TABLE OF CONTENTS

I. **Plenary Address**

Whither Manufacturing and Operations Research? 3
Richard H.F. Jackson

II. **Planning and Control**

An Hierarchical Planning, Loading, Routing and Control Scheme for Flexible Manufacturing Systems 25
Ronald G. Askin, Manbir S. Sodhi, Suvrajeet Sen, and Alessandro Agnetis

Analysis of Production Planning and Control (PPC) Systems as an Efficient Combination of Information Activities 40
Günter Fandel

Hierarchical Production Planning in Group Technologies 60
Klaus-Peter Kistner, Stephan Schumacher, and Marion Steven

Design of an Information-Based Distributed Production Planning System 75
Joachim Reese

LP-Models in Production Planning and Control 91
D.B. Pressmar

A Realization for a Generic Controller in Production Planning Hierarchies 101
W.J. Davis and S.D. Thompson

III. **Genetic Algorithms**

Sequence Scheduling with Genetic Algorithms 129
T. Starkweather, D. Whitley, K. Mathias, and S. McDaniel

Local Search in Problem and Heuristic Space for Job Shop Scheduling Genetic Algorithms 149
Robert H. Storer, S. David Wu, and Renzo Vaccari

The Application of a Parallel Genetic Algorithm to the n/m/P/C_{max} Flowshop Problem 161
S. Stöppler and C. Bierwirth

IV. Scheduling

Scheduling Semiconductor Test Operations: Optimization and Approximation 179
Reha Uzsoy, Chung-Yee Lee, Louis A. Martin-Vega, and Jim Hinchman

Job and Tool Scheduling for Flexible Machining Cells 200
S. Webster

Scheduling and Control of Flexible Manufacturing Systems: Some Experiences and Observations 216
Richard A. Wysk, Sanjay Joshi, and Ning-Shu (Bob) Yang

Dispatching Issues in Job Shop Scheduling 234
Khosrow Hadavi, Yuan-Wang Hou, Wen-Ling Hsu, David Levy, and Michael Pinedo

V. Real-Time Scheduling

Dynamic Task Assignment in Distributed Manufacturing Systems 249
A. Aman, A. Balakrishnan, and V. Chandru

An Object-Oriented Knowledge Representation in Real-Time Scheduling 263
Pierre Lefrançois, Marie-Hélène Jobin, and Benoit Montreuil

An Expert System for Distributed Real-Time Scheduling of Factory Communications Resources 280
M.D. Pardue

A Rescheduling Procedure for Manufacturing Systems Under Random Disruptions 292
S. David Wu, Robert H. Storer, and P.-C. Chang

VI. Neural Networks

A Hybrid Approach to Flexible Manufacturing Systems Scheduling Using Neural and Symbolic Processing 309
Luis Carlos Rabelo and Sema Alptekin

Applying Artificial Neural Networks to Process Planning 331
Luis Carlos Rabelo and Derya Alasya

A Hybrid Intelligent Architecture for Automated PCB Assembly 346
Mahesh Vellanki and Cihan H. Dagli

Neural Networks for Detection of Process Change in Manufacturing Systems 369
Tep Sastri

VII. Applications of Mathematical Programming

Tabu Search Techniques for the Quadratic Semi-Assignment Problem 389
Wolfgang Domschke, Peter Forst, and Stephan Voß

The Impact of Correlated Demands on Integrated Safety Stock Optimization in Multi-Stage Manufacturing Systems 406
Karl Inderfurth

VIII. Applications of Modelling

An Integrated System Shell Concept for Computer Aided Design and Planning 425
Amy J.C. Trappey and C. Richard Liu

Service Level in Multistage MRP and Base Stock Controlled Production Systems 445
John A. Buzacott, Suzanne M. Price, and J. George Shanthikumar

Rapid Modeling: Methods and Tools for Strategic and Operational Planning of Manufacturing Systems 464
Kenneth R. Anderson and Maryam Shahraray

Enterprise Models for the Design and Management of Manufacturing Systems 476
Bruce E. Koenig and R. Lal Tummala

Responsive Tool Management: Making Fixed Manufacturing Systems More Flexible 500
P. Rogers, D. Veeramani, and M.M. Barash

Multicriteria Design of Manufacturing Systems 520
Gerald W. Evans, Sai Kolli, and Mansooreh Mollaghasemi

List of Sponsors 531
