Figures	VI
Tables.....	IX
1 Introduction	1
1.1 Digital information markets	1
1.2 Research goal	2
1.3 Related research projects at the Institute for Information Management at USG	4
1.4 Thesis overview.....	5
2 Knowledge, information and knowledge dissemination	7
2.1 Introduction	7
2.2 Information characteristics	8
2.2.1 Shannon & Weaver’s information measure	8
2.2.2 Definition and properties of information	10
2.2.3 Knowledge and information.....	11
2.3 The knowledge medium	12
2.3.1 Knowledge representation and processing in open environments	12
2.3.2 Semantics	13
2.3.3 Context	14
2.3.4 Reasoning and representation.....	14
2.3.5 Microtheories and due process	17
2.3.6 Federative knowledge bases.....	17
2.3.7 Coordination.....	18
2.3.8 Openness	20
2.3.9 Definition of knowledge medium	21
2.4 Concepts in representing quantitative knowledge.....	23
2.4.1 Measurement	23
2.4.2 The concept of quantitative knowledge and quantitative information	25
2.4.3 Representing quantitative knowledge with Q-Calculus	27
2.4.4 Reasoning with quantitative knowledge	32
2.5 The production of quantitative information in the knowledge medium.....	38
2.5.1 Process chains, agents and activities	38
2.5.2 Knowledge processing in the quantitative knowledge medium.....	40

2.5.3 Quantitative tables: A concept for knowledge transfer	43
2.6 Integration of heterogeneous knowledge bases	44
2.6.1 Vocabulary integration	44
2.6.2 Integrating relational databases	49
2.7 Change management in the knowledge medium	51
2.8 Summary	54
3 The market's characteristics as an organizational framework for self-regulating federative environments	56
3.1 Introduction	56
3.2 The concept of self regulation	57
3.3 Fundamental characteristics of a competitive market	59
3.3.1 Markets and self-regulation	59
3.3.2 Definitions	60
3.3.3 The exchange process	61
3.3.4 Market optimum	61
3.3.5 Convergence criteria for optimum	64
3.3.6 The nature of market transactions	64
3.4 Market efficiency and performance	66
3.4.1 Market inefficiency and failure	66
3.4.2 Transaction costs	67
3.4.3 Asymmetric information	67
3.4.4 Information efficiency	68
3.4.5 Market fragmentation	69
3.4.6 Measures of market performance	70
3.4.7 Arbitrage in fragmented markets	70
3.5 Market institutions	71
3.5.1 Objective of the market institution	71
3.5.2 General characteristics of market institutions	71
3.5.3 Bilateral search	72
3.5.4 Auctions	73
3.5.5 One-sided auctions	73
3.5.6 Two sided auctions	74
3.5.7 Strategic considerations: The choice of the optimal market institution	74
3.5.8 Empirical analysis of price convergence	76
3.6 Summary	78

4 Information and knowledge as economic resources.....	80
4.1 Introduction	80
4.2 Information as a good in a competitive market.....	80
4.2.1 Objectives of a market for quantitative information	80
4.2.2 The value chain in information production	81
4.2.3 Pricing information goods.....	83
4.2.4 Information as a public good.....	85
4.2.5 Product differentiation.....	86
4.2.6 Price discrimination strategies	89
4.2.7 Semantic fragmentation.....	90
4.3 Quality aspects of information	90
4.3.1 Information as a homogeneous good	90
4.3.2 Subjectiveness of quality.....	91
4.3.3 Quality uncertainty and the market system	91
4.3.4 Quality rating.....	92
4.4 Legal aspects in the electronic distribution and processing of information ..	93
4.4.1 Overview	93
4.4.2 Privacy laws on personal data.....	94
4.4.3 Data encryption	94
4.4.4 Intellectual property rights	95
4.4.5 Collecting authorities	98
4.5 Markets and evolution.....	100
4.5.1 The demand-driven perspective	100
4.5.2 Market prices in the context of an information market.....	101
4.5.3 Knowledge evolution and the information market's self-regulative capabilities	103
4.6 Summary	105
5 The design of a market for quantitative information	107
5.1 Introduction	107
5.2 Electronic commerce and the MQI	107
5.2.1 Design principles of the MQI.....	107
5.2.2 Generic market services	108
5.2.3 Electronic product catalogs	109
5.2.4 Contracting services	110
5.2.5 Trusted third parties	110
5.2.6 Payment services.....	111
5.2.7 Logistics	112

5.2.8 Summary	113
5.3 Traded goods	113
5.3.1 Trading intangible property	113
5.3.2 Licenses	114
5.3.2.1 Overview.....	114
5.3.2.2 Identity of information.....	114
5.3.2.3 Access and disclosure of q-tables	115
5.3.2.4 Reference licenses	117
5.3.2.5 Re-trading licenses.....	118
5.3.2.6 Expiration of copyrights	118
5.3.3 Futures and subscriptions	119
5.3.3.1 Futures	119
5.3.3.2 Subscriptions.....	120
5.4 Market organization.....	120
5.4.1 Market participants	120
5.4.2 Market processes and roles	121
5.4.2.1 Overview.....	121
5.4.2.2 Brokers.....	122
5.4.2.3 Dealers	123
5.4.3 Quality assessment.....	123
5.4.4 Orders	125
5.4.4.1 Fundamentals	125
5.4.4.2 Order execution and information production	126
5.4.4.3 Basic buy orders	127
5.4.4.4 Reference orders	130
5.4.4.5 Subscriptions.....	131
5.4.4.6 Futures	132
5.4.4.7 Sell orders	132
5.5 Market architecture.....	134
5.5.1 Federative architecture.....	134
5.5.2 Broker & Dealer Directory	135
5.5.3 Broker & Dealer Market.....	137
5.5.4 Quotation systems.....	138
5.5.5 Messages for the negotiation and settlement phase	139
5.5.6 Interaction pattern between market agents	141
5.6 Market institution.....	143
5.6.1 Design aspects of market institutions	143
5.6.2 Market institutions for customized q-tables	144
5.6.3 Market institutions for standardized q-tables	146
5.6.4 Market institutions for block orders	147

5.6.5 Modeling market institutions with standardized messages	148
5.7 Summary	150
6 Discussion of the market architecture.....	152
6.1 Introduction	152
6.2 Three other digital information markets.....	152
6.2.1 IBM infoMarket	152
6.2.2 AMIX: The American Information Exchange	154
6.2.3 Mariposa.....	156
6.3 A comparison with the MQI.....	157
6.3.1 The benefits of formal knowledge representation for information markets.....	157
6.3.2 The information production process	159
6.4 Outlook and further research activities	161
6.4.1 Technological issues	161
6.4.2 Strategic considerations in interorganizational systems.....	162
6.4.3 Advertising.....	162
7 Conclusions	163
Appendix A: Vocabulary Definition Language.....	166
Appendix B: Q-Table exchange format	171
Appendix C: Market messages.....	177
References	179
