<i>Series Editor's Preface</i>	xiv
<i>Acknowledgements</i>	xvi
Part I: Setting the Scene	1
1 The role and context of technology transfer in technological change	3
Introduction: technology transfer	3
Technology transfer in a multi-institutional setting	7
Background of the study and book outline	8
2 Cross-institutional research and technology links: rationale and motivations	10
Introduction: historical perspectives	10
Trends in the overall framework for R&D and technology transfer	12
Rationale and motives for cross-institutional research collaboration: an industry perspective	18
Philosophy and motivation for research collaboration: HEI and PRE perspectives	20
Conclusions	22
3 Technology transfer links and mechanisms: an overview	23
Introduction	23
Institutional classification	24
Linkage and mechanism classification	25
Evaluation of HEI/PRE/industry interactions	35
Summary	40
4 Technology transfer and knowledge and information flows	45
Introduction	45
The role of information and communication linkages in shaping industry-HEI-PRE collaborations	46
Conclusions	53

Part II: The framework: institutional structures	57
5 Public sector research: structure and institutions	59
Introduction	59
Organisation and expenditure on R&D	59
Intramural R&D	69
Commercialisation policies	74
Regionalisation and industrial linkage	77
6 Higher education mechanisms for technology transfer	83
Introduction: general trends in HEI funding	83
Institutional aspects of linkage: regional perspectives	92
Trends in the form of initiative	96
The European dimension	104
7 Transferring technology: the emergence of a new profession	107
Introduction	107
Staff in research organisations	108
Staff in recipient organisations	110
Independent transfer organisations	112
Technology transfer professional associations	116
Skills and attributes	117
Conclusion	
Part III: Practice and experiences	123
8 The research community perspective	125
Introduction	125
Philosophy and motivation for linkage	126
Organisation and contract administration	128
Organisation of HEI research	131
Typology of linkage mechanisms	132
Technology transfer and information flows	136
Outward orientation and opportunity costs	144
Firm size and links	145
9 The industrial perspective	147
Introduction	147
Firm motivation, search procedures and propensity to engage in research and technical collaboration	148
The nature of collaborative work and contact networks	153
Potential contact and non-participation	157
Conclusions	159
10 Links and networks: issues in the operation and functioning of research and technical collaborations	162
Introduction	162
Organisational and institutional problems in linkage and network collaboration	163

Management of networks	168
Research linkages and networking as part of organisational strategy	172
Industry-academic links: Co-operation or conflict?	174
Intellectual property rights and confidentiality	175
Conclusion	178
11 Conclusions	180
<i>References and selected Bibliography</i>	184
<i>Index</i>	196

List of Figures

3.1	An example of a research network system in Sweden	37
3.2	Personal research contact patterns: an example from iron and steel in Sweden	38
3.3	Interorganisational technological linkages	41
4.1	Main parameters influencing information and communication patterns in interorganisational research/technical collaboration	48
4.2	The probability that two people will communicate as a function of the distance separating them (100 metres to 255 kilometres)	49
4.3	Probability of communication as a function of distance-controlling for organisational structure	50
5.1	Organisation of French research	61
5.2	Percentage of gross expenditure on R&D financed by European governments	64
5.3	European government financing of R&D as a proportion of GDP	65
5.4	Government intra mural expenditure on R&D as a percentage of GDP	67
5.5	Organisation of German research	80
6.1	Level of research grant income as a proportion of total recurrent income for regional groups of UK universities	88
	(a) southern Britain	
	(b) northern Britain	
6.2	Range of research incomes in UK universities by region	89

6.3 Regional technology centres	95
9.1 HEI/PRE contacts of 24 chemical firms during the previous 12 months	151
9.2 HEI/PRE contacts of 23 information technology firms during the previous 12 months	152

List of Tables

1.1	Dimensions of technology transfer: levels of scale	5
3.1	US National Science Foundation typology of university-business research interactions	26
3.2	Industry-academic links in research and innovation	28
3.3	Range of industry-academic links	29
3.4	Range of industry-academic research mechanisms	30
3.5	Examples of selected mechanisms of interaction	31
3.6	Types of mechanisms of university-industry relations	33
3.7	Typology of industry-government co-operative R&D: the case of Oak Ridge National Laboratory	34
3.8	Key dimensions of industry-academic links	36
3.9	Departmental mapping of research activity	42
3.10	List of potential indicators of university-industry interaction	42
5.1	World largest research funding organisations in 1985	63
5.2	Government budget allocations on research and development (GBAORD) for EC countries in 1989	68
5.3	Government budget allocation on research and development (GBAORD)—distribution to civil objectives	69
5.4	UK government expenditure by primary purpose 1986-7 to 1989-90	71
5.5	Regional R&D centres in the Basque Country	81

6.1	European Community higher education expenditure on research and development and employment of scientists and engineers	86
6.2	Compound real growth rates	86
6.3	Sources of funding for higher education in Europe	91
6.4	Science park investments in UK regions	103
6.5	Second EC Framework Programme on research and development 1940–1994	105
7.1	SPRINT agreements signed by collaborative type: 1985–8	114
7.2	SPRINT agreements signed by industrial sector: 1985–8	114
8.1	Research overhead recovery by UK university department	130
8.2	Type of collaboration sought by non-UK firms	135
8.3	Growth of teaching company scheme	140
8.4	Breakdown of teaching company costs in recent years (UK)	141
9.1	Motives for research collaboration with HEIs/PREs	150
9.2	Process by which firms most commonly select HEI/PRE research partners	154
9.3	Forms of assistance sought by firms from HEIs/PREs (UK)	156
9.4	Research and technical services purchased by firms during 1988	158
9.5	Types of partners with whom firms choose to collaborate	158
9.6	Sources of information on HEI/PRE contacts which firms would be prepared to use	159
9.7	Reasons for non-collaboration with HEIs/PREs	160
