PREFACE	3
ABSTRACT	9
1. INTRODUCTION	11
2. SCOPE AND SPECIFICATION OF THE STUDY	15
2.1 The Problem	15
2.2 Specification of the Study	15
2.3 Objectives	15
2.4 Limitations	16
3. REVIEW OF THE LITERATURE - PREVIOUS RESEARCH AND FINDINGS	17
3.1 Engineering and Design Aspects	17
- Domestic Wastewater	17
- Pretreatment	18
- Septic Tank Effluent	19
- Site Design and Operation Factors - Small Systems	20
- Design Factors for Basin Infiltration	24
3.2 Organic Matter	29
3.3 Pathogenic Organisms	31
3.4 Phosphorus	35
- Soil Factors	35
- Sorption Isotherms and Mechanisms	36
- Phosphorus Removal Studies	38
3.5 Nitrogen	44
3.6 Mathematical Modelling	49
3.7 Implementation of Onsite Wastewater Treatment	50
4. RESULTS FROM INVESTIGATIONS AND EXPERIMENTS	55
4.1 Materials and Methods	55
- General	55

- The Soil	55
- Soil Analysis	56
- Wastewater Analysis	57
4.2 Infiltration as a Polishing Step	58
- Introduction	58
- Full Scale Studies on Basin Infiltration	58
- Column Studies	65
- Short Summary	76
4.3 The Effect of Pretreatment on the Infiltration Processes	78
- Introduction	78
- Goals of the Study	78
- Column Set-Up, Test Programme and Sampling	78
- Hydraulic Capacity	79
- Influent Characteristics	80
- Phosphorus Removal	80
- BOD-Removal	83
- Nitrogen	84
- Other Parameters	86
- Short Summary	92
4.4 Phosphorus Removal Studies	94
- Introduction	94
- Column Tests with Phosphate Solutions	94
- Biological P-Fixation	100
- Laboratory Tests	106
- Fractionation, Sorption and Desorption of Full Scale Soils	108
- P-Correlations and Concentration Effects	110
- Longer Rest-Periods and Continuous Dosing	113
- Scanning Electron Microscope (SEM) Analysis	115
4.5 Improved Phosphorus Removal	124
- Introduction	124
- Goals of the Study	124
- Mapping of Technologies	124
- Column Set-Up, Test Programme and Sampling	125
- Results from the Column Test	127
- Test with Filter Boxes	131
- Full Scale Applications	132
- Short Summary	134
4.6 Investigation of 16 Existing Sites	136
- Introduction	136
- Goals of the Study	136
- Sampling	136
- Description of the Sites- Treatment Efficiency and Performance	137
- Soil Investigations	148

- Short Summary	153
4.7 Full Scale Implementation of the Technology	155
- Introduction	155
- Goals of the Study	155
- A General Description of the Problem	156
- The Kverrestad Project (KP)	157
- The Kverrestad Model	163
5. DISCUSSION AND CONCLUSIONS	167
5.1 General	167
5.2 Soil Analysis	167
5.3 Input Characteristics	168
- Flow	168
- Pollutants	168
5.4 Hydraulic Load	169
- General	169
- Subsurface (Small) Systems	169
- Pond Infiltration	170
5.5 Organic Matter	171
5.6 Nitrogen	172
5.7 Phosphorus	173
- Introduction	173
- P-Removal in Relation to Metals in Soil	175
- P-Saturation, Sorption and Desorption	176
- Hydraulic Load and Intermittence	176
- Depth of Unsaturated Zone	177
- Improved P-Removal	177
5.8 Implementation	178
5.9 Summary	178
