

Contents

Chapter 1. Introduction.....	1
Chapter 2. Oligopoly Games and Their Extensions.....	2
2.1. The Cournot Model and Its Variants.....	3
2.2. Models with Product Differentiation.....	8
2.3. Multiproduct Models.....	9
2.4. Group Equilibrium Problems.....	11
2.5. Supplementary Notes and Discussions.....	13
Chapter 3. Existence and Uniqueness Results.....	14
3.1. Existence Results for Multiproduct Oligopoly.....	14
3.2. Relation of Equilibrium Problems to Fixed Point and Nonlinear Complementarity Problems.....	19
3.3. Uniqueness and Properties of Equilibria in the Classical Game.....	25
3.4. Linear Oligopoly Markets.....	31
3.5. Numerical Methods for Finding Cournot-Nash Equilibria.....	34
3.6. Supplementary Notes and Discussions.....	38
Chapter 4. Dynamic Oligopoly with Discrete Time Scale.....	41
4.1. Classical Results.....	42
4.2. Adaptive Expectations.....	50
4.3. Combined Expectations.....	62
4.4. Sequential Adjustment Processes.....	69
4.5. Extrapolative Expectations.....	76
4.6. Supplementary Notes and Discussions.....	81
Chapter 5. Dynamic Oligopoly with Continuous Time Scale.....	82
5.1. Classical Results.....	83
5.2. Adaptive Expectations.....	88
5.3. Combined Expectations.....	99
5.4. Extrapolative Expectations.....	105
5.5. Supplementary Notes and Discussions.....	108
Chapter 6. Extensions and Generalizations.....	109
6.1. Quadratic Games under Discrete Time Scale.....	109
6.2. Quadratic Games under Continuous Time Scale.....	122
6.3. Time Dependent Models.....	125
6.4. Nonlinear Oligopolies under Discrete Time Scale.....	132
6.5. Nonlinear Oligopolies under Continuous Time Scale.....	144
6.6. Supplementary Notes and Discussions.....	162
