<i>Preface</i>	vi
<i>Acknowledgements</i>	viii
1 Analysis of Costs	1
1.1 General introduction	1
1.2 Manufacturing costs	2
1.3 Relative importance of fabrics and commodities	4
1.4 Determination of costs	4
1.5 Analysis of fabric requirements in relation to garment style	5
1.6 References	10
2 Principles of Purchasing	11
2.1 Company policy and purchasing constraints	11
2.2 Purchasing system based on contracts	12
2.3 Purchasing systems based on the sales plan	14
2.4 Economic order quantity exercise	16
2.5 Derivation of economic order quantities	19
2.6 Two ordering systems for 'topping-up' stock	21
2.7 Comparison of fabric purchasing systems	24
3 Quality Control, Quality Assurance and Clothing Materials	25
3.1 Introduction	25
3.2 Purchasing by specifications	26
3.3 Quality control tests	28
3.4 New developments in testing fabrics: objective measurement	35
3.5 Certified quality assurance suppliers	40
3.6 Integration of the quality control function	42
3.7 References	43

iv Contents

4	Marker Utilisation Variations: Theoretical Concepts	45
4.1	Introduction	45
4.2	Categorisation of products	45
4.3	The constraints of fabric width	48
4.4	The constraints of grain direction	52
4.5	Contribution of human factors: the marker planner	53
4.6	Optimising marker planning in production	56
4.7	References	58
5	Marker Utilisation Variations with Striped and Checked Fabrics	59
5.1	Introduction	59
5.2	Contributors to alignment difficulties	59
5.3	The constraints of garment design	61
5.4	Spreading techniques for striped and checked materials	61
5.5	Marker planning with striped and checked fabrics	63
5.6	Marker utilisation variations with striped and checked materials	65
5.7	Cutting room experiences with striped and plaid fabrics	66
5.8	Potential for automation of cutting striped and checked fabrics	68
5.9	References	68
6	Fabric Losses Outside the Marker	69
6.1	Introduction	69
6.2	Analysis of direct losses	69
6.3	Analysis of indirect losses	73
6.4	The processing of fabric faults	75
6.5	The framework of management control	83
6.6	References	84
7	Fabric Utilisation Variations: Industrial Experiences	85
7.1	Introduction	85
7.2	Case study 1: Trouser manufacture	85
7.3	Case study 2: Foundationwear manufacture	87
7.4	Feedback on case study 1	90
7.5	Feedback on case study 2	91
7.6	References	92
8	Cut Order Planning	93
8.1	Introduction	93
8.2	The issue of cutting instructions	95
8.3	Economic cut quantities	96
8.4	Overview of factors affecting economic cut quantities	104
8.5	The cut order plan	104
8.6	Costing the cut order plan	108
8.7	Computerised cut order planning	113

8.8	References	115
9	Documentation and Control of Material Usage	116
9.1	Introduction	116
9.2	Fabric usage control: issue of materials	116
9.3	Fabric usage control: spreading audit	121
9.4	Fabric usage control: fabric reconciliation	123
9.5	Fabric faults and claims for poor quality	126
9.6	Documentation and the management function	126
9.7	Reference	126
10	The Management of Commodities	127
10.1	Introduction	127
10.2	Relevant purchasing techniques	128
10.3	Identification of lead times	128
10.4	Coordination with production schedule	129
10.5	Progress chasing	129
10.6	Supplier selection	130
10.7	Usage of commodities	130
10.8	Overview of commodity purchasing and usage	131
10.9	References	131
11	Manufacturing Resources Planning	132
11.1	Introduction	132
11.2	Principles of MRP and MRPII	133
11.3	Critical assessment of MRP and MRPII	136
11.4	Clothing industry experiences of MRP	138
11.5	References	139
12	Materials Management for Quick Response	141
12.1	Introduction	141
12.2	Organisational strategies for quick response	141
12.3	Standardisation affecting the materials supply chain	144
12.4	Buyer/supplier relationships	146
12.5	Overview of sourcing strategies	147
12.6	JIT suppliers and small batch sizes	150
12.7	Overseas sourcing	151
12.8	Case studies of quick response implementations	153
12.9	References	155
<i>Appendix</i>	<i>Buying of Materials: Theory and Practice</i>	<i>157</i>
	<i>Glossary</i>	<i>162</i>
	<i>Index</i>	<i>165</i>
