Tables and Illustrations

Tables

3.1	Announced national policies on greenhouse-gas emissions, as of January 30, 1991	95
3.2	Veto states and regime creation or strengthening	104

Figures

1.1	World population growth, 1750–2100	4
1.2	Estimated gross world product, 1960–1989	5
1.3	World and U.S. energy consumption, 1925–1985	6
1.4	World carbon emissions from fossil fuel combustion, 1860–1980	8
1.5	World sulfur dioxide emissions, 1860–2000	10
1.6	Cumulative production and release of CFCs into the atmosphere, 1935–1983	11
1.7	Production of synthetic organic chemicals and PCBs in the United States, 1949–1984	13
1.8	Global fertilizer consumption, 1950–1989	14
1.9	Dumping of nuclear waste at sea, 1967–1983	15
1.10	World exports of tropical hardwoods, 1900–1980	16

Photos and Cartoons

Ocean dumping has become an increasing threat to marine life	9
Damage to trees has been traced to sources of sulfur dioxide and nitrogen oxide many miles away	73
Whaling persists despite international pressures and bans against it	80
Protesters at the McMurdo U.S. base point up the danger of exploiting Antarctic mineral deposits	90
Assaults on tropical rainforests: slash-and-burn land clearance and road building	98

During the Gulf war of 1991, protesters opposed going to war to defend oil supplies	117
Energy supplies from the volatile Gulf area have security costs hidden in the price at the pump (cartoon)	118
Oil well fires in Kuwait have proven to be environmentally threatening	120
