

# CONTENTS

<b>I. GENERALIZED CONVEXITY</b> .....	<b>1</b>
<b>Introduction to generalized convexity</b> .....	<b>2</b>
S. SCHAIBLE	
<b>Structural developments of concavity properties</b> .....	<b>14</b>
P. MAZZOLENI	
<b>Projectively-convex models in economics</b> .....	<b>23</b>
S.T. HACKMAN-U. PASSY	
<b>Convex directional derivatives in optimization</b> .....	<b>36</b>
D.WARD	
<b>Differentiable <math>(\alpha, \lambda)</math>-concave functions</b> .....	<b>52</b>
E. CASTAGNOLI-P. MAZZOLENI	
<b>On the bicriteria maximization problem</b> .....	<b>77</b>
L. MARTEIN	
<b>II. FRACTIONAL PROGRAMMING</b> .....	<b>85</b>
<b>Fractional programming - some recent results</b> .....	<b>86</b>
C.R. BECTOR-A. CAMBINI	
<b>Recent results in disjunctive linear fractional programming</b> .....	<b>99</b>
V. PATKAR-I.M. STANCU-MINASIAN	
<b>An interval-type algorithm for generalized fractional programming</b> .....	<b>106</b>
Y. BENADADA-J.-P. CROUZEIX-J.A. FERLAND	
<b>A modified Kelley's cutting plane algorithm for some special nonconvex problems</b> .....	<b>121</b>
E.A. SIDERI	
<b>Equivalence and parametric analysis in linear fractional programming</b> .....	<b>143</b>
C. SODINI	

<b>Linear fractional and bicriteria linear fractional programs.....</b>	<b>155</b>
A. CAMBINI-L. MARTEIN	
<b>III. DUALITY AND CONJUGATION.....</b>	<b>167</b>
<b>Generalized conjugation and related topics.....</b>	<b>168</b>
J.E. MARTINEZ-LEGAZ	
<b>On strongly convex and paraconvex dualities.....</b>	<b>198</b>
J.P. PENOT-M. VOLLE	
<b>Generalized convexity and fractional optimization.....</b>	<b>219</b>
K.H. ELSTER-A. WOLF	
<b>Duality in multiobjective fractional programming.....</b>	<b>232</b>
C.R. BECTOR, S. CHANDRA, C. SINGH	
<b>An approach to Lagrangian duality in vector optimization.....</b>	<b>242</b>
L. MARTEIN	
<b>Rubinstein Duality Scheme for Vector Optimization.....</b>	<b>252</b>
M. VLACH	
<b>IV. APPLICATIONS OF GENERALIZED CONVEXITY IN MANAGEMENT SCIENCE AND ECONOMICS.....</b>	<b>265</b>
<b>Generalized convexity in economics: some examples.....</b>	<b>266</b>
W. EICHHORN	
<b>Log-Convexity and Global Portfolio Immunization.....</b>	<b>276</b>
L. MONTRUCCHIO-L. PECCATI	
<b>Improved analysis of the generalized convexity of a function in portfolio theory.....</b>	<b>287</b>
J.-P. CROUZEIX-J.A. FERLAND-S. SCHAIBLE	
<b>On some fractional programming models occurring in minimum-risk problems.....</b>	<b>295</b>
I.M. STANCU-MINASIAN-S. TIGAN	

<b>Quasi convex lower level problem and applications in two level optimization.....</b>	<b>325</b>
P. LORIDAN-J. MORGAN	
<b>Problems of convex analysis in economic dynamical models.....</b>	<b>342</b>
E. PESSA-B. RIZZI	
<b>Recent bounds in coding using programming techniques.....</b>	<b>348</b>
B.K. DASS	
<b>Logical aspects concerning Shephard's axioms of production theory.....</b>	<b>352</b>
W. EICHHORN-U. LEOPOLD	
<b>Contributing Authors.....</b>	<b>359</b>
