Preface	vii
I. Introduction	I
<i>Parthasarathi Shome</i>	
A Latin American Perspective	1
History of Colombian Tax Reform	1
Objectives and Main Measures of Tax Reforms	2
II. Value-Added Tax Issues	4
<i>Parthasarathi Shome</i>	
Structural Aspects	4
Potential Versus Actual Revenue Collections	4
Calculation Using Input-Output Matrix	4
Calculations Made on the Basis of Declarations	5
Revenue Loss from Crediting VAT on Capital Goods	6
III. Income Tax Issues	8
<i>Erik Haindl, David Dunn, and Osvaldo Schenone</i>	
Tax Reform and Investment	8
Assessing the User Cost of Capital	9
Savings-Investment Gap	10
Effect of 1986 Tax Reform on the Investment Rate	10
Specific Impacts on the Investment Rate	11
Potential Versus Actual Revenue Collections	13
A Summary of Studies Initiated by the DIN	13
An Alternative Approach	14
Improving the Procedures	16
Inflation Adjustment	17
The Nature of the Problem	17
Inflation Adjustment in Colombia	18
Revenue Effects	18
IV. Customs Tariff Reform	20
<i>Osvaldo Schenone</i>	
Introduction	20
Developments Preceding the 1991 Reform	21
August 1991 Tariff Reform	21
Early Implementation of the Tariff Reform	21
Tariffs Before and After Decree No. 2095	22
Surcharges Before and After Decree No. 2096	22
Impact on Effective Protection	22

3. Distribution of Taxation, With and Without Surcharges, After Issuance of Decree No. 2095	23
4. Distribution of Taxation Using Current and Uniform Surcharges	26

The following symbols have been used throughout this paper:

- . . . to indicate that data are not available;
- to indicate that the figure is zero or less than half the final digit shown, or that the item does not exist;
- between years or months (e.g., 1991–92 or January–June) to indicate the years or months covered, including the beginning and ending years or months;
- / between years (e.g., 1991/92) to indicate a crop or fiscal (financial) year.

“Billion” means a thousand million.

Minor discrepancies between constituent figures and totals are due to rounding.

The term “country,” as used in this paper, does not in all cases refer to a territorial entity that is a state as understood by international law and practice; the term also covers some territorial entities that are not states, but for which statistical data are maintained and provided internationally on a separate and independent basis.
