
CONTENTS

PART ONE The Nature of Research 1

CHAPTER ONE: Introduction 3

Overview 3

Introduction 3

Goals of Research 5

 Exploration 5

 Description 6

 Prediction 7

 Explanation 7

 Action 8

Evaluation of Research 9

 The Who: Researchers, Participants, and Consumers
 of Research 10

Box 1.1 The Golden Fleece Awards 12

 The What: Research Topics and the Worldviews
 Behind Them 14

 The Where: Research Settings 16

 The When: The Time Frame of Research 16

 The Why: Additional Reasons for Research 17

 The How: Research Methods 17

Summary 18

CHAPTER TWO: The Scientific Approach 20

Overview 20

Introduction 20

A Philosophy of Science	21
When Is Something True?	22
How Can We Tell Which Theory Is Better?	24
How Can We Put What We Know Into Practice?	25
Why Do We Do It the Way We Do?	26
Science and Nonscience Compared	27
Observation	28
Logical Analysis	29
Research Reports	29
Definitive Studies	30
Determinism	31
Conducting Research	31
Box 2.1 Science Is . . . Science Is Not	32
Choosing a Topic	32
Operationalization	33
Summary	35

CHAPTER THREE: Research Ethics

37

Overview 37

Introduction 37

- A Question of Balance 38
- Learning From Experience 38

Ethical Issues Before the Project 38

- Voluntary Participation 39
- Informed Consent 40

Box 3.1 Informed Consent Form: Jury Decision Making 41

- Deception 42
- Physical Harm 44
- Psychological Harm 44
- Self-Determination 45

Ethical Issues During the Project 46

- Researcher's Identity 46
- Behavior Changes in Participants 46
- Considerate Treatment of Participants 48
- Retraction of Consent 48
- Debriefing of Participants 49
- Alleviating Harmful Aftereffects 50

Ethical Issues After the Project 50

- Anonymity of Participants 51
- Confidentiality 51
- Recompensing Control Groups 52
- Data Analyses 52
- Reporting Research Results 53

Formal Ethical Guidelines	55
Legislation	55
Box 3.2 The Nuremburg Code	56
Codes of Ethics	58
Summary	58
Box 3.3 American Psychological Association Research with Human Participants	59

CHAPTER FOUR: Literature Review **61**

Overview	61
Introduction	61
Goals of a Literature Review	62
Deciding Which Information Is Relevant to Your Project	63
Information Concerning Theory	63
Information Concerning Methods	63
Information Concerning Data Analysis	64
Finding Sources of Information	64
Published Sources	64
Key Topics	66
Key Authors	67
Key Studies	68
Unpublished Studies	68
Box 4.1 A Summary of Citation Indexes	69
Organizing the Literature: Parting the Sea of References	69
Writing a Literature Review	70
Summary	71

PART TWO **Design 73**

CHAPTER FIVE: Experimental Research **75**

Overview	75
Introduction	75
Causal Analysis in Experimental Research	76
Demonstration Versus Demography	78

Alternative Explanations of Research Results 79

- History Effects 80
- Maturation Effects 80
- Testing Effects 81
- Instrumentation Effects 82
- Statistical Regression Effects 83
- Selection Effects 84
- Mortality Effects 85
- Participant Bias 86
- Experimenter Bias 87

Experimental Design 88

- The Basic Design 88
- The Basic Pretest Design 90
- The Solomon Four-Group Design 91
- Factorial Design 92
- Repeated Measures Design 96
- Participant Characteristics 99

Ethical Considerations in Experiments 99

- Random Assignment of Participants 100
- Manipulating Variables 100
- Blind Procedures 101
- Demonstration Versus Demography Again 101

Summary 102

CHAPTER SIX: Quasi-Experimental Research 104

Overview 104

Introduction 104

Time-Series Design 106

- Interrupted Time-Series Design 106
- Multiple Time-Series Design 109
- Regression-Discontinuity Design 109
- Nonequivalent Groups Basic Pretest Design 111
- Self-Selection 113
- Single-Participant Design 113

