List of Figures *vii*

List of Tables *ix*

Preface *xv*

- 1 *Introduction* 1
  - 1.1 Setting the scene 1
  - 1.2 Research questions 8
  - 1.3 Overview of the study 10
- 2 *Oil Refining and Petrochemical Industry: Some Central Concepts* 13
  - 2.1 Introduction 13
  - 2.2 Complex and formation: the intertwining of both concepts 15
  - 2.3 Agglomeration economies 19
  - 2.4 Basic technology 27
  - 2.5 Commercial integration 31
- 3 *De Jong's Dynamic Market Theory* 38
  - 3.1 Introduction 38
  - 3.2 The dynamics of market structure: de Jong's model 40
  - 3.3 Limited applicability of de Jong's dynamic market model 44
  - 3.4 Conclusion 53
- 4 *Research Design: Choices and Strategies* 55
  - 4.1 Introduction 55
  - 4.2 Type of research 55
  - 4.3 Population, sample and level of analysis 56
  - 4.4 Operational definitions 59
  - 4.5 Data collection 65
  - 4.6 Data analysis 67

- 5 *Global Shifts in Oil and Petrochemical Production* 68
  - 5.1 Introduction 68
  - 5.2 The world context 70
    - 5.2.1 The oil industry 70
    - 5.2.2 The basic petrochemical industry 78
  - 5.3 Shifts in production within Western Europe 85
    - 5.3.1 Oil refining 85
    - 5.3.2 Ethylene crackers 86
  - 5.4 Summary 87
  
- 6 *Structural Changes in the Western European Oil Refining and Basic Petrochemical Industry* 89
  - 6.1 Introduction 89
  - 6.2 Industry life cycle 90
    - 6.2.1 Oil refining 90
    - 6.2.2 Petrochemical industry 94
    - 6.2.3 Conclusions 95
  - 6.3 The international major oil companies 97
  - 6.4 The chemical companies 124
  - 6.5 The national oil companies from consumer countries 149
  - 6.6 The companies from oil producing countries 174
  - 6.7 The independent private oil companies 190
  - 6.8 Comparison between the various categories of companies discerned; summary and conclusions 217
    - 6.8.1 Oil refining 219
    - 6.8.2 Investments in conversion facilities 221
    - 6.8.3 Access to crude oil supplies 223
    - 6.8.4 Access to distribution channels and marketing outlets 224
    - 6.8.5 Ethylene manufacture 227
  
- 7 *Evaluation and Final Considerations* 230
  - 7.1 Introduction 230
  - 7.2 Summary 231
    - 7.2.1 De Jong's dynamic market theory: a life-cycle perspective on the changes in market structure 231
    - 7.2.2 Research design: choices and strategies 233
    - 7.2.3 Global shifts in oil and petrochemical production 235
    - 7.2.4 Structural changes in the Western European oil refining and basic petrochemical industry 237
  - 7.3 Issues for the future 241

**Nederlandse Samenvatting 263**

# Figures

---

1.1	Structure of research	12
2.1	Formation-complex continuum	17
2.2	Average production capacity of oil refineries (primary distillation) in Western Europe, 1950-1990 (Mt/year)	23
2.3	Average production capacity of ethylene crackers in Western Europe, 1960-1990 (1,000 t/year)	24
2.4	Simplified flow diagram of oil refining and primary petrochemical production	26
3.1	General life cycle of industry and accessory structural changes	40
3.2	Conceptual framework	45
4.1	Conceptual framework	60
5.1	Major trade movements of crude oil between zones, 1976, 1993	73
5.2	Evolution of primary distillation capacity by major world region, 1950-1995 (Mt/year)	75
5.3	Primary distillation capacity and market size by country in 1990	77

5.4	Ethylene capacity by geographic region, 1950-2000 (1,000 t/year)	80
5.5	Present and future ethylene capacity by world region, various years	81
5.6	Ethylene capacity and market size by country in 1990	83
6.1	Oil refining capacity of the major oil companies totally as a percentage of total refining capacity in Western Europe, 1950-1995	101
6.2	Spatial pattern of oil refineries of the major oil companies in Western Europe in 1995	104
6.3	Spatial pattern of the closed oil refineries of the major oil companies, 1980-1995	106
6.4	Shares of the categories of oil producers in the total Western European network of service stations, 1985-1991	117
6.5	Spatial pattern of ethylene crackers of the major oil companies in Western Europe in 1993	121
6.6	Spatial pattern of oil refineries of the chemical companies in Western Europe in 1995	131
6.7	Geographical distribution of ethylene crackers of the chemical companies in Western Europe in 1993	145
6.8	Spatial pattern of oil refineries of the national oil companies in Western Europe in 1995	156
6.9	Spatial pattern of ethylene crackers of the national oil companies in Western Europe in 1993	170
6.10	Spatial pattern of oil refineries of the companies from oil producing countries in Western Europe in 1995	179
6.11	Spatial pattern of oil refineries of the independent oil companies in Western Europe in 1995	200

