<i>List of figures</i>	vii
<i>List of tables</i>	ix
<i>Preface</i>	xi
1 Organizing change and innovation: challenges for European work and and organizational psychology <i>Dian Marie Hosking and Neil Anderson</i>	1
Part I Strategic change	
Introduction <i>Dian Marie Hosking</i>	19
2 Myths of managing change <i>Andrew Crouch, Amanda Sinclair and Philippa Hintz</i>	23
3 Radical change within a British university <i>A. Ian Glendon</i>	49
4 Strategic decision making in organizations: a research model and some initial findings <i>J. Pool and P. L. Koopman</i>	71
5 Towards a model of strike organization: meanings and their management <i>David Waddington</i>	99
Part II Innovation and change	
Introduction <i>Neil Anderson</i>	119
6 Innovation projects in organizations: complementing the dominant logic by organizational learning <i>René Bouwen, Jan De Visch and Chris Steyaert</i>	123

vi Contents

7	Work group innovation: a state-of-the-art review <i>Neil Anderson</i>	149
8	Individual transitions, role learning and innovation <i>Georgina M. Jackson and Nigel Nicholson</i>	161
Part III Technical change and work organization		
	Introduction <i>Robin Martin</i>	179
9	Holistic and participative (re)design: contemporary STSD modelling in The Netherlands <i>Frans M. van Eijnatten, Annelies M. Hoevenaars and Christel G. Rutte</i>	183
10	The management of strategies for internal labour market flexibility <i>Walter S. Mueller and John L. Cordery</i>	208
11	Changing towards human-centred technology <i>Gillian Symon</i>	222
12	Computer aided manufacturing and job design <i>Robin Martin and Keith Davids</i>	240
Part IV Change methods and methodologies		
	Introduction <i>Neil Anderson and Dian Marie Hosking</i>	259
13	Methodologies of organizational change: the need for an integrated approach <i>Donata Francescato and Mario Tancredi</i>	262
14	Planned and unplanned organizational change: consequences and implications <i>Jocelyne M. Ernecq</i>	276
15	Responding to a changing environment: an action research case study <i>Catherine Cassell and Mike Fitter</i>	288
	<i>Author index</i>	305
	<i>Subject index</i>	312

Figures

3.1	Force-field analysis – Aston in 1981	56
3.2	Transition model for Aston University, <i>c.</i> 1981	58
4.1	Research model (Pool 1990a)	78
4.2	Schematic representation of opportunities and leeway for choice in the structuring of strategic decision making	94
5.1	A social psychological model of strike commitment and organization	101
6.1	The three tasks of innovation management	125
6.2	Interaction sequence dealing with the innovation project in ‘Food’	132
6.3	Interaction sequence dealing with the innovation project in ‘Bank’	135
6.4	Interaction sequence dealing with the innovation project in ‘Materials’	138
6.5	Interaction sequence dealing with the innovation project in ‘Communications’	141
8.1	Mean expertise differences in rated importance of outcome	169
8.2	Mean expertise differences in choice difficulty	170
8.3	Mean expertise differences in rated effect on outcome	171
9.1	An analytical model for more integral organizational (re)design	189
9.2	A tentative proposal for a more integral organizational (re)design method	191

viii *Figures*

13.1 Variables, phenomena, and reference disciplines of the main approaches to the study of organizations (Bruscaglioni 1982)	263
15.1 The action research process	294
15.2 The action research model	300

Tables

2.1	Observed frequencies of reference to changing and unchanging organizational circumstances associated with the 1987 Stockmarket Adjustment	30
2.2	Log-linear models of relationships among action and emotion in the presence and absence of change	32
2.3	Frequencies of reference to managerial actions and emotions in pre-change and change sessions of business simulation	35
2.4	Log-linear models of relationships among action, and emotion in the presence and absence of change in business simulation	36
2.5	Mean scores for responses to abruptly increasing and decreasing environmental change in business simulation	40
3.1	Chronology of key events	50
3.2	A comparison of Greiner's (1967) success patterns and events in the change process at Aston University	53
3.3	A comparison of Plant's key activities for successful change implementation and events in the change process at Aston University	57
3.4	Stages in the change process at Aston University	60
3.5	A power-based perspective of Plant's key activities	62
3.6	Ways in which power accrues to a vice-chancellor (after Moodie and Eustace 1974 and Walford 1987)	63
4.1	Centralization characteristics	86
4.2	Formalization characteristics	87
4.3	Information characteristics	87
4.4	Confrontation characteristics	88

x *Tables*

4.5	Summary of process dimensions	89
4.6	Context factors	90
4.7	Characteristics of the subject matter	90
4.8	Data on the course of the two cases	92
4.9	Evaluation data	93
6.1	Overview of analysis of four cases	142
7.1	Approaches to group level innovation research	157
9.1	A comparison of some key attributes of the old and new structures of the desk-chair firm	199
10.1	Planned areas of work group autonomy	210
10.2	Acquisition of multi-skilling points by shift process workers	212
10.3	Repeated measures one-way ANOVA results: perceived job content and attitudes at Times 1 and 3	218
11.1	Sample criteria for design goals	229
15.1	Characteristics of feedback loops	299