Summary 117

CHAPTER SEVEN: Survey Research 119

Overview 119

Introduction 119

- Survey Content 121

Survey Instruments	123
Survey Topics	123
Survey Instructions	124
Survey Formats	125
Arrangement of Survey Items	125
Pretesting Survey Instruments	127
Administering Surveys	128
Face-to-Face Interviews	128
Telephone Interviews	131
Mail Surveys	133
Comparisons Among Administrative Methods	135
Mixed-Method Surveys	135
Box 7.1 Face-to-Face, Telephone, and Mail Surveys Compared	136
Box 7.2 Checkpoints for Preparing a Survey Instrument	137
Data Analyses in Survey Research	138
Description	138
Association	140
Elaboration	141
Summary	143

CHAPTER EIGHT: Field Research **146**

Overview	146
Introduction	146
Validity of Field Research	148
Internal Validity	148
External Validity	149
Intrusion in Field Research	149
Intrusion into Observations of Behaviors	149
Intrusiveness of Settings	150
Intrusiveness of Treatments	150
Systematic Observation in Field Research	151
Selecting Events	151
Recording Events	154
Coding Events	155
Interpreting Events	156
Sources of Error	157
Validity	158
Participant Observation	158
Levels of Participation	158
Selecting Settings	160
Recording Observations	161

Coding Observations 163
Interpreting Observations 163

Numerical Data Analyses 164
Description 164
Correlation 164

Report Writing 165

Summary 166

CHAPTER NINE: Archival Research 168

Overview 168

Introduction 168

Content Analysis 169

 "Who": The Source of Messages 170

 "Says What": The Content of Messages 172

 "To Whom": The Audience of Messages 172

 "How": Communication Techniques in Messages 174

 "With What Effect": The Effect of Messages 174

 "Why": The Reasons for Communication 175

 Methodological Issues in Content Analysis 175

 Quantification in Content Analysis 178

Existing Data Analysis 180

 Applications of Existing Data Analysis 181

 Methodological Issues in Existing Data Analysis 185

Summary 186

CHAPTER TEN: Data Organization 188

Overview 188

Introduction 188

Data Storage Terminology 189

Data Storage Media 190

 Computer Cards 191

 Computer Disks 191

 Magnetic Tapes 192

Data Coding 192

 Numeric Representation 193

 Codebooks 195

 Coding Mechanisms 196

Data Cleaning	197
Single-Field Analyses	197
Multiple-Field Analyses	197
Data Reduction	198
Summary	199

CHAPTER ELEVEN: Beyond Hypotheses **201**

Overview	201
Introduction	201
Data Transformations	202
Outliers	202
Skewed Distributions	203
Heterogeneous Variances	203
Proportions	203
Informal Guidelines	204
When Surprising Results Are Obtained	205
Check Your Analyses for Errors	205
Explore Reasons for the Results	206
Return to Your Data	206
Return to the Literature	207
Develop a Curious Mind	207
Nonsignificant Versus Insignificant	207
Horseshoes and Hand Grenades	207
No Study Is Worthless	208
Summary	210

CHAPTER TWELVE: Writing a Research Report **211**

Overview	211
Introduction	211
Research Report Organization	212
Writing Style	214
Voice and Person	214
Tense	214
Avoiding Stereotypes	214
Clarity	215
Introducing the Project	216
Getting the Reader's Attention	216
Reviewing the Literature	217

Describing the Method	219
Describing Participants	219
Describing Sampling	219
Describing Apparatus or Materials	219
Describing Procedure	220
Describing Manipulations	221
Describing Your Results	221
Describing Preliminary Results	221
Describing Main Results	223
Describing the Conclusions	224
Writing Other Sections	226
Summarizing the Report	226
Identifying Your Sources	226
Including Appendices	227
Having Your Research Report Reviewed	227
Summary	228

