibility | 134 |
| | <i>Benjamin Coriat</i> | |

8	Towards a spatial reorganisation of the German car industry? The implications of new production concepts <i>Eike Schamp</i>	159
9	The determinants of the location of the semiconductor industry <i>Isabelle Geneau de Lamalière</i>	171
Part V: New technologies, new models of economic organisation, and the development of metropolitan systems		
10	New models of production organisation and trends in spatial development <i>Pierre Veltz</i>	193
11	French high tech and space: a double cleavage <i>Pierre Beckouche</i>	205
12	Economic change and the development of new zones for economic activities in the Paris agglomeration in the 1980s <i>Jacques Malézieux</i>	226
13	The rise of a technological complex: some comments on the Phoenix case <i>Claude Manzagol</i>	237
14	Cities in transformation: the case of West Germany <i>Stefan Krätke</i>	250
Part VI: Conclusion and further directions		
15	New industrial spaces: realities, theories and doctrines <i>Paul Claval</i>	275
16	Neo-Fordism or post-Fordism? Some conclusions and further remarks <i>Mick Dunford and Georges Benko</i>	286
	<i>Bibliography</i>	306
	<i>Index</i>	324

List of figures

1.1	Theories of regulation: the key concepts	8
1.2	Stylised historical models of the regulation of employment and wages	9
1.3	Intensive accumulation: two virtuous cycles	11
1.4	The flexible firm	16
1.5	System of relationships between characteristics of IT industries and their spatial organisation	22
3.1	The social relations of capitalist production	54
3.2	Social relations and social strategies in areas of new industrial growth	56
3.3	Strategies of integration and the structure of costs	59
3.4	The development of Grenoble's electronics sector	64
3.5	The development of SEMS	65
3.6	Spin-offs from SEMS, 1976-84	66
4.1	The ratio between industrial employment and population in the Italian provinces in 1971 and 1981	90
4.2	The territorial articulation of the industrialisation process in Italy in 1981	91
4.3	Italian demographic change, 1961-81	93
7.1	Programmable automation and the lowering of the cost frontier	139
7.2	Experience curves for old and new products	144
7.3	A comparison of experience curves for inflexible and flexible technologies	147
7.4	Technological flexibility, product life cycles and strategies of valorisation	153
8.1	The spatial distribution of the car industry in West Germany by BLFR regions	161
8.2	The location of new branch plants of selected suppliers of plastic shock absorbers	165
9.1	The growth of world sales of integrated circuits and investments in assembly units in South-East Asia	175

9.2	'Crossed' investments between industrialised countries in manufacturing, assembly and testing facilities	177
9.3	The effects of constraints on location	179
9.4	The network of constraints on American semiconductor firms	180
9.5	The location of Japanese semiconductor operations	184
9.6	The specific needs of firms and the comparative advantage of Japan in the mid-1970s	185
9.7	The network of constraints on Japanese semiconductor firms in the years following the VLSI plan	186
9.8	Japanese design centres for 'gate-array' circuits in 1984	188
11.1a	Electronics-sector employment: manual workers	217
11.1b	Electronics-sector employment: engineers and executives	218
11.2	The 'abstract' functions of high-tech industries and upstream periproductive services by ZPIU	219
12.1	The Central Basin and the Ile-de-France region	233
13.1	The Phoenix area	238
13.2	Employment in manufacturing industry in Maricopa County, 1964-85	239
13.3	Arizona's net migration, 1975-85	243
14.1	Regional distribution of high-tech information-technology companies in 1986	256
14.2	Economic growth of West German urban regions, 1974-84	266
14.3	Economic potential of West German urban regions in 1984	267
14.4	West German urban hierarchy	270
16.1	Strategies of integration	293
16.2	The urban and regional systems	299
16.3	From Fordism to . . .? Alternative work and employment relations	303

List of tables

1.1	The growth of real output over the long swings	5
2.1	The new wage relations	37
2.2	The organisation of work and urban regions	41
3.1	International division of labour in US semiconductor production selected companies and location, <i>circa</i> 1985-8	63
3.2	State intervention: aid for and reorganisation of the French, German and UK electronics sectors	71
3.3	The Plan Composants of 1978-82: version 1	72
3.4a	Inward investments handled by Locate in Scotland	73
3.4b	Offers of Regional Selective Assistance in Scotland in 1984-85	73
3.5	The growth of major countries' electronics markets, production and balance of trade, 1976-86	74
3.6	Electronics sales and employment growth of major companies by country, 1976-86	74
4.1	The distribution of manufacturing employment by size of firm in 1951-81	88
4.2	Changes in the number of local units and industrial employment in the Italian regions in 1971-81	89
4.3	The spatial concentration of industrial employment: the share of national employment in the main industrial provinces in 1971-81	92
9.1	New investments in semiconductor production and assembly facilities in 1979-83	176
11.1	The share of national employees in activities with a high technological content in Ile-de-France in 1980 and 1987	208
11.2	The share of national jobs in the functions of production in the productive sphere in the Paris ZPIU	209
11.3	Indicators of the position of Paris in the national productive system	210
11.4	The (slow) decline in the share of Paris in research jobs in French industrial enterprises	210

List of tables

11.5	The functional distribution of engineers and executives in a large French electronics group	212
11.6	The share of engineers and executives in research and development by type of task	213
11.7	The share of the Paris ZPIU in national industrial employment by sectors and functions of production	215
11.8	The share of the Paris ZPIU in upstream periproductive service jobs	215
11.9	The share of the Paris ZPIU in employment in each sector	216
11.10	The two cornerstones of Paris's high tech	220
11.11	The share of the aeronautical and electronics sectors in the financing of military research and development in 1986	220
12.1	Industrial properties started in 1983-87	234
13.1	The leading high-tech firms in Maricopa County in 1987	240
13.2	Manufacturing employment in Maricopa County in 1984	241