## Tables

---

- |     |   |    |
|-----|---|----|
| 3.1 | Expected impact of intrinsic and extrinsic mobility barriers on the level of market concentration in the Western European oil refining and basic petrochemical industry in the maturity stage | 54 |
| 5.1 | Changes in production (PRO) and consumption (COP) of crude oil and capacity of refineries (REC) by world region between 1950 and 1993 (percentages)   | 71 |
| 5.2 | World ethylene capacity by geographic region in the 1950-2000 period  | 79 |
| 5.3 | Growth in ethylene demand (million tonnes)  | 82 |
| 5.4 | Oil refining capacity (primary distillation) in Western Europe, by country, between 1950 and 1995 (1975 = 100)  | 86 |
| 5.5 | Ethylene capacity in Western Europe, by country, between 1960 and 1993 (1980 = 100)   | 87 |
| 6.1 | Changes in the number of oil refineries and in their composition regarding size class in Western Europe in the 1950-1995 period (1975 = 100)  | 91 |
| 6.2 | Changes in refining capacity (primary distillation) in Western Europe; components of change (Mt/y), 1950-1995   | 92 |
| 6.3 | Changes in production capacity of ethylene crackers in Western Europe; components of change (Mt/y), 1960-1990   | 94 |

- 6.4 Number of oil refining units of the major oil companies in 99 Western Europe in the period 1950-1995
- 6.5 Oil refining capacity (primary distillation) of the major oil 100 companies in Western Europe between 1950 and 1995 (Mt/year)
- 6.6 Changes in refining capacity (primary distillation) of Shell, 102 Esso, BP, Texaco, Mobil and CFP-Total in Western Europe in the 1980-1995 period; components of change (Mt/year)
- 6.7 Composition of the oil refining units of the major oil 103 companies by size class and by inland/coastal location in Western Europe in the 1980-1995 period
- 6.8 Joint ventures of the majors with other (major) oil 108 companies in Western European oil refining in 1995
- 6.9 Takeovers of refineries from the majors by other (major) 110 oil companies in Western Europe between 1980 and 1995
- 6.10 Catalytic cracking and hydrocracking capacity of the 113 major oil companies in Western Europe between 1985 and 1995 (Mt/year)
- 6.11 World production of oil of the major oil companies 114 between 1980 and 1990 (Mt/year)
- 6.12 Ethylene capacity of the major oil companies in Western 118 Europe in the 1960-1993 period (1,000 t/year)
- 6.13 Changes in ethylene capacity of the major oil companies 119 in Western Europe in the 1980-1993 period; components of change (Mt/year)
- 6.14 Joint ventures of the major oil companies with another 122 company in ethylene production in Western Europe in 1993

- 6.15 Number of oil refining units of the chemical companies in Western Europe in the period 1950-1995 126
- 6.16 Oil refining capacity (primary distillation) of the chemical companies in Western Europe, 1950-1995 (Mt/year) 127
- 6.17 Changes in refining capacity (primary distillation) of the chemical companies in Western Europe in the 1980-1995 period; components of change (Mt/year) 129
- 6.18 Composition of the oil refining units of the chemical companies by size class and by inland/coastal location in Western Europe in the 1980-1995 period 130
- 6.19 Joint ventures of the chemical companies with other companies in Western European oil refining in 1995 132
- 6.20 Catalytic cracking and hydrocracking capacity of the chemical companies in Western Europe in the 1985-1995 period (Mt/year) 136
- 6.21 Ethylene capacity of the chemical companies in Western Europe in the 1960-1993 period (1,000 t/year) 141
- 6.22 Changes in ethylene capacity of the chemical companies in Western Europe in the 1980-1993 period; components of change (Mt/year) 143
- 6.23 Composition of the ethylene crackers of the chemical companies by size class and by inland/coastal location in Western Europe in the 1980-1993 period 144
- 6.24 Joint ventures of the chemical companies with another company in ethylene production in Western Europe in 1993 146
- 6.25 Number of oil refining units of the national oil companies in Western Europe in the period 1950-1995 150
- 6.26 Oil refining capacity (primary distillation) of the national oil companies in Western Europe, 1950-1995 (Mt/year) 151