PART THREE

Resource Chapters 231

CHAPTER THIRTEEN: Conceptual Overview of Statistical Analyses 233

Overview 233

Introduction 233

Exploratory Research 234

 Appropriate Questions for Exploratory Research 234

 Appropriate Statistics for Exploratory Research 235

Descriptive Research 236

 Appropriate Questions for Descriptive Research 236

 Appropriate Statistics for Descriptive Research 237

Predictive Research 241

 Appropriate Questions for Predictive Research 242

 Prerequisites for Predictive Research 242

Box 13.1 Exploratory, Descriptive, and Predictive Research Questions 243

 Statistics for Predictive Research 243

Explanatory Research	245
Appropriate Questions for Explanatory Research	245
Appropriate Statistics for Explanatory Research	245
Summary	245

CHAPTER FOURTEEN: Measurement **247**

Overview 247

Introduction 247

 Dimensionality 248

Measurement Levels 248

 Nominal Measurement 249

 Ordinal Measurement 250

 Interval Measurement 251

 Ratio Measurement 252

Reliability 252

Box 14.1 Summary of Measurement Levels 253

 Interrater Reliability 253

 Test-Retest Reliability 254

 Alternate Forms Reliability 254

 Split-Half Reliability 255

 Item-Total Reliability 256

Box 14.2 Summary of Reliability Procedures 257

Validity 257

 Face Validity 257

 Concurrent Validity 258

 Predictive Validity 258

 Construct Validity 259

Epistemic Correlation 260

Summary 261

CHAPTER FIFTEEN: Scaling **263**

Overview 263

Introduction 263

Common Aspects of Scales 264

 Face Validity of Scale Items 264

 Instructions for Completing Scales 265

 Item Bias 265

 Formats for Scale Items 266

Thurstone Scales	268
Item Generation in Thurstone Scales	269
Item Analysis and Selection in Thurstone Scales	269
Administration of Thurstone Scales	271
Pros and Cons of Thurstone Scales	271
Likert Scales	272
Item Analysis and Selection in Likert Scales	272
Administration of Likert Scales	272
Philosophies of Human Nature Scale	273
Guttman Scales	274
Ideal Response Pattern in a Guttman Scale	274
Item Generation in Guttman Scales	275
Item Analysis in Guttman Scales	275
Guttman Scaling to Study Riots and Political Participation	276
Disadvantages of Guttman Scales	277
Semantic Differential Scales	277
Item Generation in Semantic Differential Scales	278
Administration of Semantic Differential Scales	278
Semantic Differential Scaling to Study Officers of the Court	279
Q-sort Scales	280
Administration of Q-sort Scales	280
Use of Q-sort and Postcards to Examine Self-Concept	281
Disadvantages of Q-sort Scales	282
Sociometric Scales	282
Administration of Sociometric Scales	282
Scoring of Sociometric Scales	283
Using Scales	285
Multiple Scale Administration	285
Using Existing Scales	286
Summary	286

CHAPTER SIXTEEN: Sampling

288

Overview 288

Introduction 288

Sampling Distributions 290

 The Population 291

 Random Selection 292

 Standard Error 292

 Confidence Intervals 294

 Sample Size 295

Probability Sampling 296
 Simple Random Sampling 297
 Systematic Random Sampling 298
 Stratified Random Sampling 299
 Cluster Sampling 300

Nonprobability Sampling 302
 Accidental Sampling 302
 Purposive Sampling 303
 Quota Sampling 303

Representative Samples 304

Summary 305

CHAPTER SEVENTEEN: Evaluation Research 307

Overview 307

Introduction 307

 Summative and Formative Evaluation 309
 Consumers of Evaluation Research 309

The Hartford Project: An Example of Evaluation
Research 310

 Operationalization 310
 Similarity to Basic Research 310
 The Problem 310
 The Program 311
 The Questions 312
 The Measures 312
 Ecosystem Measures 314
 The Results 314

The Controversy Over the Use of Experiments in Evaluation
Research 315

 Difficulties with Experiments in Evaluation Research 315
 Qualitative Information in Evaluation Research 316
 Innovation in Evaluation Research 316
 Ethics in Evaluation Research 317

Ethical Considerations in Evaluation Research 318

 Formulation and Negotiation 318
 Structure and Design 319
 Data Collection and Preparation 319
 Data Analysis and Interpretation 319
 Communication and Disclosure 320
 Use of Results 320

Summary 321

References	323
Glossary	331
Author Index	341
Subject Index	345
