PART I THE IMPLEMENTATION OF EXPERT SYSTEMS

1 The Changing Landscape in the Banking Industry	3
Introduction	3
Is AI an Important Issue in Banking?	4
From Hype to First-class results	8
Benefits From Knowledge-based Technologies	13
Return on Investment	17
The Users' Viewpoint in Expert Systems Development	20
2 High Technology in American Banking	26
Introduction	26
Top Issues Stressed by American Financial Institutions	27
AI at Citibank	32
Serving the Strategic Plan at Security Pacific	34
Expert Systems at American Express	39
Learning from the Prudential Insurance Company	42
3 Associating Financial Performance with Networking and AI	45
Introduction	45
Goldman Sachs and Bank of America	47
Chemical Banking and Great Western Bank	53
Merrill Lynch, Mellon Bank, Bankers Trust	57
Information Systems at Wells Fargo	63
Other AI Investments in American Banking: The Search for Greater Competitiveness	69
4 The Leadership Position of Japanese Securities Houses	75
Introduction	75
A Financial Industry on the Move	77
Top of the Line: the Mitsubishi Group	81

4	The Leadership Position of Japanese Securities Houses – cont.	
	High Technology at the Fuyo Group: Yamaichi Securities and the Fuji Bank	86
	Imaginative Solutions by Sanyo Securities	90
5	Implementation of Advanced Technology in Japanese Banking	96
	Introduction	96
	Expert Systems Development and Usage by Dai-Ichi Kangyo Bank	97
	Sumitomo Bank, Sanwa Bank, Mitsui Bank and Kyowa Bank	101
	The Center for Financial Industry Information Systems (FISC)	105
	Contributions to the AI Culture by Japanese Government and Research Institutes	108
	The Expert Systems Role of Computers and Communications Manufacturers	112
6	Expert System Usage by British Banks and Financial Services	121
	Introduction	121
	A First-class British Implementation of Expert Systems: Marks & Spencer	123
	The Best Examples of Expert Systems in British Banking: Lloyds, Barclays, Midland, NatWest	127
	Allied Irish Bank and Riada Securities	132
	Meeting the Prerequisites of the Payments System in the UK	135
	The Forward-looking Views of the International Stock Exchange	140
7	Current Technology Developments in German Banking	145
	Introduction	145
	Expert Systems Implementation at Kundenkreditbank and the Post Bank	147
	Deutsche Bank, Dresdner Bank, Bank für Gemeinwirtschaft and Betriebswirtschaftliches Institut der Kreditgenossenschaften	151
	Bayerische Hypotheken Bank and Bayerische Vereinsbank	157
	The Right and Wrong Way of Building Expert Systems	160

PART II SPECIFIC APPLICATIONS AREAS

8	Expert Systems for Investment Advisors	167
	Introduction	167
	Perfecting the 'Assistant to' Approach in Investment Advice	169
	Nikko's Best Planner and Nomura's Individual Investment Expert System	175
	Using an Advisory System for Sophisticated Investors	180
	Support for Fund Management Through AI	185
9	AI in the Lending Domains	193
	Introduction	193
	Prerequisites for Automating the Functions of Lending Advisors	195
	Analysis of Balance Sheets Through Spreadsheets Enriched with AI	200
	Exploiting Information for Lower Risk in Corporate Loans	205
	Creditworthiness and the Role of a Knowledge-based Scoring System	211
10	Automatic Decision Layers for Private Loans	215
	Introduction	215
	Expert Systems for Personal Loans: a Procedural Solution	217
	Using AI for Mortgages	222
	A Credit Card Expert System by Mitsubishi Research Institute and Diamond Credit	225
	Managerial and Technical Aspects of Authorisers' Assistants at American Express and Other Financial Institutions	230
11	Supporting a Bank's Commercial Operations Through AI	237
	Introduction	237
	A New Look at EFT/POS and the Industrialisation of Banking Operations	238
	Electronic Tellers: a Growing Role for Online Expert Systems	243
	Expert Systems in Ancillary Services	247
	Assisting Insurance Underwriting Through AI	254
12	Taxation, Compliance and Security	261
	Introduction	261
	ExperTAX by Coopers and Lybrand	264

