Index	333

# List of Tables

2.1.	Analytical framework for explaining international cooperation	31
3.1.	R&D intensity	38
3.2.	World semiconductor market, 1960–86	48
3.3.	Average annual growth rates for IC production and demand, 1978–82	49
3.4.	IBM 650 vs. Fairchild F-8	51
3.5.	Western computer sales	53
3.6.	Return on equity in the U.S. computer industry, 1974–82	54
4.1.	Government R&D funding as a percentage of GNP, 1961–70	62
4.2.	Government R&D funding by major categories, 1961–69	66
4.3.	Computer market shares in Europe, 1967	75
4.4.	French semiconductor industry, 1978	82
4.5.	PTT monopolies, 1984	90
5.1.	Contributions to the early ESA programs	107
5.2.	Ratios of contracts received to ESA contributions	109
5.3.	Necessary conditions for international collaboration	111
6.1.	Shares of the European market for ICs, 1977–81	115
6.2.	Top twenty-five companies in the world computer industry, 1978–86	118

6.3.	Trade balances in telecommunications equipment, 1980	120
6.4.	Telecommunications-equipment exports by region and destination, 1980	121
6.5.	Interfirm alliances in the semiconductor industry involving Siemens, 1974-84	136
6.6.	Number of interfirm alliances in electronics through 1984	141
7.1.	ESPRIT chronology	147
7.2.	Distribution of ESPRIT I resources among sectors	181
7.3.	National participation in ESPRIT II and Basic Research projects	200
8.1.	Telecommunications chronology	215
8.2.	National participation in RACE Definition Phase projects	246
8.3.	IBC services classification	248
8.4.	National participation in RACE Main Phase projects	254
9.1.	EUREKA chronology	260
9.2.	Number of announced EUREKA projects and their value	290
9.3.	EUREKA projects by number of participants and by cost	290
10.1.	Cross-case analysis of European technological collaboration	304
