

CONTENTS

	Preface	
	Introduction	3
	The sleepwalker effect	3
	Levels and problems	6
	Idealizations	8
Chapter 1	Reswitching and capital reversing, a brief exposition	13
	A warning	13
	The model	14
	Characteristic propositions of neoclassical production theory	18
	Perversities and anomalies	20
Chapter 2	The background of the debate: some history	23
	Joan Robinson's research programme	24
	Discontinuities in the recent history of economic thought	27
Chapter 3	Clouds in the neoclassical sky	29
	Robinson: "The Production Function and the Theory of Capital"	29
	Champernowne: "The Production Function and the Theory of Capital: A Comment"	45
	Robinson: The Accumulation of Capital	49
Chapter 4	Taking methodological stock (I)	55
	The Polish Idealization Model	55
	Strategies of model development	57
	Back to the capital theory debate	63
	Correspondence and factualization	65
	Appendix: An example of correspondence	68
Chapter 5	Triumph and crisis of the aggregate neoclassical production model	73
	Part 1: The neoclassical triumph	74
	Samuelson: "Parable and Realism in Capital Theory: The Surrogate Production Function"	78
	The story continues	
	Part 2: Crisis for the neoclassical model	88
	Garegnani's criticism	88
Chapter 6	Taking methodological stock (II)	95

	The Antipodean Idealization Model	95
	Comments	98
Chapter 7	From curiosum to issue	105
	Levhari: "A Non-Substitution Theorem and Switching of Techniques"	107
	Critical reactions to Levhari: the Symposium	111
	Bruno, Burmeister & Sheshinski: "The Nature and Implications of the Reswitching of Techniques"	111
	Pasinetti: "Changes in the Rate of Profit and Switches of Techniques"	122
Chapter 8	Neoclassical reactions	127
	Hicks' problem	128
	Brown: "Substitution-Composition Effects, Capital Intensity Uniqueness and Growth"	133
	Ferguson & Allen: "Factor Proces, Commodity Prices, and Switches of Technique"	140
Chapter 9	Taking methodological stock (III)	151
	Tactics and moves	151
	Strategies and likelihoods	157
	AIM and PIM reconsidered	158
	Weapons	159
Chapter 10	Theory and practice of mathematics	161
	Traditional views: mathematics as a neutral instrument	161
	Modern views: mathematics as an integral part of scientific discovery	164
	A case study in the practice of mathematics	
	Gallaway & Shukla: "The Neoclassical Production Function"	170
	Critical reactions	177
	Garegnani: "The Neoclassical Production Function: Comment"	177
	Sato: "The Neoclassical Production Function: Comment"	179
Chapter 11	Taking methodological stock (IV)	185
	The sorcerer's apprentices	185
	From the science of mathematics to the mathematics of science	187
	Proofs	187
	Proofs and programmes	188
	Proofs, programmes and strategies	190
Chapter 12	A final stock-taking	191
	Historical ironies	191

The ironies explained: sleepwalking on the object level	193
Empirical versus formal arguments: sleepwalking on the meta level	194
The status of research programmes	197
Presuppositions as heuristics	199
Different models for different purposes? Three types of pluralism	201
Idealization: between instrument and explanation	202
Samenvatting	205
Literature	211