12	Taxation, Compliance and Security – cont.	
	AI Implementation for the Internal Revenue Service	268
	Expert Systems written for Compliance and for Auditing	273
	Can AI Help to Create a Secure Environment?	278
13	Applying AI in DP Operations	284
	Introduction	284
	Implementation in Classical DP Operations and in the Backoffice	286
	Expert Systems as Fault Finders	293
	AI in Direct Assistance to the Computer Centre	300
	Expert Systems for Database Operations	303
14	Expert Systems in Electronic Messaging	308
	Introduction	308
	TEXPERT by the Sumitomo Bank	310
	ATRANS and the AMTS Expert System Products	317
	Research and Implementation in Language Translation Done in Japan	324
	A European Product in Language Translation: METAL by Siemens	328
15	The Use of Expert Systems for Training and Training in Expert Systems	333
	Introduction	333
	An Expert System for Training Forex Dealers	334
	Bringing Expert Training Systems Into the Educational Mainstream	338
	An Approach to Computer-based Training	342
	The Training of Knowledge Engineers	347
	<i>Appendices</i>	355
1	Statistics on Working Meetings Which Have Taken Place in 3 Continents	355
2	List of Companies Participating in the Research Study	356
	<i>Index</i>	374

List of Illustrations

1.1	Expert systems in banking: research criteria established and executed by the study which led to this book	7
1.2	'Positioning' of banks in a 'national' sense and the effects of 'hype'	10
1.3	Sophistication and growth of technology within a given timeframe and as a function of time	12
1.4	The need for bending the cost curve in IT	15
1.5	Using AI. The highest returns are in innovation, not in substitution	18
2.1	Sophistication of AI systems as a function of time and experience	31
3.1	National distribution curves with expert systems in banking	47
4.1	Expert system projects at Mitsubishi Trust and Banking	85
4.2	Domains where expert systems can be implemented in IT management	86
4.3	Radar Chart for the evolution of Company A v. Company B	92
6.1	Roles and environment of the International Stock Exchange (ISE)	141
8.1	Client choice v. risk in a Portfolio Advisor expert system	172
8.2	Investment Advisor modules	174
8.3	Expected performance of a recommended investment in securities	178
8.4	Annuity consultation expert system	187
9.1	Radar Chart for the analysis of financial performance	196
9.2	Integrative approach to B/S analysis	201
9.3	An expert system for the analysis of balance sheets	205
9.4	AI construct for fuzzy engineering in granting a loan	208
10.1	Decision layers for loans	219
11.1	Consumer-oriented ANSER system in Japan	246
11.2	ANDES expert system components	252
11.3	Reinsurance retention: (a) a classical DP approach and (b) a more elegant AI solution	259
12.1	Tax advisory expert system	262
13.1	Architecture of ESCORT	294
13.2	Basic tree structure for handling of fault insurances	296
14.1	Example of implementation of recognition rules in TEXPert	312
14.2	Improvement in the voucher reading ratio	313

14.3	a. TEXPERT: A day in November 1987 with batch procedures	315
	b. TEXPERT: Statistics after the procedural change (November 1988)	316
14.4	Key modules of ATRANS	318
14.5	ATRANS: automating the flow of messages	321
14.6	Translation with METAL	331

List of Tables

1.1	Change in banking culture	22
3.1	Knowledge-based systems at Chemical Banking	53
4.1	Expert system application areas for the 1990s	76
4.2	Expert systems application in the financial industry outside the mainstream of this book	79
5.1	Comparison between the largest bank in America and the largest bank in Japan	98
5.2	Examination of applicants and passes under JIPDEC scheme	109
6.1	Actual and projected direct debits/credits in UK	140
8.1	The first 6 rules of a Customer Profile Analyser	170
8.2	Knowledgebank of a gilt selection expert system for private investors	183
8.3	Two areas of interest for Portfolio Management systems	186
11.1	AI applications examples in life insurance	255
11.2	AI applications examples in non-life insurance	255
13.1	Potential application areas of knowledge-based systems in a range of software	287
15.1	Curriculum for knowledge engineers	350
