

Contents

1	Conventions	1
1.1	Introduction	1
1.2	Conventions and Game Theory	3
1.2.1	Coordination Games	3
1.2.2	Equilibrium Refinements	6
1.2.3	Conventional Behavior as Bounded Rationality	7
1.2.4	Conventions Minimize Transaction Costs	9
1.3	Explaining the Emergence of Conventions	11
1.3.1	The Spontaneous Order Tradition	11
1.3.2	Desiderata for Evolutionary Explanations	13
1.4	Evolutionary Games	14
1.4.1	Game Theory and Optimization	14
1.4.2	Evolutionarily Stable Strategies	15
1.4.3	Evolution Does Not Imply Efficiency	16
1.5	A Summary of the Rest of the Thesis	18
1.5.1	Language	19
1.5.2	Property	20
1.5.3	Money	21
1.5.4	The Firm	22
2	Language	23
2.1	Introduction	23
2.2	The Problematic Intuition	25
2.3	Signaling Systems	27

2.4	Signaling as an Equilibrium Refinement	28
2.5	Examples and Anomalies	31
2.6	Natural Language	33
3	Property	35
3.1	Introduction	35
3.2	Baboons	37
3.2.1	Symmetric “Hawk and Dove”	37
3.2.2	“Hawk and Dove” with Recognizable Role Asymmetry	39
3.3	Gold-Diggers	40
3.3.1	Players and Strategies	40
3.3.2	The “Veil of Uncertainty”	40
3.3.3	Interaction and Payoffs	41
3.4	Equilibrium	43
3.4.1	A Classification of Social States	43
3.4.2	An Equilibrium Concept	44
3.4.3	Equilibria	45
3.5	Evolutionary Dynamics	50
3.6	Concluding Remarks	51
4	Money	52
4.1	Introduction	52
4.2	The Emergence of Media of Exchange	54
4.3	Media of Exchange as Conventions	57
4.4	The Static Model	60
4.5	A Positive Approach to Dynamics	63
4.6	The Evolutionary Model	65
4.7	Concluding Remarks	68
5	The Firm	70
5.1	Introduction	70
5.2	The Cost of Market Transactions	72

5.2.1	The Coase-Dahlman Transaction Cost Concept	72
5.2.2	Coordination Problems and Transaction Costs	72
5.2.3	A Division of Labor Problem	74
5.3	The Firm	76
5.3.1	The Internal Workings of Organizations	76
5.3.2	Equilibrium with a Firm	77
5.4	Remarks	78