6.27	Changes in refining capacity (primary distillation) of the national oil companies in Western Europe in the 1980-1995 period; components of change (Mt/year)	152
6.28	Composition of the oil refining units of the national oil companies by size class and by inland/coastal location in Western Europe in the 1980-1995 period	155
6.29	Joint ventures of the national oil companies with other companies in Western European oil refining in 1995	158
6.30	Takeovers of refineries by the state companies from other (national oil) companies in Western Europe in the 1980-1995 period	160
6.31	Catalytic cracking and hydrocracking capacity of the national oil companies in Western Europe between 1985 and 1995 (Mt/year)	162
6.32	World production of oil of some national oil companies between 1980 and 1990 (Mt/year)	164
6.33	Ethylene capacity of the national oil companies in Western Europe in the 1960-1993 period (1,000 t/year)	166
6.34	Changes in ethylene capacity of the national oil companies in Western Europe in the 1980-1993 period; components of change (Mt/year)	168
6.35	Composition of the ethylene crackers of the national oil companies by size class and by inland/coastal location in Western Europe in the 1980-1993 period	169
6.36	Joint ventures of the national oil companies with another company in ethylene production in Western Europe in 1993	172
6.37	Number of oil refining units of the companies from oil producing countries in Western Europe in the period 1950-1995	174

- |      |   |     |
|------|---|-----|
| 6.38 | Oil refining capacity (primary distillation) of the companies from oil producing countries in Western Europe, 1950-1995 (Mt/year)   | 175 |
| 6.39 | Changes in refining capacity (primary distillation) of the companies from oil producing countries in Western Europe in the 1980-1995 period; components of change (Mt/year) | 177 |
| 6.40 | Composition of the oil refining units of the companies from oil producing countries by size class and by inland/coastal location in Western Europe in the 1980-1995 period  | 178 |
| 6.41 | Joint ventures of the companies from oil producing countries with other companies in Western European oil refining in 1995  | 180 |
| 6.42 | Takeovers of refineries by the companies from oil producing countries from other oil companies in Western Europe in the 1980-1995 period                                    | 182 |
| 6.43 | Catalytic cracking and hydrocracking capacity of the companies from oil producing countries in Western Europe in the 1985-1995 period (Mt/year)                             | 185 |
| 6.44 | Number of oil refining units of the independent oil companies in Western Europe in the period 1950-1995   | 191 |
| 6.45 | Oil refining capacity (primary distillation) of the independent oil companies in Western Europe, 1950-1995 (Mt/year)  | 194 |
| 6.46 | Changes in refining capacity (primary distillation) of the independent oil companies in Western Europe in the 1980-1995 period; components of change (Mt/year)              | 196 |
| 6.47 | Composition of the oil refining units of the independent oil companies by size class and by inland/coastal location in Western Europe in the 1980-1995 period               | 199 |

6.48	Joint ventures of the independent oil companies with other (independent oil) companies in Western European oil refining in 1995	202
6.49	Takeovers of refineries from the independents by other (independent oil) companies in Western Europe in the period 1980-1995	205
6.50	Catalytic cracking and hydrocracking capacity of the independent oil companies in Western Europe between 1985 and 1995 (Mt/year)	207
6.51	World production of oil of some independent oil companies between 1980 and 1990 (Mt/year)	210
6.52	Ethylene capacity of the independent oil companies in Western Europe in the 1960-1993 period (1,000 t/year)	212
6.53	Changes in ethylene capacity of the independent oil companies in Western Europe in the 1980-1993 period; components of change (Mt/year)	213
6.54	Composition of the ethylene crackers of the independent oil companies by size class and by inland/coastal location in Western Europe in the 1980-1993 period	215
6.55	Oil refining capacity (primary distillation) by category of market participants in Western Europe in the 1950-1995 period	220
6.56	Catalytic cracking and hydrocracking capacity by category of market participants in Western Europe in the 1985-1995 period	222
6.57	The share of categories of market participants in the total Western European network of service stations, 1985 and 1991 (percentages)	225
6.58	Ethylene capacity by category of market participants in Western Europe in the 1960-1993 period	226
